

## High School Entrance Examination Results

Percentage of Candidates Obtaining Certificates is High Many Awarded Honors in Annual Test; Marks of the Unsuccessful Ones Being Sent by Mail

The following is the list of successful candidates in the High School Entrance Examinations for this district, as given out this week by Inspector R. A. A. McConnell. There were 366 students who wrote on the exams., of which number just over 80 per cent obtained certificates. This is just about the average, Mr. McConnell states. The names are given in alphabetical order and no clue is given as to the marks obtained, other than in the case of those awarded honors. Certificates of successful rural candidates will be sent out within the next two weeks. Those of town pupils will be put into the hands of High School Principals, unless other arrangement is desired. Marks of unsuccessful candidates are being sent directly to them.

## Oil Section of Highway Cobalt to New Liskeard

Northern Development Gives Contract for Eight Miles of Ferguson Highway

To keep down the dust, which has become a nuisance with the heavy traffic between the three towns, the Northern Development Department has undertaken the job of oiling the gravel roads between Cobalt and New Liskeard. A contract has been let to the Bituminous Spraying and Contracting Company for the work and a start was made yesterday when the stretch between Haileybury and North Cobalt was covered. Today the oiling is being done between here and New Liskeard and on Friday the section between Cobalt and North Cobalt will be completed.

The distance to be covered with the oiling process is approximately eight miles, according to W. R. Thompson, engineer in charge of this section of the highway. It will require 20,000 gallons of oil, or about 2,500 gallons per mile, and a large tank truck is being used. The material, which is technically known as "asphaltum", is sprayed onto the road surface by a pressure system and the one treatment will be sufficient for the season.

For the benefit of motorists who find that while the oil is fresh on the roadway a certain amount of it may be picked up by the cars, it is stated that a little gasoline will remove it quickly and easily from the wood or metal of the vehicles.

The traffic is particularly heavy on the stretch of highway between the three towns. A count of the motor vehicles taken at the week-end shows that on Saturday, from 7 a.m. until 11 p.m., a total of 1,340 passed a given point in North Cobalt. The number the same hours on Sunday was 1,339. The dust preventative measure will be welcomed by all drivers.

## STEEL STRUCTURE OF LANG STREET BRIDGE NEARING COMPLETION

The steel work of the new overhead bridge at the Lang Street crossing in Cobalt is now well under way, the centre span, 84 feet in length, having been placed in position last week. For the placing of the heavy girders a T.&N.O. crane was secured and the work carried out without difficulty. The approaches to the bridge from each direction are almost ready for traffic now and when the steel work is finished nothing will remain but the laying of the concrete floor.

The bridge is going to be a handsome structure, with its white cement piers of a graceful shape and the red steel upper works. It will both eliminate a particularly dangerous crossing and lend a touch of beauty which is otherwise lacking in that locality.

## ORE SHIPMENTS

Seven cars of ore were shipped from Cobalt mines during the period ending July 10th, according to the statement issued by the T.&N.O. Railway. The total weight of the shipment was 559,860 pounds. The Mining Corporation shipped four cars to Marmora, while the Nipissing shipped three to Montreal.

## The Week's Weather

|                            | Max. | Min. |
|----------------------------|------|------|
| Week ending Wed., July 15: |      |      |
| Thursday                   | 73   | 56   |
| Friday                     | 78   | 52   |
| Saturday                   | 73   | 58   |
| Sunday                     | 80   | 56   |
| Monday                     | 73   | 61   |
| Tuesday                    | 73   | 63   |
| Wednesday                  | 84   | 68   |
| Precipitation for week     | .32" |      |

NORTHERN ONTARIO  
Mostly fair and warm today and Friday; a few scattered thunder showers.

## First Report of Cochrane Riot is Exaggerated

Story of Man Killed and Others Wounded Not According to Police Statement

The reports which reached Haileybury on Tuesday morning, concerning the disturbance among the unemployed at Cochrane, were far from correct, according to a statement that day by Inspector Moore, of the Provincial Police at Cobalt. It had been reported that one man had been killed and a number taken to hospital wounded and that the riot assumed considerable proportions.

The fact that there was a disturbance and that a number of the provincial police suffered injuries led to the exaggerated reports. The statement of the Inspector is to the effect that on Monday evening some hundreds of men, who had been to the place provided for their supper, stopped in front of the town hall to take up the matter of their position with the municipal authorities. While the crowd waited on the street, a motorist attempted to drive through and the police officers, among whom was Constable Ralph Crozier, of the provincial police force, tried to clear a way for the car. In the confusion the men apparently resented the efforts of the police and the motorist to force them to stand aside and stones were thrown, some of which struck Constable Crozier on the head. His head was cut and the injuries necessitated his being taken to the hospital where some stitches were put in. The crowd dispersed without further trouble, it is stated.

The town of Cochrane has been suffering throughout the summer with numbers of men who have been attracted there by the work being carried on further north. These developments, while employing large numbers, cannot take care of nearly all those who flock in. The town has been supplying two meals a day to those who cannot take care of themselves, it is said, and they are sleeping wherever they can, many of them outside. The number in the crowd which was involved in the disturbance on Monday was estimated at 700.

