Lower Loop Letters

How does your handwriting com-pare with this week's illustration shown below? Does it have some of the features indicated in this script? If your writing is similar to this there are some interesting features about your personality and handwriting that you might like to know. Compare your lower looped letters of "i", "g", "p" and "y", with these; are they wide and spacious or do they have a long slender appearance about them? This variation denotes a difference in the writer's personality for one is indicative of an adaptable, friendly, congenial nature, an excellent social mixer, while the other shows the writer to be more conventional, exclusive and a careful chooser of friends and associates. The writer of this style of script does not mingle freely with others but i content to have a small circle of companions.

Another interesting consideration

is that these lower looped letters also reveal to what extent you enjoy companionship and sociability. The write of this week's script would be a "natural" at any social event for there is a wealth of adaptability and liness written in every lowe looped letter in the writing. An active t' e eastern sky, sober-faced, solemn, bitterly silent riders converged on imagination is evident in this script, indicative of a nature that can meet and cope with new and varied situa-tions. Good judgment, generosity and adaptability make this writer a good companion and an excellent host o

A "New Look" Caused a Riot

The question of the long or shor skirt has caused some controversy. but in the late 1790's new fashion aused much more excitement, say the London, England, Telegraph, At that time the silk hat horrified people in the streets of London, started a general disturbance pune tuated by yells, screams, yelping of dogs and culminating in the trampling underfoot, of a child. The wearer and originator of the unusual headwear was liable to a fine of \$2,500, because of the danger of causing a breach of the peace.

In those days all smart men had at least one pair of corsess in their wardrobe, and Sir Waiter Raleigh ost no respect by following the fashion. He even wore his at night! Men have done almost as many darming things with their clothes as women are reputed to do. The next time you "tut tut!" at

a "woman in trousers" remember that trousers were considered effeminate in ancient China, so much so that the male's long gown, so characteristic of that country, was nade expressly to cover the shameful garments!

During the sixteenth century, in Germany wives wrapped trousers around their husbands' heads as a certain cure for headache! * * *

Worried by the present trend in fashion, a young lady remarked the other day that "What with bustles and padding coming back again, we shall soon be going all the way and having crinolines!" Apart from the obvious difficulty of steering these wide hooped cre-

ations along crowded streets and into modern cars, she was worried hout how one sat down!! Someone in Vienna, in 1387, was imilarly perturbed, so a patent was aken out covering a useful addition to the standard crinoline. This was a folding chair built into the hoop framework, allowing the lady to rest her legs by sitting down whenever she wished!
