D. E. SUTHERLAND, Publisher.

In Canada—\$2.00 per year, in advance. In United States—\$3.00 per year in advance. Member Canadian Weekly Newspapers Assn. Authorized as Second-Class Mail, Post Office Department, Ottawa

BED WITHOUT SUPPER

A common punishment that was inflicted before people realized the importance of food to a child's growth, was to send junior to bed without his supper as a penalty for some misdeed. Today, the average mother realizes that a child's health rather than his conscience may be affected by depriving him of necessary proteins, minerals and vitamins. Cutting out some favorite special dessert or candy may act as a corrective but in this case, the lost food values should be compensated for in the rest of his meal.

BROKEN GLASS

Broken glass or china, tossed away carelessly, may cause dangerous wounds to those who inadvertently handle it. Such pieces should never be tossed into a wastebasket or garbage container without being put into a container, wrapped and tied and then labelled as "Broken Glass"; otherwise workers handling such waste may be severely cut.

One little Haileybury youngster has become so engrossed in politics that in last week's Ontario election he asked his parents during the lunch hour who was going to get in Bob Herbert or Anthony Eden. The parents, after getting their breath, tried

to explain the difference in the two men and after a few more questions the youngster asked: "Well who is this man they call Louis Frost?"

During last week's hot days and nights most parents found it difficult to keep regular hours, and as a result it was often past nine o'clock before it was time for the nightly wash up, with one eye open and one eye closed as the "sandman" had already made his call. However without that bedtime story the day's activities were not complete. After the favorite story had been chosen and the mother began reading, she noticed the little lad almost asleep and said: "We'll finish the story tomorrow as you are asleep now and cannot hear." The little lad, wanting to hear the end of the

Department of Highways EQUIPMENT FOR SALE

Sealed tenders, clearly marked on the outside of the envelope "TENDERS for EQUIPMENT" will be received in the office of the Division Engineer, Department of Highways, Whitewood Avenue, New Liskeard, Ontario, until 12 o'clock noon, E.S.T., Thursday, June 23rd, 1955, for the following equipment:

- Frink Wing, F.R. 1025
Frink Wing, F.R. 1092
Levy & Westwood Heaters, Numbers 14-1 and 14-2
Sand Spreaders, Numbers 14-1 to 14-10
Hanson Weed Syrazer, Number 48-9
Ottawa Loader, 631M

The above equipment may be inspected at the Department of Highways Garage, Lakeshore Road, New Liskeard, Ontario, from Wednesday, June 15th, 1955, to Wednesday, June 22nd, 1955, inclusive, between 9.00 a.m. and 5.00 p.m.

All equipment on which a tender is to be submitted is to be identified by both name and number.

The lowest or any tender not necessarily accepted.

G. WETHERALL, Division Engineer. New Liskeard, Ontario June 13th, 1955

story said, "But mommy, I can hear—I've got two ears."

We often hear about all these wonderful fishing trips where the fish are so big in the lakes and streams that it takes hours and hours to get them to the boat. What happens then?

Oh, the said story "They got away." But it was a lovely fishing trip anyway. Did you ever hear of the Haileybury youngsters who go to the dock and in just a few minutes we see them going up the street with a three-pound pickerel and the most wonderful smile.

It takes TCP to get the full power from High Octane Gasoline

Cars being made today are the most powerful ever built. And with this extra power you also get extra economy—more miles per gallon.

The reason for these benefits is that today's engines are high compression engines and make more complete use of the power available in today's higher octane gasolines.

But did you know that the kind of driving most people do most of the time—local driving—can, in a short time, create a condition that offsets the extra power and economy that these engines should get from high octane gasoline.

Why? Because this kind of driving increases the build-up of certain combustion chamber deposits—the root of most power and gasoline waste. And to overcome these deposits you need a gasoline with a special kind of additive.

What happens is this:

As your engine warms up, these deposits warm up, too—glow red hot. And these glowing particles act like hot coals—ignite the gasoline mixture ahead of time... before the

pistons reach proper firing position. This is called pre-firing and means that power works against you instead of for you.

In addition, these same deposits have another power-wasting effect: They foul spark plugs, causing your engine to miss.

Engineers will tell you there's nothing more wasteful of power and gasoline than pre-firing and spark plug "miss."

But there is an answer—there's one high octane gasoline that gives you all the advantages of high octane without the power-crippling effects of these deposits—Shell Premium Gasoline with TCP*.

TCP, the Shell-developed additive, fireproofs the deposits so that they no longer cause pre-firing. No longer can they glow red hot and ignite the gasoline mixture. And TCP stops spark plug "miss," too. Your spark plugs do the job they are supposed to do.

Start getting the full power built into your engine. Get Shell Premium with TCP. It's the most powerful gasoline your car can use!

*Shell's Trademark for this unique gasoline additive developed by Shell Research. Patent applied for.

Only Shell Premium Gasoline has both TCP and High Octane!
