**Essay Contest Open
To All Scouts is
Sponsored by Bank**

Fifteen Ontario Boy Scouts will receive free trips to the World Scout Jamboree this summer, as awards in an essay contest.

Fifty Canadian Boy Scouts will be provided with an all-expense trip to the 8th World Jamboree to be held in August at Niagara-on-the-Lake, Ont. All costs of travel and of ten days at the Jamboree will be paid by The Bank of Nova Scotia for 20 winners in an essay contest on "What It Means To Be A Scout"

The essay contest, sponsored by the bank in co-operation with the Boy Scout Association, is open to some 4,200 Scouts across Canada; those eligible to attend the Jamboree. Entry forms and rules on the essay contest went forward this week to the ten provincial headquarters and to district headquarters in Ontario of The Boy Scouts.

The Scouts have until midnight June 30 to mail their essay entries to their Provincial headquarters; in Ontario to District headquarters. Winners in each province will then be picked by a three-man committee comprising representatives of The Boy Scout Association and the Bank. The 50 winners will include: two from Newfoundland; one from Prince Edward Island; four from Nova Scotia; three from New Brunswick; seven in Quebec; 15 in Ontario; four from Manitoba; three from Saskatchewan; five from Alberta and six from British Columbia.

"We are conducting this essay contest because we realize how much attendance at this Jamboree can mean to Canadian Scouts and we recognize that transportation and other costs may keep many a worthy Scout from going," said a Bank spokesman.

New Hope For Arthritic Patients

Rheumatoid or arthritic disease has plagued man since pre-historic times. Evidence of arthritic damage to bones and joints has been found in ancient Egyptian mummies and even in the skeletons of giant mammals that roamed the earth before the advent of man.

Today these diseases are the prime source of chronic illness and a leading cause of physical disability. In the United States alone they victimize more than ten million people each year. According to recent estimates, their annual toll amounts to 150 million working days lost, with a resulting loss in income exceeding one billion dollars annually.

The most commonly known forms of rheumatoid diseases are arthritis, rheumatism, gout and bursitis. Characteristic symptoms are stiffness and pain of joints and muscles. In severe cases the joints appear swollen and inflamed and the patient may be unable to leave his bed.

Because the causes for most of these conditions are still unknown a wide variety of treatments have been tried. Dramatic results have been obtained in the treatment of severe cases with hormone drugs. But possible undesirable side effects and other considerations have been found to limit the value of hormones for long-term treatment of arthritis.

The classical treatment for arthritic diseases, the salicylates (aspirin), in combination with vitamins are proving helpful. Physicians have reported that aspirin in combination with vitamin C given to rheumatism patients relieves pain, increases the feeling of well being and affords greater use of the affected joints.

One drug manufacturer is now producing a tablet called Acetycol which contains the classical ingredients of aspirin and vitamins from the B complex group and vi-

tamin C. A drug called colchicine, a specific for gout has been added. The vitamins are of therapeutic value because nutritional deficiencies are commonly found in arthritic diseases, especially in elderly patients, and colchicine because gout, not a rich man's disease as once thought, is more frequently present than had been suspected. This combination of agents relieves pain in a high proportion of patients and permits a more normal and active life. Furthermore, the inclusion of still another compound, para-aminobenzoic acid or PABA, makes it possible to achieve effective relief with lower dosages of aspirin. Until the causes and mechanisms of the rheumatoid diseases are fully understood, and drugs found which can effect cures, the medical profession continues to depend largely on this classical form of treatment to provide for the patient relief from his crippling pain.

The Royal North-West Mounted Police
(Now the Royal Canadian Mounted Police)

All the Men of the North-West Mounted
Guard our wild frontier;
Under their scarlet coats
Beat hearts devoid of fear.
Men of the Mounted,
Men of the Mounted.

They rode where few have ridden
Among wolf, bob-cat, bear,
Always their man they captured,
In action gallant and fair.
Men of the Mounted,
Men of the Mounted.
Guarding our wild frontier.

In the gold fields, on the prairies
In lumber camps, up North
They were the law, they
stood ready
To enforce and prove its worth.
Men of the Mounted,
Men of the Mounted,
Guarding our wild frontier.

Not one lone hero have we,
But oodles and scads of them.
Who could give the odds to
Davy,
And win all over again.
Men of the Mounted,
Men of the Mounted,
Guarding our wild frontier.
—Christopheros.

While Europeans first came to Canada not quite five hundred years ago, it is believed that the native Indians came into the country about fifteen thousand years ago.

SCIENCE IN YOUR LIFE

Premature Babies
One of medicine's most difficult problems is premature birth. Infants who arrive early are not actually ready to begin life in our world. They are too small, and their nervous systems are still undeveloped. Infectious diseases find them easy prey. Their feeding is difficult.

In spite of all this, doctors now have new tools with which to fight for a baby's life when standard treatment fails. When a child arrives prematurely, the doctor usually puts it into an incubator, a sealed crib with special heaters, a supply of pure oxygen and filters designed to keep out dangerous germs.

Protecting the infant from infection is the big problem. In spite of air filters, germs can still attack the child. And recent investigations show that the best way to combat the infectious invaders is with the antibiotic drugs that are effective against many different germs.

Malnutrition of the mother is being studied as a possible cause of premature birth. Preliminary studies indicate that there is danger of premature birth unless the expectant mother is getting enough vitamin E, the so-called fertility vitamin in wheat germ oil, and vitamin K, which promotes healthy blood circulation.

The laboratories have developed nutritional supplements like Obron to provide in capsule form the vitamins and minerals needed by a pregnant woman.

Much more will have to be learned by science before premature births actually can be prevented. However, their number is gradually decreasing. And when a baby does arrive before its time, today's chances of survival are much greater than they were even five years ago.

LEAVING SCHOOL?
Let's look into YOUR FUTURE

Maybe Canada's Regular Army isn't for you... but why not find out? There are dozens of opportunities for you if you're young, healthy and eager to learn. Here's only part of the story...

If you're 16, and have a Grade VIII, or better, education, how about the Canadian Army's Apprentice Plan? You'll receive thorough trades training in one of 16 trades and skilled instruction in physics, chemistry, algebra, English and other subjects. In addition you'll receive the general training of the Canadian soldier. This is combined with sports, other entertainment and generous holidays.

If you're 17, or over, you can enlist as a fully-fledged soldier in Canada's Regular Army! Here you can either take up a specific trade or follow the general training for service in a number of Army branches.

If you are from 16 to 21, have a senior matriculation or equivalent, and meet officer selection standards, you may now get a free college education while qual-

ifying for the Queen's Commission. You will receive service pay plus board and lodging, and tuition costs at college. Upon graduation you will be commissioned as a Regular Force Officer with the option of release after three years.

Isn't it worth an hour of your time to find out all about the particular career opportunity available for you? There's no obligation and it's easy to do something about it.

For full information see your Vocational Guidance Teacher or our information officer will see you at your home or at your nearest recruiting office. Just phone, write, or drop in. Now it's up to you.
