

Banker, Editor, Mine Manager Leave Cobalt

Harry Seguin, Richard Pearce and Fraser Reid Depart for Toronto

Changes are announced in the personnel of the Imperial Bank staffs in the north, these affecting one of the oldest employees of that institution in this district. H. A. Seguin, who has been associated with the Imperial Bank in Porcupine and Cobalt since the early days of both camps, has been transferred south. For the present, Mr. Seguin has been relieving at various branches of the bank in Toronto, and subsequently it is expected he will be located in the city.

Mr. Seguin has left Cobalt and his furniture has been shipped to Toronto. He will return to spend a few holidays in the north in the course of next month. His place here is being taken by F. G. Trott of Sault Ste. Marie, who in turn, is being succeeded by Gordon Dunlop, manager of the branch at Elk Lake. This branch is to be closed it is announced. Mr. Dunlop formerly was accountant at the Cobalt branch.

Two other prominent Cobalters have left town for Toronto. F. D. Reid, general manager of the Coniagas Mining Co., an old citizen of this camp, left with his family for Toronto on Monday, where he will make his home in future. He was followed today by Richard Pearce, president of the Northern Miner.

ROTARY RAISED FUNDS TO AID IN GOOD WORK BY HOLDING BIG FAIR

The street fair, held yesterday afternoon and evening, under the auspices of the Haileybury Rotary Club, proved an enjoyable affair for the large crowd which thronged the two blocks between Main and Browning until a late hour. Threatening weather during the evening, with a little sprinkle of rain for a few minutes, scared a number of people home, but those who remained enjoyed themselves dancing, taking part in the different games and just "looking on."

The Rotarians should realize a considerable sum to aid them in their work of assisting the underprivileged children of the town, and in performing their other good acts.

The McIntyre baseball team of Schumacher, took the first game in the Temiskaming League play-offs from the Lake Shore team of Kirkland Lake at Timmins yesterday, by a score of 6-1. The winner of this best three-in-five series qualifies to meet the title holder in the Eastern Ontario Baseball League finals, to be held in Ottawa in September.

Two Weeks Off

See this popular team in one of their greatest hits.

MRS. PORTER WINS LADIES' GOLF TITLE ON TIMMINS COURSE

The annual championship meeting of the Northern Ontario Ladies' Golf Association was concluded on Saturday, having commenced last Wednesday morning.

There were many competitors from the different towns in the north, and the class of play was consequently of a high calibre. The Ferguson Cup, the principal trophy, was won by Mrs. A. S. Porter, of Timmins, and the runner-up was Miss Fay Brigham, also of Timmins. The other competitions resulted as follows:

Consolation—1, Miss Margaret Little, of Iroquois Falls; 2 Mrs. J. W. Fogg, Timmins.

First flight—1, Miss M. C. Jamieson, Timmins; 2 Mrs. J. R. Todd, Schumacher.

Second flight—1, Miss V. Torrington, Sudbury; 2, Mrs. T. J. Fee, Sudbury.

Third flight—1, Mrs. W. H. Buncke, Iroquois Falls; 2, Mrs. C. E. Hammond, North Bay.

Driving competition—Mrs. A. S. Porter, Timmins.

Approaching and putting—Miss Margaret Wood, Sudbury.

Occasional showers during the three days did not seriously interfere with the play, and the arrangements were excellently handled by Mrs. W. S. Jamieson and Mr. C. G. Kemsley, of the Timmins club.

Lors Carlson, Haileybury representative in the Ontario School athletic meet to be held in Kingston tomorrow (Friday), left on Tuesday evening for the Limestone city, accompanied by the best wishes of his school chums, who were up to the station to give him a send-off. Lors will represent Haileybury High in the mile run, and, no doubt, will give a good account of himself. He was joined at North Bay by the balance of the Northern Ontario contingent of athletes under the supervision of Coach Leo Troy.

Large Speckled Trout Captured By Fisherman In Kowkash District

Harry Overholt, of the Game and Fisheries Department of the Provincial Government, arrived in Haileybury last week, just returning from a combined business and pleasure jaunt to the Kowkash area, west of Cochrane, and had packed in ice a beautiful speckled trout, weighing 5 1/4 lbs. This beauty, which was 23 1/2 inches long, was caught in a stream above the Canadian National Railway, North and east of Lake Nipigon in the Thunder Bay District.

