## **Errors Other** Folks Have Made

Everyone has read we should not scare a child with threats that "the big black dog" or "the policeman will get you." But I never realized how important the warning is until my own little boy was about a year old. He cried a great deal and to quiet him I'd tell him he had better stop erying or the black dog would get him. For the moment he would stop crying. Soon I was lusing the "big black dog" threat to get him to mind almost everything. Now at two years of age he is scared of all dogs. No screaming and almost goes into hysterics. I only hope with time and patience I can correct an innatice I've done to both child and Mrs. H. C.

I accused a neighbour boy of stealing \$3 from us. Soon after-wards in checking over our bills, receipts, etc., and 1 raying over the matter, the thought came to me that we had ordered baby chicks with the money. Although I begged his forgiveness, and that of parents, my husband and I have never regained their friendship. \* \* \*

I let my hospital insurance lapse Within one month two of my chil was far greater than payments the policy would have been for

Last spring I made the mistake of not spraying my fruit trees. I looked as if we were going to have a big crop to sell, but as the ripening season drew near the fruit de-veloped brown rot and we barely had enough for our own use.

Mrs. B. H. G.,

I planted seven rows of beans during midsummer and failed to spray them early and regularly. Innot control them. I lost several bushels of beans in this way. It pays to plant early and spray at regular intervals when beans are 2 or 3 inches high.
Mrs. R. L. M.,

I let my only son play high school football at the age of 13 which was entirely too young, as he was often playing against boys who were much older and stronger than he. When he was 15 he was hurt in a game. The X-ray showe veloped in the other lung and after 41 days of intensive suffering and

an encyclical of Pope Plus in which he urged "internationalization of Jerusalem and all other sacred places." Britain is generally sym-pathetic with the Arabs' position; and the Scandinavian states are dis-turbed over Israel's failure to find and punish the murderers of the U.N. mediator, Count Folke Berna-

dotte. So it looks, at this moment, very much as though Israel will remain outside the United Nations, officially, for a while yet.

to give the fans something more than promises of "Better things next summer." RUSSIA For centuries there has been great speculation, from time to time, as to whether there is still anything of Noah's Ark remaining. According to the Book of Genesis, the Ark — a triple-decked vessel some 450 feet in length — "rested is the eventh month on the seventh."

some 450 teet in length — "rested in the seventh month, on the seventeenth day of the month, upon the mountains of Ararat."

These mountains are, at present, in Turkish territory, overlooking boundaries with Iran and Soviet Russia, Nat long and three West-Russia. Not long ago three Western archaeologists announced that they had the Turkish Government's permission to go and take a look for the Ark. One of the men is Egerton Sykes, a member of the British Geological Society and for-mer British commercial attache at Warsaw. Another is Hans Roozen, a Dutch student; while the third is Dr. E. A. Smith, of North Carolina. They have been trying to raise money for the expedition and hope to start for Turkey early this

summer.
But the Russians see in the proposal nothing more than a spy plot concocted by Anglo-American inconcocted by Angio-American in-telligence agents. Pravda, the Com-munist party paper, said, "It is quite enough to look at a map to understand the meaning of the Anglo-American imperialists. The Anglo-American imperialists. The that no man likes to come home true purpose of such an expedition to a supper of cold shoulder and is as far from archaeology as Eger-

HIGHLY RECOMMENDED—Every sufferer of Plants can fool the best of us. So often a stray seedling is saved as being a choice plant, only to turn out to be a weed. Stray tree seedlings are the worst offenders, coming up among our shrubs or along the foundation of the house, where we forget them until they are so big we have to ruin some good plant or shrub to get them out. Watch out for seedling trees coming up in the middle of a choice lilac or Japanese snowball.

Every woman should remember

## THE FARM FRONT Special Announcement

She gazed at the high falls a short distance away, fascinated by the myriad, white streaks the hot sun painted through it in bold, up-and-down strokes. The soft thundering sound as the water spilled down forming a base of leaping crystal-whiteness, like frosting, mixed nicely with the orchestral music that played behind her.

M. F. CHRISTOPHER

"You look like little Alice might have when she walked into Won-derland," Gib Rawlings said at her elbow. "Amazed, and almost a little scared, too."

"Seared?" She turned to the tail. dark young man beside her, whose broad chest tapered down to the black trunks he was wearing. A thin smile curved her lips, and she hoped it would hide the sense of guilt within her, the feeling of emptine that had come upon her since the never-to-be-forgotten ruff with Buzz "Scared?" she repeated. "Wh

He shrugged tan shoulders.
"That's it. You shouldn't."
She lifted his left hand, and with her right hand rubbed it. Smiled. "In we go!" "Anything you say!" Gib yelled,

and she dived in, he after her.

The clean water, at first freshly cool, plunged her. She swung out her arm, and in She swung out her arm, and in long, easy strokes, swam toward the narrow, wooden bridge to the left. She passed someone who spoke her name, and she answered, "Hello!" smiling. She did not look back, but kept going, smoothly, with professional dignity — for she was swimming champion of the

John Russell

Most of us have heard of such things as celery-fed ducks and, in a bygone day, corn-fed blondes; but I must confess that milk-fed Johnson tried it on young onions tomatoes are something new - at least to me. However, that's what -and with similar results! Which will be enough about milk they're saying — feeding milk to young tomato plants is not only possible, but highly profitable as for the time being—now something about the milk producers—the cows. The Dominion Experimental Farms

According to Prof. Frank M. Harrington, who is head of horti-cultural research at Montana State College, the milk feeding will not only make the tomato plants grow. They'll mature earlier; the vines will be sturdier; the root systems 50% bigger at transplanting time; and at harvest-time the tomatoes will be big, solidly-fleshed, with

. . . ,

As for the yield—that from the milk-fed plants will be about double. In fact the milk appears to act very much the same as some of the new growth-stimulating hormones we hear so much about.

In charge of the Montana experi-ments was Dr. Leon Johnson. He dissolved powdered milk in water till it formed a soupy mixture and poured about one-third of an ounce around each new plant the first week it was up. Then he increased the amount one third of an ounce each week for five weeks. He also used buttermilk and skim milk in make them easy to locate. (With the caustic treatment, the stick should be held in dry paper to prevent getting your fingers burned). -the same manner.

As for the actual results-plants that hadn't been given extra plant food of any sort produced at the rate of 6,829 pounds of tomatoes per acre; those receiving skim milk alone yielded at the rate of 9,814 pounds; while plants receiving both skim milk and ammoniated phosohate averaged 12,374 pounds.

One pound of powdered milk One pound of powdered milk fertilizes 100 young plants in pots, and will take care of even more if grown in flats. Johnson believes that milk-feeding tomatoes will prove-practical for both home gar-
