The Temple in the Nation's Life

Erra 3:10-13: Psalms 84:1-2; Ezekiel 11:16; 37:26-28.

worship and bow down; Let us kneel before the Lord our Maker.—Psalms 95: 6. Abel, Noah, Abraham, Isaac an Jacob presented their offerings and worshipped God in the great out-ofdoors, under the open canopy of heaven. Moses, on divine instruction, built a moveable tabernacle in the wilderness. Later, when Israel entered the promised land, this was re-placed by a magnificent temple in the reign of Solomon. Nebuchadnezzar destroyed this place of worship is 587 B.C. About 50 years after, the reurned exiles laid the foundation of a new temple. It was an occasion of great rejoicing. But while many shouted for joy, the older men, recalling the grandeur of the former temple, wept because, in comparison the new one was greatly inferior.

Every disappointment can prove a blessing if we have God. Those who had been taken into captivity had learned that God could be worshipped, learned that God could be worsimpen, even away from the temple at Jeru-salem. There had been a spirtualizing of their worship. God had spoken to them through the prophet Ezekiel, saying, "Although I have cast them far off among the heathen, yet will I have the them to little sanctuary." I be to them as a little sanctuary."

The church edifice, be it simple or

The church editice, be it simple or ornate, ought to be a place where we meet with God. For that reason it should have a large place in our life. Assembling with others with the express purpose of worshipping can prove a great blessing to every one of us. God must not be confined to particular, buildings, designated for that ticular buildings designated for that purpose. It must be an habitual atti-tude of soul. We must walk and talk with God day by day and hour b hour. Thus by our daily life we wi express the idea of true worship.

The Green Thumb By Gordon E Smith

The Daisy Family

The once-humble daisy is now on of the real mainstays of a well planned garden, because now there to supply bloom during every period of the growing season. Their widely-varying colors, heights and manner of growing make pos-sible any desired effect, all the way

from border edge to background. Daisies help to point up other Daisies help to point up other flower forms in your garden and among their additional charms are their varied centres, their long lasting qualities after being cut, and the profusion of bloom most of them offer. Whether annual, biennial like the English daisy, or perennial they are all very easy to grow. None is seriously troubled by disease or insect ously troubled by disease or insect pests and few have any decided soil preference. Among the annual vari-eties that can be sown in open ground early in the year are the gaillardia calliopsis, helianthus (sunflower) and

chrysanthemum.

Among the taller annuals you will want the rudbeckia, golden in color, and such varieties of the helianthus as Stella and Sunlight, which usually grow about three feet high and are most withhle for use in smaller, remost suitable for use in smaller, re-stricted borders. The taller sunflowers need lots of room to preven their coarse leaves overshadowing th

lovely touch when grown near daylily trumpets or between tulips and iris. When your delphiniums and lilies dominate the scene in July, rosy pycompanions.

Rudleckias are valuable for con-trast behind rounded mounds of phlox during the summer. In August blend very easily with pink tones. However, they are most effective as a background for masses of marigolds and some of the lilies. In early fall

other autumn flowers.

There are several daisies which serve the gardener in problem plantings. Even in hot dry locations your ings. Even in not dry locations your calliopsis, coreopsis, gaillardia, sun-flowers and rudbeckias are almost sure to thrive; and although few an-annuals relish shade, calliopsis will blossom freely there.

While dallies in general are care-free growers, some attention to their well-being assures maximum per-formance. Asters and chrysanthe-mums should be set out just as soon as the ground can be worked. Shasta daisies need lifting and dividing every second year. The old centre of the crowns should be discarded and only young healthy shoots replanted Asters need division every three years to prevent deterioration. Regardless of the type of soil,

good drainage is essential to all daisies, annual or perennial. Another task in the garden that helps to maintain a good appearance is staking.
The daisies needing it most are coreopsis, gaillardias, the tall sunflowers
and asters.
Prevention of seed formation is

important to prolong the period of flowering, particularly in the case of good bit of this work. However, plants that are not used for cutting should have fading blossoms snipped Gusher Stopped

A sentimental woman on a tour of British Columbia stopped before a giant tree and gushed: "Oh, wonderful, wonderful elm. If you could only speak, what would you say?'
To which the senior forester, ac companying the woman, suggeste would say: "Pardon me, lady, I'm not an elm - I'm an oak."

Penny Mason combines crepe and lace in a white graduation dress. The half peplum and little shoulder bands are of frosty lace.

Young Rural Athletes-Although often lacking proper equipment, children in Ontario's rural schools provide a great source of future athletic champions. With weather improving, recess periods find the youngsters making healthy use of every free minute. At Silk's School in Melancthon township, southpaw Jim Davie, 15, bats with Don Snider, 11, the barehanded catcher, while admiring young girls watch the softballers play.