## MAJOR GEO. COLE MADE COMMANDING OFFICER ALGONQUIN REGIMENT

Haileybury friends will be interested in learning that Mr. Geo. E. Cole, well known mining man and head of the Manitoba Department of Mines, has been gazetted as Lieutenant-Colonel and has been formerly appointed to command the Algonquin Regiment, succeeding Mac Lang. The announcement, as published in the Ottawa Journal on Tuesday, is as follows:

Major G. E. Cole has been promoted to the rank of Lieutenant-Colonel and to command The Algonquin Regiment, with regimental headquarters at Haileybury Ont., vice Lieutenant-Colonel M. Lang, who has been transferred to and appointed to command the 2nd (Reserve) Battalion, replacing Lieutenant-Colonel D. M. Brodie, who has been transferred to the Reserve of Officers. Lieutenant-Colonel Cole proceeded to England with the 159th Battalion, C.E.F., in October, 1916. He served in France and Belgium from December, 1917, to March 1919.

## Summer Holidays Evident at Town Council Meeting

Only a Quorum Present at Regular Session Tuesday Night and Business is Light; High School Board Asks for Walker Vacancy on Cemetery Board Left Over

When the town council met on Tuesday evening for the regular monthly session, the summer holidays were in evidence, both in the attendance and the amount of business before the meeting. Mayor Hamilton, Councillors Bell, Mrs. Houston and Gagnon made up the number and the business was concluded about 9 o'clock.

Mr. Geo. Poppleton, of the High School Board, asked the council if they would provide a sidewalk on Florence Street leading to the entrance to the new mining school and described the location of this and another necessary piece to make the surroundings proper. He said that the excavations for the new building and the grading of the street would make the place very muddy in wet weather and it was the hope of the Board that walks could be put in before the school term commenced. The council discussed with Mr. Poppleton the possibility of putting in cinder paths or wooden walks, but he did not think either would be satisfactory. About 350 feet of walk was required and the cost had been estimated by the town foreman, Jos. Police, at \$750. The shortage of finances was pointed out and, after a general discussion, it was decided to let the matter stand until the return of other members of council, when if necessary a special meeting will be called to deal with it.

Mr. Alex. Johnston, Albert St., interviewed the council in regard to a tenant who left a house of his in an unsanitary condition and he had had to pay the garbage collector for cleaning up. He could not persuade the tenant to pay him, he said, and he sought the aid of the authorities. It was held that the sanitary by-law was not quite clear and the council decided to arrange an interview with the town solicitor, Jos. A. Legris, when Mr. Johnston and the chief of police will go further into the question.

A letter from Hon. W. A. Gordon informed the council that he had taken up the question of the airport here with the Minister of Public Works and was doing all he could to press the matter, although the present struggle for economy in all departments made it difficult to get any appropriations through. Mr. Gordon also wrote in regard to the proposed ferry at the Old Mission, stating

that if the municipalities interested make a formal request to the Department of Public Works that department will call for tenders and a contract will be let. Both sides of the lake would need to join in the request, the Minister pointed out, and the council decided to apply for this service and at the same time notify the other municipalities concerned, that they may do likewise.

There was some discussion over an account for \$2,181.20 from R. J. Shannon, for gravel and crushed rock for the streets, and it was pointed out that this covered the new cemetery road, recently completed, and some of the graveling on other streets. The price was \$1.85 per yard for gravel and 85c for crushed rock. The bill was passed for payment.

In the police department it was arranged that Chief MacGirr would have his annual two weeks holidays in August, the chairman of the police committee to arrange for a substitute. The chief was also given authority, at his own request, to move the road signs on which the speed limit is set out to the outskirts of the town.

The resignation of R. Y. Campbell from the Cemetery Board was received. Mr. Campbell's reason being that he found it impossible to attend the meetings of that body. The Council decided to leave the appointment of his successor for the next meeting.

Councillor Gagnon called attention to a dangerous place on Georgina Avenue where the sidewalk across a ravine has been damaged and the protecting railing has fallen away. It was decided that temporary repairs be made to the railing and the walk left for a later decision. There was no action taken by the council on the invitation received from J. W. Curran, of Sault Ste Marie, to join in a conference on Northern Ontario municipalities at that city in August, for the purpose of forming a General Council of New Ontario.

Some general discussion on various topics concluded the meeting.

Reports to the effect that Constable Ralph Crozier, who was hurt in the disturbance at Cochrane on Monday, was dead, are not correct. Word from Cochrane this morning says that he will be out of hospital tomorrow.

## Notice re Noxious Weeds

TOWN OF HAILEYBURY

Chap. 309, Sec. 3, R.S.O. 1927—Every occupant of land, or if the land is unoccupied, the owner shall destroy all weeds designated as noxious by the regulations as often in every year as is sufficient to prevent the ripening of their seeds

JOS. POLICE, Weed Inspector
