

### School Pupils Taught Danger Of Detonators

Leaflets Distributed and Talk Given in Safety Campaign at Public School

With the intention of informing every pupil in the school, and every parent in the home, of the danger of handling detonators, Principal R. J. McClanahan, of the Haileybury Public School, is carrying on a campaign of education through the distribution of leaflets and by talks to the classes, with the object of impressing on every mind the importance of being able to recognize these small explosives, which have been the cause of many accidents. An illustration of the danger to children, when the caps are left carelessly around, was brought home to the people of Haileybury during the summer, when one boy lost a hand and others were injured as they played with a box of detonators which they had picked up at a vacant house.

A supply of illustrated leaflets has been secured and is being distributed to the pupils, with instructions to take them home and show them to their parents. These leaflets show plainly the various types of detonators commonly used and have been printed for the sole purpose of teaching people to recognize the dangerous small articles. A short talk to each class is included in Mr. McClanahan's safety campaign, in which the pupils are given a special warning of the danger to be met with should they find any of the caps lying loose.

That there is a real danger from this source, especially to children, is made evident from statistics compiled by the Explosives Division of the Department of Mines at Ottawa, and published in the form of a booklet. In this it is shown that during the past six years there have been 15 people killed from premature explosions of detonators. Of this total, 12 were children. During the same period there were 224 persons injured, more or less seriously, from the same cause. These figures do not apply to men regularly engaged in the building of explosives, but are taken from the reports of accidents.

It should be the duty of every parent to assist in the safety campaign, not only for the sake of the children but for the general good. There may be many people who do not know what a detonator looks like, and many more who have no definite knowledge of its explosive power, but the number of accidents can be reduced by education.

### New Schedule of C.N.R. Gives a Faster Service

From Montreal to Vancouver in Four Days by Eliminating Long Winnipeg Stop-over

The new schedule of the Continental Limited between Montreal and Vancouver providing faster through service to and from the Pacific Coast became effective with the departure of that train from Montreal and Toronto on the night of Friday, Sept. 30th, it was announced by C. W. Johnston, General Passenger Traffic Manager of the Canadian National Railways. The new schedule eliminates the present lay-over at Winnipeg in both directions and became effective eastbound from Vancouver on Saturday Oct. 1st. The Continental Limited leaves Montreal at 7:05 p.m. daily, the same as in the past, but reaches Winnipeg at 8:45 on the second morning out of Montreal, fifteen minutes earlier than under the former schedule. However, the lay-over at Winnipeg until 11:00 p.m. has been dispensed with and westbound passengers will continue their journey after a stop-over of thirty minutes at Winnipeg, reaching Vancouver at 9:20 a.m. on the fourth morning out of Montreal. Eastbound the train leaves Vancouver at 3:00 p.m. daily, since Oct. 1st, and reaches Winnipeg at 6:00 on the second day. In this direction also the lay-over is eliminated, and instead of remaining in Winnipeg from 8:30 in the morning until 6:20 the same evening, passengers continue their journey with only thirty minutes stop, arriving at Bonaventure station, Montreal, at 11:40 a.m. on the fourth day out of Vancouver. The connecting train westbound from Toronto leaves that city daily at 10:25 p.m., having commenced Friday, Sept. 30th and eastbound arrives at Toronto at 7:20 a.m. daily, since Wednesday, Oct. 5th.

### Radio Column

Conducted by Edgar O. Thorpe

Queries are invited and will be answered in this column

(Continued from last week)

In the year 1775, Andre Ampere, a distinguished French physicist, was born. He was noted for his researches in the field of electro-dynamics. Ampere died in the year 1836.

Great credit must be given to an American physicist named Joseph Henry. He was born in 1797 and died in 1878. He developed the electro-magnet, which had been invented by an Englishman by the name of Sturgeon, so that it became instrument of far greater power. It was through one of his experiments which established the principle now employed in modern telegraph practice. He was the first to observe magnetic self-induction and through one of his inventions made possible long distance transmission. The Henry, the unit of inductance, bears his name.

A noted British physicist, John Rayleigh, born in 1842 and died in the year 1919. He was first to detect the presence of neon in the atmosphere. His remarkable power of mathematical analysis was equalled only by his experimental proofs of his theoretical researches. Dr. Oliver Heaviside is noted for theory, propounded by himself of the existence of a permanently ionized layer in the upper atmosphere capable of deflecting electro-magnetic waves and thereby permitting round-the-world wireless communication. (to be continued.)

### QUESTIONS

Question: What is meant by A, B, C and D voltages?—M. A. J., Haileybury.

Ans.: The A voltage is the power supplied to the tubes to light their filaments. This voltage is secured from a battery or through a filament transformer connected to the A.C. line.

The B voltage is secured from a battery or output of a rectifying device.

