As communities develop, banking services are made available to meet new and growing needs.

Banking in Canada works in such a way that your local branch manager brings you all the resources, knowledge and experience of the bank he represents. It has branches throughout Canada and provides contacts the world over. The benefits of this branch banking system, developed to meet Canadian needs, are demonstrated every day by the quality and scope of your local banking service.

"Tops in payload again!"

A General Motors Value

Yes, in every weight class Chevrolet tops the scale!

more carrying power

Chevrolet's strong and rigid frames are tougher-built to carry more payload. They're designed to take the twisting and shock of off-the-road use.

What's more, Chevrolet's axles are built to move the load safely and surely. Rear axle housings are of sturdy, single-unit tubular steel construction.

more pulling power

You get the right power for your job. Chevrolet's famous valve-in-head engines develop all the power necessary to move the load. Aluminum alloy pistons, all-weather ignition system, and full-pressure lubrication assure long, low-cost, trouble-free engine life.

And Chevrolet's valve-in-head power is teamed to the right transmission and rear axle, to move the load faster and more economically.
