Any time the Kremlin bosses allow-travellers in every country of right-about-face so fast that toes are often seen trying to thrust them-selves out of the heels of boots. But selves out of the heels of boots. But sometimes even such speed isn't enough to satisfy the Red powersthat- be, as witness what happened to Mr. Gomulka, until recently one of the really big shots in unhappy Poland.

At Mine Warkers beadcausers he

For something like twenty years Władisław Gomulka has been a lea-Wladislaw Gomulka has been a leader in the Polish working-class movement. During the war he helped organize the Peoples' Army, became Secretary-General of the Communist-minded Workers' Party, and always strongly advocated closer post-ways ties between his country. post-war ties between his country and Russia.

After the war ended he became a key member of the Communist group that gained and still holds almost complete control of Poland, and worked hard on its behalf. His efforts did not pass unappreciated in Moscow. Ten months ago Uncle Joe honored him with a personal bile, and among his countrymen Gomulka was known as "Little Stalin".

But the higher you climb the faster you can fall. Ever since then Gomulka has been slipping. His big mistake seems to have been staying at which Tito was denounced probably because Gomulk had long been advocating a farm policy much

Ever since the Cominform decision regarding Tito, his offices saw little or nothing of Gomulka. Be-eause of "ill health" he stayed in seclusion, and the word started flying around that he was in bad at the Kremlin. Early this month rumors proved to have been wellgrounded, when the executive com-mittee of the ommunist Workers' party announced that Gomulka had been fired as secretary-general on with Yugoslavia and opposing Com-

Less than twenty-four hours later Gomulka "ate his peck of dirt". Before a large meeting of party work-ers he confessed his "errors" and ised in future to be a good boy and stick closely to the party—or Russian—line. But in spite of this confession, the general feeling is that Mr. Gomulka is about through

However, from our standpoint. eouraging feature. The prompt manner in which the Kremlin folks eracked down on their former buddy the split among Communists over official Moscow policy is more widespread and deeper than most observers even suspected. And unsound apples generally start going rotten

An event of more than passing aignificance took place in Washing-An event of more than passing significance took place in Washington a week or so ago. It involved a man named John L. Lewis — who is rather well known throughout the world and especially on this Continent — and another by the name of Horace Michael Ainscough, of whom few but his friends and neighbors had ever previously heard.

But it would appear that the Nizam, for all his wealth and reputively all his wealth and reputively and the control of those same Razakars. He and his advisers believe—and probably with good reason — that acceptance of India's terms would mean the end of all Moslem privilege in Hyderabad. He remained adamant, and the Indian troops marched in.

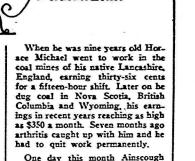

But it would appear that the Nizam, for all his wealth and reputively and I think I will just have to take a piece of Bellman at such a price," he said. "Do you know anything about this Bellman, then?" asked Moe. "Do you know anything about this past performances?"

* * "So far as I am concerned Bellman may be black, white or even a Chinee. I never knew he was even

LIFE'S LIKE THAT

"This is no way to warm up a pitcher, Pop!"

took his first train trip in thirty
years — destination Washington.
At Mine Workers headquarters he chatted with John L. Lewis and others. Then Lewis handed him a check for \$100 — the very first payment to be made under the penion plan for which John L, fought such a fierce and lengthy battle early this year.

The plan is financed by coal operators contributions of 20 cents a ton on all coal mined. It provides \$100 a month for all miners having 20 years service in the mines after reaching the age of 62. On receiving his check Mr. Ainscough said "God bless the day John L. Lewis was born." In other circles vastly dissimilar sentiments from this are of the earth seem to think he's who dig the coal out of the bowels Czar of the miners. But the men pretty much O.K.

India Although only a little more than a year old as an independent nation, already the Dominion of India is involved in two great military clashes which it is feared may develop into a full-scale war with Pakistan. These are in Kashmir, on her northwestern border, and in Hyderabad, right in the very middle

of the Indian domain. Of the two embroilments the latter is probably more gravely fraught with danger. From an Indian viewpoint it is essential that there should be a close relationship between the Dominion and Hyderabad. This princely state, with a population of something like 16 million, almost bleets the Indian sub-continent; and both for economic reasons and those that come under the heading of "security", India has been de-

those that come under the heading of "security", India has been demanding a controlling interest in the Hyderabad Government.

What the Indians call security actually means that they want the Hindu majority freed from the oppression of the Moslem ruling class, which represents only one eighth of the total population. They claim that the Hindus have been badly mistreated by the Hyderabad army, mistreated by the Hyderabad army, and more especially by the Raza-kars—a Moslem volunteer corps numbering around 150 thousand.

