

Across the Kitchen Table

By Mrs. Mac.

The fact that many people are beginning to object to some of the so-called music that is being dished out with such a lavish hand by the various radio stations is really a good sign. It is about time that an appreciation of the better type of music is stressed.

Mind you, I am not advocating that we have a steady diet of classical numbers, or trained opera singers, (personally, I do not like opera singers,) but we could, oh, so easily do without are those caterwauling creatures who suffer from what they call love and insist on telling all and sundry, in different degrees of nasal screeches, "Baybay, I can't live without you, Baybay."

The younger generation have, or had, (I don't know how far behind the times I am,) a saying about "getting in the groove," and seems to me that much of the instrumental music that we hear over the radio has done just that. They pound along on the same note, or couple of notes, until one could scream at the monotonous racket.

More good square dance music not played so fast that it would take an electric jogger, (I don't mean "jigger") to keep time to it should be a good choice now that interest is being received in square dancing. And some of the good old fashioned waltzes, (But oh! PLEASE not that horrible "I was out on a date, I was

comin home late") I would like to hear that Rock and Roll Waltz as music without being spoiled by a voice. And by the way, can anyone tell me if there has only been one record made of it? It comes at you from all stations and always the same voice singing it.

And speaking of Rock and Roll, here's something for the teenagers to consider and their parents to remember. It's an account of dancing classes that were being held in Haileybury about twenty-five years ago, and they were darned smart dances too.

For the benefit of beginners, Classes will be held on Tuesday and Thursday evenings from 8 to 10. The following dances will be taught: Waltz, Fox Trot and One-Step, including variations as follows:

Fox Trot—The Cut Step, Two Step, Two and One, Three Slides Walk and Slide Combination, Three Slide-One Walking Step, Syncopated Steps, Waltz Steps, One Step—Cut Step, Rocking Step, Waltz, College Rock, Rock and Change, The Lift.

I read an appealing little story this week about an old mother who had suffered a stroke and was taken to the hospital. When her sons visited her there they knew that she was worried about something. Finally she made them understand that there were cookies in the crock, meat cooked, and fruit down cellar and she wanted them to go to their old home and eat, as they had done when they were lads at home.

It brought the tears to my eyes because it reminded me so strongly of my own mother whose chief worry during her last illness was that she wasn't able to keep her cookie box filled.

In these days of hurry and scurry, it seems that there is never enough time to do the things one wants to do, after one finishes the things that must be done.

But no matter how tired you are, if you can take a few minutes before going to bed, to just sit and remember some of the nice things that have hapened in your life, (and when you start counting them, there can be a great many,) it will give you a rested feeling.

During the summer, I always sit for a few minutes in the sun porch, where I can see the lights of the town and the glitter of the moon on the lake, or the reflection of the car lights on the lake.

In the winter, anyone who is fortunate enough to have a fire (place and I hope to have one before next winter) can relax in front of it, (watching the flickering flames.

Lands And Forests Wild Life Survey

Executive Report of The Temiskaming Game and Fish Protective Association For 1956

The executive held four meetings in the past year. The minutes for these meetings having been read this report will cover some of the work done in connection with the meetings held.

On the project to clean up Spring Creek, the road from the West road of Haileybury into the Creek was graded, with our thanks going to Mr. Archie McLean. A bridge was built crossing the Creek at the end of the road, and dams were opened to lower the water enabling fishing from the banks. I may add this project will receive more attention this year with full co-operation obtained from the Department of Lands and Forest to remove the dams and beaver from the Creek entirely. This work will commence after May 21st. when trappers now working on the Creek will be finished operations.

We discussed the probabilities of poisoning Belle Isle Lake, also had the district biologist survey the waters. Our finding were that the cost of poison to do the job, and labour involved were too great. We therefore left this problem for further consideration.

In regards to surveys on proposed lakes in this district for the purpose of restocking or introducing new species of fish with the over load placed on our district biologist making it impossible to examine all lakes in the territory, we have been asked to participating in the using of Creel Census cards. These cards will enable the Department to see what conditions exist on our streams and lakes. In con-

nection with this we have obtained a supply of cards for distribution to the members. We also had boxes made which will be located at Spring Creek -Pike Creek and -Mowat Lake which contain cards. You are asked to fill in the information requested on your card and deposit them in the boxes or turn them over your executive. These will then be given to the Department thereby enabling them to take what action they deem necessary to better the fishing in the waters reported on. Your full co-operation is requested on this project.

Last fall your Club sponsored the rabies inoculation clinic of the district of Haileybury through to Latchford for the prevention of the rabies disease spreading in this zone. We wish to report the clinic was a success with the inoculations of 46 smaller dogs. We wish to express our thanks to the Haileyburian Office for their support and Mr. Ron Carmichael for his services in this matter.

We discussed the probabilities of purchasing Reide Lake in the Cobalt area, and immediate property for the purpose of erecting a Club house, and the poisoning of the water and restocking with trout for membership use. The figures obtained of \$4000.00 for property was decided as being too high. Although it is felt this project of a Club building should receive more attention.

We made a request to the Department of Lands and Forest for the introduction of new species of fish for this district. They reported that Pine Lake will receive their attention this year with the probable stocking of Kamloops trout in this water.

We received the question of reopening Sasaginaga and Clear Lakes in the Cobalt area if possible, and if not of then netting out the game fish there and moving these to others waters.

It was found that it was impractical to move these fish. We made a survey of records existing and found the lakes have been closed on the authority of the Department Of Health, and was impossible to open the waters for general purposes at this time.

With the problem of having more lakes in the district stocked with other types of fish we would invite the members to submit to your executive the names of these suggested waters. Giving all the information you can in regards to type of fish existing there, name and location of the lake. This will be an opportunity to use your Creel Census cards along with all other information available.

With this information we can then take some action in following up these recommendations. I may add that a survey is now planned to look into two lakes in the Lorraine district this year. In regards to stocking done last year a sheet will be passed out covering this

work. At our last meeting there was considerable discussion covering activities for this year in connection with biological surveys, stocking and increased stocking with Department officials from North Bay; the outcome of this we are unable to report on as this work is not yet in progress.

This would therefore cover the highlights of the activities of your executive for the past year. In closing we would like to again express our thanks to the Department officials from North Bay, our local conservation officer Mr. Ed. Mantle, and to the members for the work we were able to perform for the past year.

Wilfred Bailey who is connected with the Great West Life Insurance company, won the award offered by his company to their agents for the greatest volume of business during a stated time. The area covered extended from Sudbury and the Soo to Cochrane.
