The Story Of Hats

There are few men who can say with truth that they have never made a joke about women's hats, which are considered fair game. But Dr. G. Willett-Cunnington can take the subject seriously. He is an expert on women's dress and recently gave an authoritative radio discourse on hats. Until the mid-sixteenth century, women's hats indicated social position; after that their chief aim was to emphasize personality. The "subtle hat language of women" demanded a vast range of materials, and Dr. Cunningion said that in the last couple their chief aim was to emphasize personality. The "subtle hat language of women" demanded a vast range of materials, and Dr. Cunnington said that in the last couple of centuries, "women have clapped or centuries, women have cuapped on their heads the contents of the botanical gardens, together with much of the zoo—flowers, vege-tables, birds, birds' nests complete tables, birds, birds' nests complete with eggs, snakes, scorpions, blue-bottles, dragon flies, cockchaiers, stuffed kittens, bits of rabbit, foxes and other beasts of prey." But in all this bewildering variety of headgear, there have been two basic types; one echoing the message of the dress, the other adding a post-

script to it.

In the middle of the sixteenth totally concealed, escaped from captivity and, ever since, has cooperated with headgear. For at least 100 years, the hair, and not the hat, was what mattered. Presing caps indoors and flat hats outide. Hair, reinforced with all manside. Hair, reinforced with all man-ner of pads and articficial tresses, mounted higher and higher until, instead of a cap, they decorated this hirsute mountain with such ornaments as a postchaise and horses of glass or a ship in full sail. Ladies wore on their heads huge edifices of fruit and flowers and a small farmyard of animals.

PATTERN-4653 12-20, 30-42 Anna Adams

"I want a classic that's interesting" is your motto! Here it is with away pockets on shirt frock, stun-ning in plain or plaids! Pattern 4653 in sizes 12, 14, 16, 18, 20; 30, 32, 34, 36, 38, 40, 42. Size

No 30, 32, 34, 36, 38, 40, 42. Size takes 434 yards 39 inch.

This pattern, easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

of lukewarm water. Combine milk

lighter than for bread.

Bake about 20 minutes in a 400-

And now, for those of you who have a "sweet tooth," here's how

By the time you read this you'll probably be so deep in your holiday tasks—and pleasures—that you won't want to bother with anything of a complicated nature. So here are a few recipes that are all fairly simple—but all good, and well worth clipping and saving if you can't get around to trying them soon.

Basting and turning occasionally. Serve on long buns. Makes four or five servings.

So many people seem to be changing from white to brown or whole wheat bread these days that perhaps it wouldn't be amiss if I passed along this recipe for:

Whole Wheat Rolls

soon.
Some call them pancakes, other griddle cakes; but no matter what name you prefer, they're mighty fine eating, especially when there's a real nip to the air. So here is

a fine basic recipe for:
Griddle Cakes
2 cups sifted all-purpose
flour. flour.
3 teaspoons baking powder
2 tablespoons sugar
1½ teaspoons salt
4 tablespoons fat
2 eggs, beaten

and rest of water and add sugar and salt. When milk solution is lukewarm, add yeast mixture. Sit white flour once and measure. Mea-sure whole wheat flour and blend 2 eggs, beaten
1½ cups milk, vary with
thickness desired
Method: Sift flour, baking powder, sugar and salt together. Cut
in the fat as for biscuit or pastry.
Combine the beaten egg with milk sure whole wheat flour and blend the two together. Add half of the flour mixture and beat thoroughly. Add shortening and blend. Add just enough of the remaining flour to make a dough that is stiff enough to knead. Knead thoroughly for 10 minutes.

Let rise in warm place (80 degrees) until double in bulk. Punch dough down and let it rise until it is double in size again; then mold into rolls. Let rise until lighter than for bread. Combine the beaten egg with milk and mix with the other ingredients just enough to moisten.

Follow manufacturer's instructions for perparing the griddle. Some are treated and require no fat. When griddle is hot, drop batter onto it from a tablespoon. Spread each cake lightly into a circle.

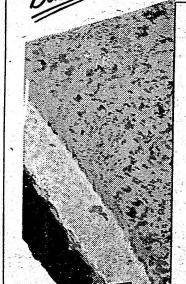

Cook on one side until puffed, iull of bubbles and cooked on the edges. Then cook on the other side. This recipe makes 10 to 12 cakes about four inches in diameter. Stack and serve with a liberal supply of butter and ielle

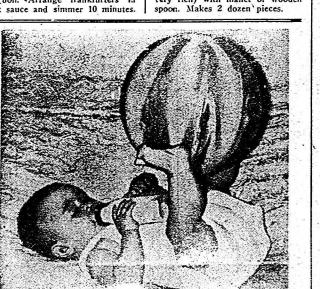

or syrup. The frankfurter—or hot dog to give it the more familiar name— has long been a standby with

to prepare a meal in a hurry. Next time you think of serving them, try them as: Barbecued Frankfurters 1 cup tomato sauce

1/4 cup vinegar
1 tablespoon bottled horse-

Method: In a large skillet or saucepan combine all ingredients except the frankfurters. Bring to a boil. Arrange frankfurters in hot sauce and simmer 10 minutes.

attention, piqued ther no end. Sh attention, piqued ther no end. She the stated a moment before making known her presence, and in that moment the feeling of being piqued gave way to torment. Suddefly she realized that something had happened, that she was dosing her hold, that Glen's interest was on the wane. Always before he had awaited her coming with eager anticipation along in his eyes. zlowing in his eyes. The thought made Vida anhappy.

