Wilfred Jago Victim of Shooting Accident

Wilfred Jago, well-known in hockey and baseball circles in the north, was the victim of a tragic occurrence at Rouyn on Tuesday, when he was instantly killed by the accidental discharge of a rifle. According to information reaching here, he had been examining the weapon preparatory to going on a hunting trip, and he had taken it outside of his home just before the fatal shooting happened.

The deceased was 29 years of age, and married. He was the district representative of a well-known packing house. Mrs. Fred C. Shaw, Cobalt, is a sister, and her husband went to Rouyn on Tuesday afternoon after learning of the tragedy. This is the second bereavement Mrs. Shaw has suffered within a few months, her mother having died in North Bay quite recently.

The body of the late Mr. Jago was sent to North Bay for burial, and the funeral is being held there today. Mr. Shaw returned late yesterday afternoon from Rouyn, and he was accompanied by Mrs. Jago, who survives her husband. The latter at one time played both hockey and baseball in Haileybury, and subsequently had been identified with sport in both Porcupine and Rouyn.

Public Health Nurse Was Busy For Past Month

Hundreds of School Pupils Were Inspected and Many Visits Made to Homes

Judging from a report made by Miss Gladys L. Motley, public health nurse, October was a particularly busy month in local health matters. This phase of public work is being well taken care of in Haileybury and, with the course of toxoid treatments that is now being carried on, there appears to be little to fear for the welfare of the children of the town, as long as the parents co-operate with the authorities as they are now doing.

Miss Motley's report shows that during the month she made 21 visits to the public and separate schools, and inspected a total of 421 pupils. There were sixteen treatments administered and thirteen health talks given, while in the course of the month it was found necessary to exclude three pupils from the schools. On the other hand, there were 17 readmitted, after having previously been excluded.

During the month Miss Motley visited 102 homes and dealt with 171 persons. She also made 36 infant welfare visits and 78 calls regarding school children. Four of the weekly child welfare clinics were held, the total number of children in attendance being 24-15 infants and nine of pre-school age.

In addition to all this welfare work, the Public Health Nurse assisted the Medical Officer of Health, Dr. W. C. Arnold, with the toxoid treatment given the children at the schools. Of these there were up to the present 45 public school, 84 separate school and 15 pre-school children, a total of 144.

The second treatment of toxoid was given on November 4th and the third will follow in due course, three being required to complete the series.

Traffic on Lake About Average For the Season

Steamers of Upper Ottawa Co. Towed Six Million Pieces to Temiskaming

Steamers of the Upepr Ottawa Improvement Company towed about six million pieces of timber from the head of Lake Temiskaming to the mill of the International Pulp and Paper Co., at Temiskaming, Quebec, during the summer just passed, according to W. H. Neal, of the former company, who was in Haileybury for a day or two this week. This was just about the average for the past seven or eight years and the three steamers were kept busy throughout the whole navigation period on the 85-mile run from the mouth of the Upper Ottawa at North Temiskaming to the mill at the foot of the lake.

At the present time, Mr. Neal said, there are about 150,000 pieces of timber in the boom at the foot of the Quinze River and about the same amount above the dam at the upper end of the river. These will remain there until next spring, when towing operations will be resumed.

A smaller cut than the average will be made this winter, the program calling for about 30 million feet. This is just about half of the average amount that has been taken out from the section adjacent to the Quinze for several years past, but the reduced demand for newsprint has been responsible for a slackening up in the output. Jobbers are now going in for the winter's cut, Mr. Neal said.
