

Church Reports Show Year Was a Successful One

Financial Conditions Improved, Attendance Improved and Progress Made

That the past year was a very encouraging one was made clear at the annual vestry meeting of St. Paul's Church, held on Monday evening in the parish hall, Reports presented to the meeting showed that the financial position of the Church had been greatly improved, that the attendance had been higher than the preceding year and that all parochial organizations had been exceptionally successful in their work.

The report of the finance committee, presented by the treasurer, Mr. A. H. Hull, showed that the outstanding obligations of the congregation had been reduced by about two thirds from a year ago. This was accomplished chiefly by a debt reduction campaign conducted early in the year and by the splendid assistance given by the women's organizations, the Guild and the W.A. All obligations for the year had been met and the Church's position was the best since the erection of the new Church building after the fire.

In a short address to the meeting the Rector, Rev. Canon F. H. Hincks, stated that there had been an increase in membership of the Church, that the attendance at the Sunday services had been considerably greater than during the previous year and that a great majority of the children of the congregation were regular attendants at the Sunday School. The Boy Scouts troop was again active, a hockey team was entered in the Juvenile League and the young people were kept interested in the general work of the Church.

The annual reports of all the parochial organizations were presented, showing that all these had also had a busy and successful year and before the close of the meeting, a vote of thanks and appreciation was extended to Rev. Canon Hincks for his untiring efforts in behalf of the Church and the congregation.

Numerous expressions of appreciation were made of the work of the ladies of the congregation, the finance committee, the wardens, Mrs. Atkinson, the organist, Mr. Day, the choir-master, and others.

The election of officers for the year was as follows:
Rector's Warden, Mr. George

A.D.C. Serves Three Governors-General

Lieut.-Col. H. Willis O'Connor, D.S.O., A.D.C., of Ottawa, who, when the new Governor-General is announced, will have served under three of His Majesty's representatives in the Dominion. Following a distinguished war career Col. O'Connor was appointed chief A. D. C. to Lord Byng and served Viscount Willingdon in the same capacity.

Bailey; People's Warden, Mr. W. S. Gainsford, both of whom held the position during the past year. The Rector chose Messrs. George Caldbick, A. J. Peacock, E. Tottman and Leighton Maltby as Sidesmen and the following four were elected Messrs. S. Atkinson, J. T. Leishman, J. Elkins and Harry Jenkins. Mr. H. Jemmett was re-elected vestry clerk and Mr. A. H. Hull treasurer. Mr. Banwell was elected a member of the finance committee to replace Mr. M. C. H. Little. The other members of this committee are Mr. H. A. Seymour and Mr. A. H. Hull.

After some general discussion of the affairs of the parish, in which an optimistic note was prevalent, the meeting adjourned.

FAMILY DOCTOR LEARNED THIS ABOUT CONSTIPATION

Dr. Caldwell loved people. His years of practice convinced him many were ruining their health by careless selection of laxatives. He determined to write a harmless prescription which would get at the cause of constipation, and correct it.

Today, the prescription he wrote in 1885 is the world's most popular laxative! He prescribed a mixture of herbs and other pure ingredients now known as Dr. Caldwell's Syrup Pepsin, in thousands of cases where bad breath, coated tongue, gas, headaches, biliousness and lack of appetite or energy showed the bowels of men, women and children were sluggish. It proved successful in even the most obstinate cases; old folks liked it for it never gripes; children liked it for its pleasant taste. All drugstores today have Dr. Caldwell's Syrup Pepsin in bottles.

No One Need Have

Diphtheria germs, like most other disease germs, select certain parts or tissues of the body in which to settle down, grow and multiply. Diphtheria germs, for example, are usually found in the throat or nose.

It is not the germs themselves which directly injure the body and cause disease, but rather the poison or toxin which they produce. The germs remain localized in the throat and nose, but the poison which they give off is carried in the blood to all parts of the body, and so, all parts are subjected to damage by the poison coming from the germs which lie in the throat or nose.

When the body is attacked by diphtheria toxin or poison in this way, it immediately seeks to protect itself, and it does so by producing diphtheria antitoxin, to counteract or neutralize the toxin or poison produced by the diphtheria germs.

If the diphtheria antitoxin is produced quickly enough and in sufficient quantity, the body is victorious, the toxin is overcome and the patient recovers. Not only does recovery take place, but, as a result of its experience, the body is prepared, for a time at least, to prevent a recurrence of the disease. That is why second attacks of diphtheria are comparatively rare.

Unfortunately, in many cases, the body is unable to produce

Very Good News

for sore throats, quinsy, coughs, colds, bronchitis, croup, laryngitis, and tonsil sufferers. Use Sybilla Spahr's remedy, good and quick results, try it. Sold at Haileybury and New Liskeard Druggists and The Moore Drug Co., Colalt.

diphtheria antitoxin quickly enough or in the quantity required, with the result that the patient succumbs. This is what happens in about one thousand cases each year in Canada.

Fortunately, diphtheria can be prevented; protection against this disease can be gained without facing the suffering and danger of death associated with the disease.

The injection of a substance known as diphtheria toxoid stimulates the body to produce diphtheria antitoxin, and so prepares it in advance to deal with any diphtheria germs and their poisons to whose attacks the person may be exposed.

The injections of diphtheria toxoid are perfectly harmless, and they render the person receiving them immune or protected against diphtheria, just as he would have been protected by an attack of the disease, but without suffering or danger.

Parents can free themselves

from worry lest their children contract diphtheria. Lives can be saved and suffering prevented. The family physician is ready to give the necessary injections of toxoid which immunize the person who receives the injections and protects him from diphtheria. Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.
