PARTERISON

Farm Philosopher says:

It is a wise precaution to treat ALL your seed -even if registered and certified-to keep it free from disease. You can do this, yourself, quite easily, but be sure you do it correctly. The Dominion Plant Pathological Laboratories of the Science Service, Ottawa, will tell you, without charge, what treatment is best for the seed you intend to sow.

Timely loans to purchase seed and other farm necessities may be had by responsible farmers from our nearest branch manager. Let him know your needs.

To My Mother

Mother's Day, Sunday, May 8th
What friends we've always
been, my dear, together all these
years; we've shared so many little
joys, so many hopes and fears.
You sheltered me at first from
life, when I, too young to fend,
would stumble, and would find
you there, an everpresent friend.
How often when some childish
fear brought terror as I lay, your
kindly voice would comfort me
and chase my fears away. Could
you but make my path less hard,
no chance was ever lost; my welfare was your constant thought,
no matter what the cost. As I
look back along the years, I cannot help but see how little
thought you gave yourself, and
yet, how much for me. The wise
advice you always gave so often
helps me through; I know I never
can repay the debt I ewe to you.
And now though in these troubled
times our ways lie far apart, no
one can ever take the place that
you hold in my heart. When I
thank God for all the things that
He has designed to send, I thank
Him most for giving me so good
and true a friend. Personals
