## CREAM PRODUCERS!!

# Is it not worth it?

An average can of cream at the present prices will lose \$5.20 if it is graded second, with lower than second grade returned to the producer.

Is this not worth a little extra effort. on your part to keep your cream CLEAN and FREE FROM ALL FEED, CELLAR AND STABLE FLAVORS and marketed often?

This is the season when winter feed stocks are running low; stable temperatures run fairly high—and so do the odors. Milk soaks up these barn and cellar flavors. May we suggest that you keep your stable, milk house and cellar well ventilated, clean the cows, clean utensils, and remove the milk from the stables and separator as soon as possible after milking-then cool the cream thoroughly. Keep in a cool, well ventilated place and stir frequently.

ENJOY HORTICULTURAL SLIDES Horticultural-minded folk found the coloured sides presented on Monday night in the Department of Agriculture building here most helpful and inspiring, as they relate to their town beautification project. The pictures showed schools, churches, factories and all public buildings transformed with planting and care of the grounds, and it was most effective. Window boxes shown were superb. Mr. T. S. Cooper commented on the pictures, with explanations which were most helpful. Horticultural-minded folk found the CO-OP GROCERIES **FRUITS VEGETABLES**