Mr. Overholt had wonderful success with his angling, catching quite a number of trout, none under two pounds in weight.

The Government is making a thorough investigation of the health and habits of the fish in Northern waters for the purpose of re-stocking some of the fished out streams in the older part of the Province, and the trout in the area where Mr. Overholt spent some weeks, are found to be wonderfully healthy and ideally suited for the purpose of replenishing the old trout streams.

Mr. Overholt lived at Charlton for a number of years, and has always been a keen fisherman. His family lived on the shore of Lake Erie and Harry learned a lot about fish and their moods long before coming North, and since leaving Charlton has been engaged with the Fisheries Department of the Govt., where his knowledge has been particularly useful.

Friends in town were given a look at the speckled beauty Mr. Overholt was taking home, and it surely was an eye-ful.

POISONOUS WILD FRUITS

Contrary to an impression that is rather generally held, the number of the berries and other fleshy fruits growing in our woods and fields that are poisonous is not large. The hesitancy that is ordinarily felt about partaking of any but the most fami-

liar of them is judicious, but its real warrant is not that so many dangers lurk in that quarter, but that we do not know how to recognize them. If we could only learn to distinguish between the safe and the unsafe we might dispel a lot of uneasiness.

A glance at the list of poisonous plants under investigation through the surveys of the Division of Botany, Dominion Experimental Farm, Ottawa, shows that scarcely half a dozen wild fruits of eastern Canada need to be considered dangerous. To become familiar with that number is no impossible task. In view of the fact that young children are not so discriminating about what they eat as are their elders it is indeed a duty owed to them, first to teach and warn them, and

second, to remove the danger as far as possible.

The woodland plants with fleshy fruits, that should be regarded as poisonous or highly suspicious, are the baneberries, differing little except in the red and white round shiny fruit; blue cohosh, bluish both as to foliage and fruit; moonseed, also with blue fruit, and unlike the others a climbing plant; and may apple or mandrake, with large oval fruit, nearly an inch long, borne singly in the crotch of the two umbrella-like leaves. May apple is found chiefly in old Ontario, moonseed from western Quebec to Manitoba and the others fairly generally in eastern Canada.

Along fence rows anywhere in Ontario eastward, may be seen another climbing shrub, night-

shade or bittersweet, bearing clusters of shining green, yellow to ripe scarlet berries. Another species, the black nightshade, is a smaller bushy plant appearing in gardens. The black fruit is sometimes eaten with impunity, and the plant has been "improved" into the wonderberry of gardens, but at other times has distinctly poisonous properties.

Poison ivy has also white fleshy fruits, which are not, however, apt to be eaten. Other fruits, including even the strawberry, cannot be eaten without discomfort by certain persons. Most other poisonous plants have dry fruits that do not tempt the novice.

Any High School botany contains descriptions by which the above named plants may be recognized.

3 Free Offers

To Lovers of Fine Smoking Tobacco

MACDONALD'S offer more than others—a great deal more. Note what comes free and extra with three famous brands. Get the gifts Macdonald's offer in fairness to yourself.

Gift No. 1

More Cards

MACDONALD'S BRIER is Canada's standard brand. It has always set the pace in value, as you know. Every package contains twice the cards of any other smoking tobacco at any price.

15c

Gift No. 2

Free Zig-Zag Papers

MACDONALD'S FINE CUT is the only Fine Cut which offers a free book of the famous Zig-Zag papers with each package. A card picture is also included.

15c

Gift No. 3

A 33 1/3% Saving

MACDONALD'S BRITISH CONSOLS Tobacco sells for 10 cents. That is one-third cheaper than any other tobacco of even lesser quality. You save 5 cents per package.

10c

Why Not Insist?

When you buy Smoking Tobacco why not insist on the utmost? These gifts belong to you—don't fail to get them. Demand the brands that give them. Ask your dealer for Macdonald's list of more than 100 premiums or Write to Post Office Box 306, Montreal.