If the ruler of Hyderabad-the Nizam, reputed to be the richest man on earth—had disbanded these tournaments just as much as it is at hockey games—Hank said to him in a low voice. "What are the Razakars, and had granted full popular government, India would nave undoubtedly agreed to an arrangement giving his domain a highly privileged position among the princely states—something amounting almost to independence, with India controlling only communications, defenses and foreign affairs.

man may be black, white or even a Chinee. I never knew he was even alive till about a minute ago when Hank. "But eight to one is a very something if we were to overlook such a golden opportunity." "You are dead right," said Moe. "Eight must have a piece of Bellman

the whole lining zips out in an lighter weight.

Last year, as many will remember to their sorrow, killing frosts arrived at an exceptionally early date

nowering p hant; and some of the more susceptible sorts of fruit in some sections was It is hoped, of course, that there

won't be a repeti-tition of such a happening this fall. Still, frosts have a way of occurring when you least expect them, and there are simple and easy precau-tions that will protect flowers and even some vegetables until the comally follows the first "nip", and sometimes lasts for several weeks.

Upturned bushel baskets, thicknesses of newspaper, or pieces of muslin or burlap give protection to tender annuals. Stakes driven between the plants before covering keep the blossoms from being bro-ken or crushed; and if the area to be protected is large, light wooden frames covered with any one of materials mentioned can be placed

. . . Coverings of any kind should be removed in the morning and put in place again in the early evening if there is a prospect of frost. There are some gardeners who spray plants touched by frost before the sun reaches them the next day, using a strong stream from the hose. But others have found this to be rather risky, and believe that cover-ing in some manner is much safer and more certain.

Entire patches of tomatoes and peppers can be protected for several weeks after the first frost so that Outstandingly successful farmers the fruit will still be in good condi-tion. There have been years when tomatoes so guarded could be used, were asked, not long ago, to list what they thought were the most common violations of good farm-

tomatoes so guarded could be used, right from the plant until well on in November.

If you are one of those that grow your tomatoes unstaked you'll find that hay or straw, if available, is an excellent "frost-blanket" when tossed liberally over the plants. It can generally disregarded when the opexcellent "frost-blanket" when toss-ed liberally over the plants. It can eaily be pulled away from them in the morning, and left lying on the ground between for re-use whenever required. Sheets of heavy brown wrapping paper, or pieces of sturdy muslin may also be used with good common mistakes. results.

Finally, there is the plan of pulling tomato and pepper plants up by the roots, then hanging them upside down some place that is frost-free and where there is air circulation. The fruit will remain in good condition for several weeks, with what was pulled green ripening gradu-ally Tomatoes, however, do much

But maybe, after all, the Weatherman will be kind for once, and we'll have a nice, long frost-free Autumn. Still, it's best to be prepared, and there's nothing ouite of the higher-value crops the sort of crops grown and the way the land is treated. Too much guessing in the use of fertilizers and failure to follow a rotation which includes maximum use of the higher-value crops disheartening as going out some morning and seeing the ruin of whole areas of fruits and flowers which could have been saved at the expense of just a small amount of

than risk the chance of stirring up

further antagonism, Rank and his associates have let all plans for

A reader of this column hauls me over the coals for some jabs I've been taking recently at the "give-away" radio shows and their pulling-power. "If the people didn't want to listen to such programs, they wouldn't do so," she writes. "Who are you to try and tell us what shows we should hear, and what we shouldn't?" Now you'd think a film based on a novel that has been a best-seller since great-granddaddy's day—maybe that should be "great-great"—a story that has been read and wept The answer to the question is generation in all parts of the world, would be a pretty safe investment would be a pretty sate investment so long as the actors, directors and script-writers did a fairly decent chore, which they did. But it seems that it isn't so in these mixed-up days when anything can happen and usually does. myself up as censor over people's listening habits, and if they want to tune 24 hours a day to programs whose only point of appeal is a tenmillion-to-one chance of winning something for nothing, that's their business.

Quite naturally, with a picture having such box-office possibilities, Mr. Rank expected to gather in quite a few of those nice U.S.A. dollars south of the border. But it so happens that in the story there is a character named Fagin — remember him?—who is quite a despicable party, and no fooling. And the Anti-Defamation League and other such groups down around New York are claiming that the representation of Fagin on the screen is manifestly anti-Jewish.

What is more, if they keep on the way they've been going, they're liapresentation of Fagin on the screen is manifestly anti-Jewish. way they've been going, they're lia-ble to kill a lot of entertainment which people of reasonable intelli-gence can really enjoy.

One He Missed "Young man," said an angry father from the head of the stairs, "didn't I hear the clock strike four when you brought my daughter home?" "You did," admitted the daughter's escort. "It was going to strike eleven, but I grabbed it and your slumber." The father could only mutter, "Dawgone! Why didn't I think of that one in my courting days!"
