ISSUE 9 - 1950

HOW CAN 1?

Q. How can I remove a splinte O. How can I remove a spinited inva my finger or hand?

A. Fill a bottle with really hot water; pour out the water, and then press the open neck of the bottle tightly over the splinter, holding it there for a minute or two. It will draw the splinter to the surwill draw the splinter to the sur-face where it can readily be

Q. How can I treat fruit so that it will keep longer?

A. The fruit will keep much longer than in a basket or box, if it is spread out in an airy, dry place, llowing no two pices to touch. O. How can I clean dust from

a black straw hat?

A. Instead of uting a brush, rub
the hat well with a piece of black velvet. The velvet removes the dust more completely than brush-

O. How can I clean silver? A. An excellent agent for clean A An excellent agent for cambring silver is common lump starch. Rub it on with a damp cloth, allow to stand for a few minutes, then rub dry with cheesecloth.

Q. How can I keep olicloth from sticking to the sewing-machine fcot, when it is necessary to stitch

t on the machine?

A. Sprinkle a little talcum powder over the oilcloth.

Q. How can I whiten potatoes?

A. As soon as each potato is pared, place it in cold water before boiling, and it will have a tendency to whiten it.

Q. How can I give even damp ness to table linens, when sprinkl-A. Dip half the cloth into boila. Dip hair the cloth into our-ing water. Wring as dry as pos-sible. Fold half the wet side onto the dry side, and then roll and wrap in a towel for several hours.

Q. How can I relieve the pain

* To "Lonely Daddy," your farm must seem like your only earthly refuge from this woman who has made your life so hec-A. Scrape a raw potato fine and place it over the burn. When the ecrapings become hot, renew the application, until all the heat is absorbed.

The Woods Vanished The people of the country were mostly farmers, and of these, nearly

all were dairymen. The few manu-facturers were on a small scale. except perhaps the making of oars, which were shipped all over the world from the heart of the primeval forests densely wooding the vast levels of the region. The portable steam saw mills dropped down on the borders of the woods have long since eaten their way through and through them, and devoured every stick of timber in most places, and drunk up the water courses that the woods once kept full; but at that time, half the land was in the shadow of those mighty poplars and hickories, elms and chestnuts, ashes and hemlocks; meval forests densely wooding the and chestnuts, ashes and hemlocks; and the meadows that pastured the herds of red cattle were dotted with stumps as thick as harvest stubble. Now there are not even stumps, the woods are gone, and the water courses are torrents in spring and beds of dry clay in summer. The meadows themselves have vanished, for it has been found that the strong, yellow soil will produce more in grain than in milk.—From "Years of My Youth," by William Dean Howells, Harper and Broth-

goddess Diana. As in his second missionary journey, Paul concen-trated on Corinth, so in his third, he bestowed his greatest effort on Ephesus. Nor did he labor in vain. The Holy Spirit was poured upon the group of believers who had previously been taught by Apollos. Many sick were healed and lives were changed. Among the believ ers were many who had held sill superstitions concerning a seventh son and such like. They brought their books of curious arts, valued at about \$10.000, and made a huge bonfire. Many cities today would have as large a fire if such spiritua mlightenment came to the people. The silversmiths were enraged at the success of the Gospel for the sale of images fell off. They raised saic of images fell oft. Iney raised a mob against Paul. It was similar to a mob today, "The greater part knew not wherefore they were come together." The Gospel cer-tainly proved to be a message of power during the three years' min-istry of Paul at Ephesus. In today's printed portion of Paul's letter to the Ephesians, his method of instruction is well il-

histrated. His was not a pegative

rest. Maybe when some of these

rest. Maybe when some of these new miracle drugs for arthritis are more commonly used, relief will be in sight for thousands of sufferers. I doubt if there is any disease

that causes so much misery over so long a period of time as arthritis and rheumatism, and for which there is often so little sympathy.

And I speak from personal experience, having had my share of it some years ago. Even now, just a little twinge awakens that dread within me because I know it is

just an indication that the trouble is still there, lurking like an evil

monster, ready to spring like an op-portunity presents itself.

