## Collision on T. & N.O. Near Haileybury Station

What might easily have proved a bad train wreck occurred a short distance north of Haileybury station on the T. and N. O. Railway on Monday morning, when train No. 47 from Toronto, bumped into a gravel train just opposite the Prospect Nursery. The passenger train was pulling out from the station and the gravel train apparently pulling in. Fortunately, No. 47 had not got up much speed and the gravel train, travelling slowly, was brought to a stop before the collision occurred. An engineer having caught sight of the passenger train rounding the curve.

Just what was the direct cause of the mix-up has not been given out. It was stated that the trains were to meet here, but apparently no one knows just why the passenger did not wait until the other got onto the siding. A freight was shunting in the yard at the time and it has been stated by eyewitnesses that it seems possible that the crew of 47 mistook her for the gravel train, as there were a great many freight cars on the sidings between the trains.

The collision resulted in some slight damage to the locomotive on 47, her pilot being dislodged. The engineer was the only one injured. He jumped and struck a rail lying beside the track, breaking a small bone in his ankle. No. 47 was held up about three-quarters of an hour until the track was cleared.

## Frame of Curling Rink Collapsed in Storm

A heavy thunder and wind storm which swept over parts of this district last Thursday evening was responsible for the destruction of considerable property in Temiskaming, including the market building and curling rink here, which was blown down with an estimated loss of \$2,500. The homes of Messrs. T. Lemon, Probyn Street, and Leo Erenhaus, Lake Shore Road, were struck by lightning, but neither of the buildings were burnt. Prompt action by Mr. Lemon's sons prevented a fire after lightning had made a hole in the tower on the house.

In New Liskeard chimneys and trees were blown over, windows were smashed by hail and gardens suffered in the worst way in years. In the Milberta, Hudson and White River areas many buildings were wrecked and the crops suffered. Cobalt was outside the path of the storm.

The hurricane left terror and destruction in its wake across Kerns and Hudson Townships. With a large number of its poles laid low by the gale, the Kerns Municipal telephone system was practically out of commission.

The following is a list of buildings known to have been demolished: T. Briscoe, house and barn; Chas. Thomas, barn, house partially wrecked; Dr. Farley, barn; Geo. Ferguson, barn; Justin Bernard, barn and sawmill; W. Whalen, barn; E. Sackrider, barn; J. Maguire, barn; T. Brown, barn; A. Jarvis, barn; A. Plaunt, barn.

(Continued on Page 4)

## Will Erect Additional Temporary Schools

The transfer of four lots on Latchford Street to the Public School Board for the purpose of erecting temporary school buildings thereon was the most important item of business transacted by the town council at a special meeting on Monday evening. As the new Public School will not be completed for probably a year the school board is up against the problem of providing additional accommodation for the coming term and four more temporary buildings will be erected. To avoid waste of time and material these will be placed on suitable building lots and will be so constructed that they may readily be converted into houses when they are no longer needed. The town having several good building lots on Latchford Street, the Council will transfer four of these to the school board at a price of \$100 each, said price to be payable when the properties are disposed of to individual purchasers when the buildings are no longer needed for school purposes, or not later than July, 1924. According to all estimates, these four buildings will, with those erected last fall, provide the required accommodation until the new school is completed.

The Council empowered the town treasurer to have insurance to the amount of \$1,000 placed on the equipment and material already on the ground for the new pumping station, and authorized the payment of \$1,000 towards the construction of the new curling rink and market which, so far is having rather a stormy career.

The petition of residents of Marcella Street, west of Rorke Avenue, for a water and sewer service, was received and the work will be proceeded with. A cement walk will be built on the north side of Browning Street and on the south side of Main Street from Rorke Avenue west, in response to petitions of residents who are property owners on the respective thoroughfares. Information from the Department of Public Works at Toronto stated that the by-laws providing for the issue of debentures to cover the cost of the new fire hall and pumping station and equipment had received the O.K. of the Department.

The purchase of the new fire truck was also approved and the order for delivery of the truck is expected to be made in about five weeks.

The Council decided to hold a Civic Holiday as usual this year and Monday, August 6th, was fixed as the date. The necessary proclamation to this effect will be issued in the near future.

This concluded the business of the meeting.

By-elections for Provincial Cabinet Ministers will be held on Monday, August 27th. Nominations will take place Thursday, August 16th.

## High School Exams. Reported This Week

Following are the names of the Haileybury High School students who have been granted credit by the Department of Education on one or more subjects of the lower school examination. Most of the credits were allowed on the recommendations of the staff, but a few were gained as a result of the examination conducted by the Department:

### Second Year Classes

Five subjects (Physiology, Arithmetic, Art, Agriculture II, Latin)—J. Beatty, R. Berry, H. Caldwell, V. Little, M. McLean, V. Post.

Four subjects (same except Latin)—M. Carswell, I. McArthur, W. Malby, B. Ross.

