# THEY PAY NO TAXES

A "CORPORATION TAX" is not a tax on the corporation, but is rather, a tax on the customers who buy the goods or services it produces.

Taxes are a cost of doing business. They must be included in the price structure along with wages, and the costs of raw materials and supplies.

An increase in corporation taxes, or in any other taxes, is an increase in costs which must ultimately be reflected in prices. Hence, a decrease in corporation or other taxes would ease the upward pressure on costs and prices.