One thing that everyone should remember in dealing with arthritis

is that there are many different types. They can, however, be di-vided roughly into two distinct classes—the type that requires rest, and the type in which muscles grad-

ually loosen up when they are used. Well, I am afraid no druggist

will ever get rich from our custom.
Of course, we do have certain
things on hand to deal with emergencies. I think everyone should
have a first aid cupboard, don't you?
And in that cupboard I think there
should be iodine, boracic, tannic

acid ointment, roller bandages, hand aid, adhesive tape, gauze, eye

cup, medicine dropper, tweezers, thermometer, aspirin, anti-acid tab-lets, magnesia, linament and cough

However, I really think if we

were living where Partner's brother

Contrary Reindeer

Laplander travel through the snow-covered wastes in light sledges driven by reindeer. And these reindeer and the Lapps are

great friends. Yet the Lapps always

carry a long stick with them. You

see, reindeer suffer from an inde-pendence complex which has to be taken into consideration. So, if the Lapp wants to go to the left

he must point with the stick to the right, and the reindeer auto-matically does the contrary.

will ever get rich from our custom

The year is speeding away. Pretty soon we shall be thinking about spring and wonder where the winter has gone—now that we have given up wondering when it is coming. Time was when we used to hope for at least an open fall—but an open winter, that was something we never thought of at all. Now we never thought of at all the course of the other than the thought of at all the thought of spring and wonder where the winter has gone—now that we have given up wondering when it is coming. Time was when we used to hope for at least an open fall—but an open winter, that was something we never thought of at all. Now we have had two open winters in succession and, no doubt, most people will agree that a few months of snow and frost are preferable to rain and mud. So much damp weather is certainly hard on persons with rheumatic aches and pains. Partner was walking the floor last night with an arm and aboulder that would not let him rest. Maybe when some of these

the wrong thing about the weather I started this column by saying we had given up looking for winter ... and now it seems to have as-rived. Yes, just like that! No sign of it when I started writing —and now a bleak, driving snow storm coming from the east.

Memorial To Boy Who Held Back Sea

In the Dutch coastal town of Haarlem, a fictional hero's statue, soon to rise on one of the city's dikes, will symbolize the very real battle which the people of the Netherlands have unceasingly wag The statue is that of the brave lad in Mary Mapes Dodge's world-famous tale, "Hans Brinker," who held back the flood waters from

Haarlem by keeping his fanger in a leak in the dike. The Eye Polder Dike of Haarlem, where the boy's figure will be placed, is one of the Netherland's oldest walls raised against the salt water, notes the National Geographic Society. It was built in the early 1600's, when the Dutch were list getting under was their were just getting under way their long-term program by which dikes, windmills, and dra nage canals were to turn swampy lowlands into productive polders, as the reclaimed tracts are called.

The rescue of land in Holland,

however, is an old story beginning at least 2,000 years ago. When Roman scholar Pliny the Elder visited this North Sea region around 50 A.D., he wrote that the natives, a marsh people known as Frisians, lived in coastal wastes protected by erude man-mace mounds. For centuries, storms and tides

of the sea intermittently devoured the water-soaked lands, villages and livestock of these people. It was probably not until deep in the Mid-dle Ages that Holland built its first real dikes, usually in the form of and clay mixed with straw. Today, dikes and other works guard millions of acres of Nether-lands soil. Destruction of the pumping system, now operated largely with steam-powered and Diesel-driven pumps instead of by much of the country. Since about a quarter of the nation's territory lies below sea level, this reclaimed and protected land represents a ma jor factor in agricultural productionand support of population.

ica's finest springtime exhibi-tion, this year's Sportsmen's Show will have hundreds of ex-

hibits of the latest sports, camp-

ing and travel equipment, boats

cars and dozens of thrilling fea-

tures and attractions.

Almost every day, according

safety specialists, people make the mistake described in this true-to-life incident, often with fatal results.

"Max, you turn the cows out. Be sure there's water in the shed tank.

sure there's water in the shed tank.

I'll get the tractor ready to grind
some feed." John Henderson issued
orders to his son as he pushed
back from the table.

"Are you out of ground grain
again already?" asked his wife.

"Those steers have already eaten

more than they're worth."

"Just don't you worry about those steers—they'll come out all right," said John, as he headed out into the brisk winter morning.

He felt fine. Always did when

he had good steeds on feed—and doing well. But he wished Jane would quit worrying about them. And about the price of feeders, or

whether the market would break.
"Max! Get those cows out" John

the machine shed door. He was getting a little peeved now. That boy always dawdled over meals.