WEEK LATER sitting before the living room fire, Vida abandoned seeking an answer to her problem and, for lack of something better to do, picked up the copy of Oscar Wilde and opened it. Her eye Oscar Wilde and opened it. Her eye chanced to fall on a paragraph which had been lightly checked with a pencil. She cead through it with a rapidly increasing pulse. "— I really don's see anyzing romantic in pro-It is very romantic to b in love. But there is nothing romanthe excitement is all over. The very essence of romance is uncertainty."
Vida stood up, and there was a wild look in her eyes. Glen had read that paragraph. He had checked it with his pencil. He had remembered thanher faith in books, in the printed word was profound . .

She made her way to the book case behind the fireplace. Her eyes scanned the volumes contained therein. She removed a copy of O'Brien's short stories, leafed it through, found the passage she sought, and underscored it heavily. Glen called an hour later. If he was annoyed at the long interval in the living room before Vida's appearance, he did not betray that fact. Instead he seemed deeply interested in reading a paragraph from a volume of O'Brien's short stories, which he found lying upon the table. He read it through twice before Vida's volce disturbed him. He was glad she had come. He welcomed her eagerly. He had something to say, something that could not wait. He said it incoherntly, babblingly, but plain enough for Vida to understand and nod her

& Guendoline P. Clarke Winter comes to Ontario! But definitely—and more definitely here than in some places. When the radio said it was eight above zero in Toronto, it was four below outside our front door. And I was told that during the night it had dropped to 15 below. For the 26th of November, that was cold enough.

Farlier in the week, when it was been looking forward. Many a vember day recorded in years. With what relief i set the clocks back Saturday night! You people who have been on Standard Time for the last two months—you don't know how lucky you have been! And yet it takes a little while to get adjusted, even to what you have been looking forward. Many a

in the cost of living and to

CHRONICLES

of November, that was cold enough.

Earlier in the week, when it was still mild, young John returned from Alberta, driving all the way, and made the trip in five days in his 1936 automobile. He brought a chum along with him who was going on to Montreal and the two of them slept in the car, bought their own food and cooked their own reals. What a thing it is to of them slept in the car, obought their own food and cooked their own meals. What a thing it is to be young!

For a few days, John was helping Bob with a trucking job, but the weather soon put an end to the extra, work they had in view as there was little they could get on with beyond everyday chores. So much coming and going . . the house seemed full of men—just the three of them, but there is a lot of men! They seemed to fill the kitchen when they all came in together.

O'clock. And at 6.10 Partner starts prowling around. "What are you getting up ior?" I ask "Don't forget, this is Sunday morning, plus Standard Time. You don't need to get up so early." But it didn't do any good. Partner was awake, so he had to get up. And that was that. Habit is hard to break. Remember a couple of weeks ago, I remarked it was a good idea to fit one's work to the weather? Well, I have been doing just that again. It so happened I had a quilt top finished when winter struck so suddenly, and, of course, I wasn't

gether.
Saturday morning, there was a great to-do about the cars and trucks—all of them more or less frozen, but none seriously as all-had been winterized—but not to 15 And into this cold, bleak world

She had aroused his interest by And into this cold, bleak world a calf was born—the mother, very considerately, produced her off-spring during the day, so trips to the barn during the evening, and sitting up late at night were, for once, not the least bit necessary. Partner is getting his cows very—well trained—that is the second daytime calf inside of two weeks. And then came the end of Daylight Saving Time in this district, but, ironically, we had our last day heeding the dictates of her fiction heroines. And Glen had seen the light. He had come to realize that behind the plain features of this girl were quality, intelligence,

In a word, Wida had been success ful in her enterprise up to a point. Unhappily, it appeared now as if that point might prove: a stumbling block, an unsurmountable obstacle. Coming into the living room one

evening she found him waiting for her, comfortably ensconced before the fireplace, a wolume of Oscar Wilde open in his lap. The fact that her entrance did not distract

standing specimens of young

"important and traditional overseas markets." In Canada, price influences had achieved "something approaching a balance of forces," Mr. Gardner observed. The balance, however, was precarious and could easily be tipped im either direction. The accumulated demand arising out of wartime shortages "has pretty well spent its force." Competition, efficiency, quality and salesmanship were regaining their normal place.

But the most noteworthy feature of the Canadian business trend was its relative stability, compared with developments in the United States, the president stated. Offsetting recessive influences in large part, "we have a vigorous program of industrial expansion." Geneing sel. confidence and "know-how" as an industrial nation, "we are re-discovering our own frontier" in natural resources. Canada appeared to be undergoing a dynamic growth not unlike that of the United States after World War I.

Reviews Dollar Problem

The Canada's dollar dilem-

after World War I.
Reviews Dollar Problem
Turning to Canada's dollar dilemma, Mr. Gardner saw a broad trend toward "a closer balance in trade with our nearest neighbour," and, 'almost inevitably," a contraction of exports to important and traditional yverseas markets. Pointing out that, since the devaluated rates of exchange had been established by governmental fiat, there could be no assurance that they would accurately reflect comparative costs and prices; he suggested "permitting a range of variation in exchange rates, cushioned perhaps by a stabilization fund designed to prevent violent short-term fluctuations."

Mr. Gardner affirmed the "general agreement" on the need to raise productivity in dollar-short countries but questioned whether an "addiction to nationalization of industry" would encourage the flow of domestic or international investment. He cautioned against "an exaggerated State paternalism" blur-ring the "vital connection between effort and reward." Incentives for the individual provide a vast reservoir of energy, and the great task of the present was to create an environment in which these fundamental the present was to create an envir-onment in which these fundamental forces might once more be put to
