

# FIGHT FIRE

## IN COBALT

Cobalt is protected by a volunteer brigade, but the volunteers can only protect you if you co-operate. During the next week the volunteers will be making inspections of business and residential premises. Please co-operate with them, and carry out their suggestions for making your home a safer place in which to live.

The volunteers give up a great deal of their time to learning how to fight fires. The town spends a great deal of money each year on equipment, and maintaining a 24 hour service at the fire hall. But in the final analysis, the safety of your home and your business depends on YOU.
