EDITORIALS

We suppose that every community has its share of sinners as well as saints. The sinners usually get more recognition as their activities seem to have a more direct impact.

Haileybury is no exception, and currently the ladies of the Canadian Legion Women's Auxiliary are more than a little mad at some of our local sinners.

It seems that the ladies had one of the latest types of can openers in the kitchen. It was the gleaming, double hinged, triple action, quadruple gadget kind that would delight any housewife's heart.

The ladies were just recovering from the shock, when they found that someone had also stolen a large and expensive fire extinguisher off the wall.

The next report of sneak thievery came in from an irate lady who suffered because she has a kind heart. It seems that she saw a little girl walking through a heavy rainstorm.

It really isn't surprising that the world is full of people who are alleged to be hard-hearted and cynical. With so many petty scoundrels around, it's surprising that anyone can afford to be kind or generous at all.

TALL TREES

One well known Haileyburian is commenting that the town is wasting its most precious asset—the view of Lake Temiskaming.

Many of the trees planted originally to beautify the town, are now so tall that the view of the lake is cut off for many residents. It might be a good idea to trim the trees down to a reasonable height that wouldn't detract from their beauty.

THE ROTARY WHEEL by Norman Abraham

Since our President is attending the Rotary conference in Peterborough, vice-president Ian MacDiarmid took over our meeting. We had one guest, Rotarian G. Huot of the Noranda-Rouyn Club. Our guest speaker was Mr. Jack Shouldice of Haileybury who spoke on the activities and achievements of the midget and juvenile fastball teams here in Haileybury.

Through the hard work of Mr. Shouldice, David Tuer, and a number of interested and helpful citizens, these teams, with the coaching they received, showed their skill in many action-filled games they played this summer, and proved that they provide the future ballplayers of Haileybury. As Mr. Shouldice stated that with the increased activity on the lone ball field in town, another field is needed which has already been acquired by Mr. Shouldice with permission to use the mining school grounds.

Speaking of financial situations, our club is short of funds, and as everyone knows of the work which this Rotary Club does in this district in helping crippled children, we will be unable to operate efficiently without these funds. Therefore we are going to provide some entertainment for you bingo fans in the Tri-Town district which we hope you will greatly support. Our bingo will be held on Tuesday, October 11 in the Canadian Legion Hall, Haileybury, at 8.30. So please hold that date open because you may win up to \$100.00. I'll be with you again next week with more news and activities which help to revolve the Rotary Wheel.

AFTER EFFECTS

Many cases of adult deafness can be traced to illnesses suffered in childhood, such as measles, whooping cough and other contagious diseases which leave weakness or impairment of various organs. Any form of ear trouble should have medical attention so that it may be treated and possible loss of hearing averted.

THE FIRE TOWER By R. L. Snow District Forester

Fires or no fires, the work of the Department must go on. Excellent progress is being made on the construction of a new tower-man's cabin for Mt. Ferguson off Lake Temagami, and the repair and renovations to the Marten River Garage are well underway. Conservation Officers have completed the construction of a new cabin at Boyce Lake for use on winter park patrols and the new access roads to the Hatchery and Twenty Minute Lake are now ready for final grading.

In addition we were called upon to take action on 2 fires. One on Lake Nipissing south of Verner burned a small area as a result of a Smoker's thoughtlessness, and one near Nipissing Junction on the C.N.R. which spread over 1/2 acre of bush from a blazing railway tank car full of fuel oil.

Just about a month ago, this Department began to solicit assistance from the public to collect tree cones. This is to report the results.

While spruce collections were, as seemed inevitable, much below the quantities desired. The crop was very light and the dry, hot weather caused the cones to ripen so rapidly that only about 15% of the target quantity was obtained. In general, the white pine crop was light also. However, some of the stands south of Mattawa bore excellent crops. Although conditions for collecting were not too favourable, this area yielded over 300 bushels. Ranger John Morin, Mattawa, deserves full credit for his splendid efforts in scouting this area for cones and in organizing and handling the collections. The co-operation of Geo. Gordon & Company Limited in picking nearly 100 bushels in Clary Township is also gratefully acknowledged.

What does this mean? Using white pine as an example, an average bushel of cones should yield approximately one pound—or about 25,000—clean seeds. Thus we should have for our use over 10,000,000 seeds. If these are sown in nursery seedbeds, we may expect (after allowing for normal loss) in excess of 5,000,000 trees for permanent planting. If used in underplanting, over 10,000 acres could be treated.

The response by the public has been very gratifying. We thank them for their help and trust that, in addition to the money they earned, they will derive satisfaction from the service rendered as depicted in the above figures.

Check Children's Eyes

"When your children return to school this fall, be sure that they are prepared to start on new work and can come with the competition that exists in our Canadian schools," G. M. Belanger, President of the Ophthalmological Association of Ontario said today.

"One of the greatest handicaps our children have is faulty vision and faulty vision can be corrected," he continued. "We can send our children to school with 'Vision Unlimited.'"

He submitted a list of symptoms that may serve to alert parents and make them aware of the child's visual problems. They are as follows: Holding a book too close to the eyes, headaches, squinting, fatigue, irritability, nervousness, aversion to reading, crossed eyes, red watering eyes, persistent inattention to close work.

"If your child was in the last third of his class last year, be sure to have a professional vision check-up before entering him in school this year," Mr. Belanger added, "A child who seems retarded in school, but who is otherwise bright may have a vision problem."

We want our children to have the best, and we are pledged to stand firmly behind the parents and teachers of our communities to see that our children's vision needs are cared for."

RED CROSS FIRST AID

Over 1300 persons were qualified in Red Cross First Aid over the last eight months it was reported today (September 23) by the Chairman, Dr. W. R. Parks, at the quarterly meeting of Ontario Division Red Cross executive committee. Classes were held for student nurses in hospitals at Toronto, Chatham Renfrew, Kingston, Belleville Sturgeon Falls, Brantford, St. Catharines, Ottawa, Port Arthur, Kitchener, Collingwood, Sarnia, Owen Sound, Pembroke Guelph, Cornwall, Hamilton, North Bay and Sudbury. During this period, six Instructors Training Courses were held in Ontario.

STRAPLESS — FLOWERLESS

Florists are worried despite Canada's postwar bloom-buying boom, reports The Financial Post. The trend to strapless evening gowns is seriously cutting corsage sales. No device will support petals on bare skin. The vigor of modern dancing makes waist corsages impractical.

Congratulations AND THE BEST OF LUCK TO JACK MATHEWS P. M. Fleming Limited are pleased to see one of their leading dealers in the Tri-Town area expand his business. We wish Jack Mathews and his staff all possible success in their new venture. While Jack is proud of his new dealership and expanding business, we feel that it reflects also the popularity and quality of Shell products. Mathews Garage is now a bigger and better garage. Its growth reflects the growth of Shell in the North. Distributors of Shell products for many years, P. M. Fleming Limited are keenly aware of the importance of intelligent, service-minded dealers. Where ever you see a Shell sign, you can be sure that it means service, and the finest quality gasoline and lubrication. P. M. FLEMING LIMITED Haileybury Ontario
