

### Tourist Enjoys Trip Up Ferguson Highway

**Writes from Timmins of Scenery and Pleasure Experienced During Motor Tour**

One tourist from Southern Ontario, who recently made a trip over the Ferguson Highway as far north as Timmins, has a good word to say for the North Country. Writing from Timmins to a friend in Lindsay, Ont., he describes the trip as follows: Dear Jack:—

"Arrived here tonight about 8.30 p.m. It was a wonderful trip—great variety of scenery and fairly good roads. It is about 500 miles. I left Lindsay at 8.30 Sunday morning arriving at Haileybury (330 miles) at about 8.00 o'clock Sunday evening. Had luncheon today with the New Liskeard Kiwanis Club and left after lunch for here. New Liskeard, Haileybury and Cobalt are only about 16 miles apart on the shores of beautiful Lake Temiskaming. You should treat yourself to this trip sometime when you want to get away from business for a change.

"Such a variety of interesting things make it most impressive. Muskoka Lakes resorts and the great hinterland to North Bay, then the Temagami Forest Reserve, which extends from North Bay to Temagami and further—about 70 miles in all—a road cut through virgin forest with not a house or a gas tank all the way. Every three or four miles the Government has cleared little spots to be used by campers, and people must not light fires elsewhere. These very often are combined with a Government operated tourist camp in the shore of a pretty lake. Temagami is a tourist centre on the lake of the same name. Latchford is a busy lumbering centre and the next place is Cobalt, the Silver City. Haileybury, a bright, up-to-date little town with paved streets and

modern buildings is a treat to the weary traveller with its modern hotel. New Liskeard is the centre of a farming district, both in Ontario and Quebec. It is only about three hours drive from there to Rouyn and Noranda. The farming section north of New Liskeard reminds one very much of Manitoba around Winnipeg. Miles and miles of farms, flat or undulating country with here and there a rocky hill bursting out of the ground just to remind us of Haliburton with winding rocky roads.

"At Kirkland Lake, the mining area starts in earnest, with Teck-Hughes, Lake Shore, Wright-Hargreaves, etc... More farming country then, but of a poorer nature, and then South Porcupine and Timmins. From my window here I can see Hollinger. McIntyre and Dome are just in the distance, so you can realize just how interesting it all is.

Yours truly,  
ARTHUR W. ALLIN."

Ike Solomon's McIntyre ball team defeated the Lake Shore nine from Kirkland Lake Tuesday for the third time, 12-5, taking the Temiskaming League championship and earning the right to meet the winners of the Eastern Ontario Baseball Association at Ottawa in September.

The Lake Shore squad were no match for the McIntyre crew, losing the first game 6-1, the second 15-1, and the final 12-5.

### Re-Elected to Council of Sovereign Great Priory

At the annual Assembly of the Sovereign Great Priory of Canada, Knights Templar, held last week in Montreal, Dr. C. W. Haentschel, of Haileybury, who is prominent in all Masonic circles, was re-elected as a member of the Grand Council. The next Assembly of the Great Priory will be held at Regina, Sask., in 1930.

### Results Obtained from Tile Drainage at Kapuskasing Farm

In a new section of country such as Northern Ontario it is often found that quite a considerable portion of the crops suffer materially from the lack of proper drainage, either by open ditches or tile.

At the Dominion Experimental Station, Kapuskasing, an experiment has been conducted for a number of years in order to compare the results from tile-drained land with land which is not tile-drained. Twenty acres of uniform clay loam soil, having some shallow muck areas in each half were selected for this test. Ten acres of this area were under-drained in 1921 while the other ten acres were kept undrained,

and the whole area is cropped similarly under a four-year rotation. The average yields per acre to date from each of the crops represented are as follows:

- Sunflowers, drained 11.85 tons, undrained 7.48.
  - Alaska Oats, drained 36.7 bus., undrained 32.4.
  - Hay, drained 1.85 tons, undrained 1.65.
- This equals a percentage increase of 36.9 for sunflowers, 11.7 for oats and 10.8 for hay.

The W.I. of Clover Valley held a clinic at the Red Cross Hospital in Haileybury last week and four children had their tonsils removed. Master Gordon and Miss Muriel Fleming and Miss Edith and Master Christopher Fernholm were the children, and Drs. Arnold and Lyon did the operating.

