**More Milk Higher Quality**

**Faster Milking** increases milk yield... you get all the milk each milking; you keep milk production high throughout lactation. Here are two exclusive CO-OP Universal features that make machine milking faster... simpler:

**CALF-NOSE INFLATIONS**—patented off-center openings do away with "crawling," eliminate need for stripping with but rare exceptions. Large size accommodates flow of easy milkers as well as hard milkers.

**CALF-NOSE CLAW**—scientifically designed, it places heavier milking action where it is needed—on the heavier milking rear quarters. Thus, all four quarters finish milking at approximately the same time.

**PLUS Protected Low Vacuum** CO-OP Universal Milk-ers milk fast and efficiently on only 10 to 11 inches of vacuum... controlled and protected by a weight-type relief valve and a mercury-column vacuum gauge.

Remember, too, there is a CO-OP Universal Milker to best fit your individual needs. Only your cooperatively-owned CO-OP Universal Division makes a complete line of milking machines: Standard Calf-Nose Milk-ers... Short-Tube Milk-ers... Floor and Track-type Portable Milk-ers.