He started the tractor and drove

out of the shed, then hopped off close to the door. That's when the

tractor died. John muttered to him-self: Wouldn't you know it? A dawdling kld, a wife who didn't trust his feeding ability, now a

balky tractor He stepped on the starter. The

gas tank, safely set out from the buildings to protect them from fire. He adjusted the throttle to keep the tractor running, then started to fill the tank

to fill the tank.

Next thing John knew, the whole

tractor was ablaze. His clothes, too.

He dropped the hose and rolled on

the ground.

That probably saved his life. He

wasn't even burned severely. But the tractor was a complete loss. John stayed alive by doing the

correct thing after the fire started.

Bat why didn't he keep the fire from starting in the first place?

Lady Baden Powell is the World
Chief Guide and as such, has the
preatest influence throughout this
world-wide movement which she
terself has reared from its start. In
a recent radio talk, she spoke of the Lady Baden Powell is the World Chief Guide and as such, has the greatest influence throughout this world-wide movement which she herself has reared from its start. In a recent radio talk, she spoke of the way in which she began her career of public service. She was untrained for organizational work of any kind, but had hardly married before she placed herself at her husband's side in the many associations to which he gave his time and energy. He had founded the Boy Scout movement in 1908, inventing this unique system of character training, and thinking out every detail of its activities and ideals. The movement was accepted and ardently taken up by thousands of boys; their sisters refused to be left behind and in 1910, the Girl Guide movement was estabam to give any special messas through this talle," she said, would like to stress that matter would like to stress that matter of the care of one's time and the danger of frittering it away with things that do not matter and are of no lasting value into the future. Let us bear in mind that as we get older, we want to look hack with great content on what we did when we were young, to be satisfied that we made the most of what we had, and that as we lived and worked and spoke, we did no unkind things and said no unkind words. The unguarded tongues that wag with even unintentional ill will need to be curbed and to give to the world their benefits and not their harm. The Guide world is large," she concluded. "You have over 2,000,000 sister Guides, and what every one Girl Guide movement was estab-lished. Guiding began in Britain because the desire for it came from the hearts of the children. They saw in it so many interesting ideas sister Guides, and what every one of you does matters and counts is The value of this great movement, was seen, after the First World War. Here was a world-wide felthe advancement of the whole mor War. Here was a world-wide tel-lowship of thousands of young people of many nations, drawn and held together by the same ideals and all caring for one another as friends. "From this small begin-ning," said Lady Baden Powell, "has come this great influence for good in international relationships and the furtherance of true under-

A news photograph shows Vice-President Alben W. Barkley sitting comfortably in the kitchen while Mrs. Barkley washes the dishes on the maid's night out. Some will notice that at the moment, the camera shutter clicked it was Mrs. Barkley who was talking and the "Veep" was doing an at-tentive and respectful job of list-

SPLITTING HEADACHE STEVED IN / RELIEVED IN A JIFFY!

Asked if tertilizer would simulate a certain plant's growth, a farmer replied: "Can't say for sure. I never been able to understand whether the stuff actually stimulates the plants or whether it's just so downright repulsive that they try to grow away from it."

ening.

Quite 2 few wives and perhaps an equal number of husbands will feel, nevertheless, that Mr. Barkley is said the Bartels.

Guide and in the Scout movement,"
said the World Chief Guide, "we
find a binding force, bestriding the
artificial barriers of race, creed and
nationality, and bringing a spirit of
friendliness and unity in a world
that said loudle for these things." nevertness, that it. Balats is getting away with something at the expense of his recent bride.

In the foreground of the picture are a couple of tea towels—hung over the back of a chair. over the back of a char.

How about it, Mr. Vice-President? We rise to a point of order.

The VP may even be a VIP, but who does he think he is that he

petrator of the famous "egg trick," but that the honor belongs to a resourceful architect who lived a little in advance of the great ex

All the other architects failed in the attempt, whereupon Brunel-leschi tapped an egg lightly upon its end and stood it up. His competitors angrily protested that any one could do the same, to which Brunelleschi rejoined, "Yes, if they had seen my mode, they would have known how to build the empola!"

given the contract to build the great edifice, and triumphantly carried out his commission. St. Peter's in Rome and St. Paul's in Lond

cupolas which had been lost since the time of the Romans. But he refused to show his model built upon its simple principles, propos-ing rather, "Let the man who can stand an egg on end on a marble base have the contract."

All the other architects failed in
