

Great River From "Back of Beyond"

Through valleys between these compressed ridges flow three of the world's great rivers: the Mekong, the Salween, and the smaller but commercially more important Irrawaddy.

This is the glamorous river immortalized by Kipling as "the road to India," beloved of the British. Movie travelers have also familiarized the western world with its jungles and fabulous ruins.

The Irrawaddy is the great river of Burma. Its headwaters rise in the borderlands of China and Tibet, where they approach within a few miles of the Salween and the little branch of the Brahmaputra.

The headwaters of the Irrawaddy rise in the high mountains of the back of beyond. . . . It is an important artery of commerce. To the tourists it is a river of scenic beauty, to the natives it is a waterway for goods and passengers.

The Irrawaddy is a beautiful river, a beautiful river, a beautiful river. It is a beautiful river, a beautiful river, a beautiful river. It is a beautiful river, a beautiful river, a beautiful river.

Among the cities which still, in the face of the modern world, are hundreds of miles from the sea, it is known by its mystical name and Kipling's "The Road to India."

At the same time, the Irrawaddy is a river of scenic beauty, to the tourists it is a river of scenic beauty, to the natives it is a waterway for goods and passengers.

Now it is no intention of ours to get out the crying-jowels over Mr. Bobby Locke's golfing.

"Excuse me, sir," said a shabby talker at a City office "are you satisfied with the amount of your present life insurance?"

"You could not," "Would you invest in a good second-hand coat if you could get it cheap?"

"No!" "Just so! Would an offer to supply you with first-class imported Havana cigars at ten dollars a hundred appeal to you?"

"That being the case, said the caller, "I have a proposition to make to you. I am offering you a job as a first-class cigar salesman. The position is a very good one, and the salary is very attractive."

Aerial Trickers—The world's aerial acrobatic champion, L. S. Skifford, 22, thrills the crowd at an air show in Gatwick, England, as he cuts a tape with the wing of his plane while flying only 15 feet from the ground.

WHAT GOES ON IN THE WORLD

PALESTINE
Some fourteen months ago Count Folke Bernadotte of Sweden said that the chances of restoring peace between the Arabs and Israelis were about 100 to 1.

But the "long shot" seems to have come off. Just recently Bernadotte's successor—Acting Mediator Ralph J. Bunche—was able to report to the Security Council that "The mission of the 30 nations was fulfilled."

This was Bunche's final Palestine report. What remains is the agreement between the Arab States and Israel covering the entire fighting front. He said that the job of negotiating a definite peace settlement should be left to the three-power—France, Turkey, and the United States—Committee at Lausanne in Switzerland.

The commission's talk with Jews and Arabs had bogged down last June over the question of returning to Israel the six or seven hundred Arab prisoners, put to flight by the Arab States.

Among the cities which still, in the face of the modern world, are hundreds of miles from the sea, it is known by its mystical name and Kipling's "The Road to India."

At the same time, the Irrawaddy is a river of scenic beauty, to the tourists it is a river of scenic beauty, to the natives it is a waterway for goods and passengers.

Now it is no intention of ours to get out the crying-jowels over Mr. Bobby Locke's golfing. . . . Bobby Locke, after winning the British Open Golf Championship last month, decided to take part in some exhibition games over there.

Now it is no intention of ours to get out the crying-jowels over Mr. Bobby Locke's golfing.

"Excuse me, sir," said a shabby talker at a City office "are you satisfied with the amount of your present life insurance?"

"You could not," "Would you invest in a good second-hand coat if you could get it cheap?"

"No!" "Just so! Would an offer to supply you with first-class imported Havana cigars at ten dollars a hundred appeal to you?"

Relative Sizes Of Sun, Earth, Moon

What is the diameter of the moon in comparison with the earth and the sun? When we see the sun and the moon in the sky, they appear to be about the same size.

"There is actually a very great difference in size between the sun and the moon. The moon is considerably smaller than the earth, the diameter of the sun is 109 times that of the earth, whereas the diameter of the moon is little more than one quarter of that of the earth."

"It is quite a chance coincidence that the ratio of the true sizes of the sun and the moon is so nearly equal to the ratio of their mean distances. It might so easily have been different; if the moon had been further from the earth than it is, it would have appeared to be smaller than the sun."

"We've tended to that," Ray said importantly. "Three days after the arrival a committee made up of leading citizens waited on the prince and extended him a formal welcome. . . ."

Has X-Ray Eyes ENGLAND, 1847

19-year-old South African student has recently caused a sensation with his "X-ray eyes" which enabled him to "see" through walls.

"What is the secret of this strange faculty? Probably very much the same power which possessed the water-diviners of old and the 'dowsers' as they are now called. . . ."

They Taste Things With Their Feet

Why do house flies get into the medicine? Because, say a couple of bug experts, they taste with their feet.

"The house fly, Frings, associate professor of zoology, and Mrs. Malah, his wife, are in intensive research that the end segments of the legs of flies taste organs. . . ."