The following passed in subjects after their names:—J. Pritchard (his, Phys., Arith. Lat.), L. Adams (Phys., Art, Agr.), V. Blair (Art, Agr.), M. Campbell (Art), J. David (Phys., Arith. Lat.), C. Dixon (Phys., Arith.), J. Fitzmaurice (Phys., Lat.), H. Grute (Phys., Arith. Lat.), H. Horster (Phys., Art, Agr. I, II), H. Hughes (Phys., Art, Agr.), B. Johnson (Phys., Art, Bot., Agr.), D. Johnston (Phys., Arith. Lat.), A. Jones (Arith. Lat.), K. Keddie (Phys., Art, Agr.), G. Lafrange (Lat.), R. Lemon (Phys., Lat.), S. Lenton (Phys., Lat.), C. Lowery (Phys.), W. McArthur (Phys., Art, Agr.), H. McKinnon (Phys., Arith.), K. Mills (Phys., Arith. Lat.), M. Moore (Phys., Arith.), R. Murphy (Phys., Arith. Lat.), M. Murray (Art, Agr., Lat.), E. Pipe (Phys., Art, Agr., Lat.), G. Rice (Phys., Art, Agr.), M. Scanlon (Lat.), H. Scully (Phys., Lat.), M. Sullivan (Arith. Lat.), M. Young (Phys., Bot.)

### First Year Classes

Four subjects (Grammar, Canadian History, Geography, Agriculture I)—V. Bambrick, O. Bennett, L. Blair, D. Cooke, G. Cooper, E. Davis, J. Farley, C. Finlay, E. Holditch, M. Howard, C. John, E. Jordan, V. Lee, V. McKinley, A. Moore, S. Peacock, G. Peterson, H. Pipe, H. Sibley, A. Spencer, G. Spencer, E. Watts.

Two subjects (History, Geography)—E. Ansara, K. Bennett, W. Bousu, G. Clarke, E. Clarke, C. Dixon, R. Donaldson, F. Elliott, M. Gibbon, A. Graham, H. Jackson, D. John, J. Jory, H. Korpi, W. McFarlane, W. Moriarity, A. Olson, E. Provost, J. Richardson, E. Tomney, S. Vellis.

The following passed in subjects after their names: H. Hall (Geog.); R. Hamilton (Hist. Geog., Agr.); C. Hutt (Geog.); P. Johnston (Hist.); J. Little (Geog.); J. McGinley (Gram., Hist., Agr.); M. Matheson (Agr., Gram., Geog.); E. Pudden (Geog.); E. Rowe (Geog.); D. Sopha (Gram., Geog.); R. Webb (Geog.); G. Williams (Geog.).

## Little Cochrane Girl Victim of Foul Murder

One of the most revolting crimes in the history of the north Country was committed at Cochrane last week, when little Monica Forster, six-year-old daughter of T. F. Forster, a checker in the T. & N. O. yards, was assaulted and foully murdered on her way home from a neighbor's house about dusk on Tuesday evening. So far the perpetrator of the crime has not been apprehended, although both local and provincial police have been on the scene ever since and every possible clue is being followed.

The little girl had gone to the house of a neighbor only a short distance away, to play with other children and so far as can be judged, she was on her way home when the crime was committed. From all reports the murderer must have been a maniac, as no person in anything like a sane state of mind could ever commit such a heinous crime.

It is stated that public feeling in the northern town is deeply aroused and every effort is being made to capture the criminal.

Jury in the famous Delorme case failed to reach a verdict and a new trial will be held.

## Contracts Awarded for Court House, Pub. School

The Dickie Construction Company, of Toronto, have been awarded the contract of the new Haileybury Court House, which is to be erected to replace the one destroyed in the big fire last fall. The arrangements have recently been completed, but the contract price has not so far been given out.

The contract for the new Public School has also been let. The firm of Hill-Clark-Francis Limited, of New Liskeard, will erect this building. The Separate School, tenders for which were called for at the same time as the others mentioned, has not been let, but Mr. Phillips, the architect in charge of the building for the Department of Public Works, states that this will be awarded this week. Construction of the three buildings will be commenced in the near future.

Montreal, Que.—Plans for the further enlargement and extension of every feature of Montreal's harbor equipment will be given to effect as the result of a resolution by Parliament of a loan of \$10,000,000 for the Montreal Harbor Com-

**Interlocking Hollow Tile** READ THIS  
The Department of the Provincial Secretary and Professors of Queen's and Toronto Universities give the following data resulting from extensive tests made to determine the loss of heat through masonry walls.  
(1) Hollow Tiles whose air cells lie horizontally when laid in the wall have a lower heat loss per sq. foot than solid brick walls.  
(2) Hollow Tiles whose cells stand vertically when laid in the wall have a greater heat loss than solid brick walls.  
(3) Interlocking Tile walls have a 21 per cent. lower heat loss than solid brick walls and 25 per cent. lower than vertical cell tiles.  
(4) An eight inch wall of Interlocking Tile has a lower heat loss per sq. foot than an equivalent area of twelve inch wall built of tiles whose cells stand vertically in walls.