The C voltage is the voltage impressed on the grid of the tube and may be secured the same as the voltage for the B supply.

The D voltage is the voltage used on the screen grid of a tube and may be secured the same as the B and C voltages with the use of suitable resistors.

Question: What do the letters UX and UY denote when used before the number of a tube?—L. H., Cobalt.

Ans.: This is used to tell the type of socket necessary for that particular tube. UX denotes the four-prong type and UY the five-prong one.

Question: While tuning my

radio the other night I heard a station announced as WKDT. (Could you tell me where this station is located?)—M.B., Cobalt.

Ans.: This is a police station, and is located in Detroit and uses a frequency of 1596 kilo-cycles, or about 188 meters.

(To be continued)

### Rotary Club to Hold Dance at Hotel Tomorrow Evening

The Haileybury Rotary Club will hold an informal dance at the hotel Haileybury tomorrow, Friday, evening in support of their public service funds. The music will be furnished by the "Broadway Melody Orchestra," and the patronesses of the event will be the wives of the members of the club. Particular pains is being taken to make this dance a pleasant event, as it is the intention of the Rotary Club to hold a series during the autumn, in the hope that they will be able to do even more public service in the community. The admission is \$1.25 and a buffet lunch will be served for 25 cents extra. A good time is assured.

On Sunday next, October 9th, Rt. Rev. Louis Rheume, D.D., D.C.L., will officiate at the blessing of the new Roman Catholic Church at Kirkland Lake.

### Haileybury in 1925

Items from the Files of The Haileyburian of Seven Years Ago

The marriage of Miss Violet Jane Grozelle to Mr. Alec, Clifford Mosher was quietly solemnized in St. Paul's Church here on Monday afternoon, Rev. Canon Hincks performing the ceremony.

Prime Minister MacKenzie King passed through Haileybury on Saturday last on his way to Winnipeg.

It is expected that by the beginning of next week work will be started on the new building to replace the Armories.

A delegation of residents of Brewster Street asked the town council for quick action in the provision of a roadway and sidewalk from the south end of that street to Rorke Avenue, and was told that work would start immediately.

The office of The Haileyburian has been moved from the Jory Block to new quarters on the south side of Broadway Street,

nearly opposite the new hotel.

Alex. Gillies left town on Tuesday with a party of 16 men, to open up the Howey-McNeely claims in the Red Lake district.

The local branch of the G.W. V.A. went on record at the last regular meeting against any proposed change in the date on which the celebration of Armistice Day should be held in Canada.

Names may still be added to the voters' lists being made up for the Federal election this month, the sittings of the revising officer being open until October 14th.

A partridge strayed into town on Sunday morning and was seen for an hour or two perched on the top of the Royal Bank building.

### Skin Loveliness

Easy to Have. Famous Vegetable Pills Better than Creams

Miss E. T. has proved it. She says: "Carter's Little Liver Pills will do more to keep the complexion clear than all the face creams I have used."

PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Acidity, Biliousness, Headaches and Indigestion. 25c. & 75c. red pkgs., everywhere. Ask for Carter's by NAME.

## A PRICE TO FIT THE TIMES

NOW—a tailored-to-measure TIP TOP SUIT or OVERCOAT

# \$22.50

Unexcelled quality!  
Unprecedented value!  
Unbounded satisfaction!  
Because every TIP TOP suit or overcoat is cut and tailored to your own 21 personal measurements by expert cutters and skilled craftsmen, perfect fit and complete satisfaction are absolutely guaranteed.

The Fall and Winter line of TIP TOP suitings and overcoats, which we are now showing, gives you an unrestricted choice of fine British woollens in all the latest patterns and colors.

### Here's Quick Relief

A lot of things can cause a headache or other pain, but there is one thing that will always give you relief! Just take a tablet or two of Aspirin. Your suffering ceases. Relief comes instantly, regardless of what may have been making your head throb with pain. Aspirin is harmless—cannot depress the heart. So there's no use waiting for a headache to "wear off." It is useless to endure pain of any kind when you can get Aspirin. It is a blessing to women who suffer regular systemic pain; to men who must work on, in spite of eye-strain, fatigue or neuralgia.

### Try this for Supper tonight!

#### CREAM RICE PUDDING

4 tablespoons rice 2 1/4 cups St. Charles Milk

1/2 cup sugar 1 1/2 cups water

1/2 teaspoon salt Nuts

Wash rice thoroughly, then add with the sugar and salt to the milk diluted with water. Pour into a buttered baking dish and add a sprinkling of nuts. Set the dish in a pan of hot water and bake three hours in a slow oven (300° F.), stirring several times the first hour to prevent rice from settling to bottom. This is just one of the many practical recipes from our new cook book "The Good Provider." This book tells you how you can make nearly 200 delicious dishes with St. Charles Milk. Send your name and address and the book will be mailed to you FREE.