### Haileybury Exhibits Are Called Feature of Big Gladiolus Show

The town of Haileybury was represented at the annual show of the Canadian Gladiolus Society, held at Barrie on August 21st and 22nd, with a selection of blooms from the garden of Mr. H. G. Pickard, Latchford Street. At the show there were 100,000 blooms exhibited by 1,500 entrants, covering the territory

from Montreal on the east to Windsor on the west and Haileybury on the north.

In commenting on the show, The Toronto Star stated that the outstanding feature of the exhibits was the quality of the blooms from Northern Ontario, and particularly the exhibit from Haileybury. Mr. Pickard has not yet learned what success his blooms met with in the competition.

## PILGRIMAGE

To JESUIT MARTYRS' SHRINE, OLD FORT STE. MARIE, ONTARIO, and, CHINA MISSION COLLEGE SCARBORO

FRIDAY, AUGUST 30th

Under Distinguished Patronage of Most Rev. J. G. Forbes, D.D., Archbishop of Ottawa, Ont. Rt. Rev. D. J. Scollard, D.D., Bishop of Sault Ste Marie, Ont. Rt. Rev. P. T. Ryan, D.D., Bishop of Pembroke, Ont. Rt. Rev. L. Rheame, D.D., Bishop of Haileybury, Ont.

RETURN FARE TO MARTYRS' SHRINE To Scarboro Jct. add \$4.40

Cost of Sleeping Car Tickets additional Tickets for Scarboro good to return from Toronto, Sept. 1, 2 and 3 (Standard Time)

Train Service: Leave Haileybury, 6.01 p.m. August 30th Lv. Martyrs' Shrine, 10.00 a.m. Sept. 1 For Scarboro or Haileybury

Equipment: Sleeping Cars and latest type Colonist Coaches which may also be used overnight at Martyrs' Shrine and Scarboro Jct. for a nominal charge.

See Poster on display at C.N.Rys. Station for full details of Pilgrimage Program and Railway Service, and secure Tickets early from T. & N. O. Ry. Agent, Haileybury.

Directors: Rev. Jos. E. Gravelle, P.P., Chiswick, Ont.; Rev. D. J. Breen, P.P., Corbeil, Ont.; Rev. J. E. Marchand, P.P., Blezard Valley, Ont.; Rev. E. E. Bunyan, P.P., Callander, Ont.; Rev. H. O. Grenier, P.P., Astorville, Ont.

# Who

## gets the extra mileage -- you or friction?

Friction does not wait to take the last ten or twenty thousand miles. If the lubricant in your engine does not have sufficient body—Friction breaks thru. Wear occurs. Mileage, in terms of motor life, is lost forever.

"Use a heavier oil," you say? Not necessarily. If motor oil body is too heavy—even slightly so—Friction sets up an "oil-drag." Result: Loss of power and pick-up... Decreased efficiency and responsiveness... Gasoline mileage greatly lessened—as much as 20 per cent in some cases.

In developing the correct grade of Shell Motor Oil for every car, Shell engineers took these and many other factors into account. That is why thousands of automobile owners are finding in Shell Motor Oil that fine balance of qualities which insures proper lubrication.

Regular users of Shell Motor Oil confidently depend on it to provide ideal body throughout the full range of operating temperatures... to retain its lubricating qualities under long and grueling service... to finish the 500th mile as fit and fresh as it started the first.

Shell Motor Oil has stamina... courage... a fighting heart. It won't break down. Forming a perfect fluid seal between piston ring and cylinder wall, Shell Motor Oil helps retain power and compression—Adds improved efficiency to proper lubrication.

Shell Motor Oil is today's outstanding contribution to the science of automobile lubrication. Only Nature's richest lubricating crude forms the base of Shell. Shell-developed, low-temperature refining prepares this virgin stock for use... gives it the body and stamina which have never lost a battle to heat and friction. And before it reaches you, it must pass 259 relentless tests which check and certify the rich, unvarying quality of every quart.

That quality covers every essential—provides every one of the four requirements of complete and thorough lubrication: Ideal Body plus Low Carbon Content, Soft Carbon, and Low Pour Point.

STOP AT THE SIGN OF THE SHELL

—And let the Shell Lubrication Chart be your guide. You'll find courteous salesmen at the yellow and red service stations. Convenient everywhere.

To the man who keeps a car five years—we say: "Try Shell for 30 days"

Assure yourself of the mileage you know is in your car by providing proper and safe engine lubrication. A month's trial will show you improved performance, greater power and increased operating efficiency.

There's "GET-UP" and "GO" in 400 "Extra Dry" Shell Gasoline. Ought to cost more, but it doesn't.

P. M. FLEMING
