Hotel Haileybury

Anti-Freeze Time Is Here

It pays to protect your car

MODERN high compression engines, like the one in your car, need a premium motor oil. A thermostatic motor oil that adjusts automatically to protect against destructive temperature changes. New Shell X-100 Motor Oil Premium is the thermostatic motor oil—actually 3 grades of oil in one. It's light and free-flowing for easy starts. It's a medium oil for "around town" everyday driving. And it's a super-tough rugged duty oil for sustained high speed driving. Your car is a costly investment. Give it the protection it needs... have us drain and refill with new Shell X-100 Motor Oil Premium next time you call in.

WHO SPENDS?

WHEN new federal buildings, or new highways with elaborate cloverleaves, or new city halls are constructed, they must be built with the taxpayers' money.

Very often such expenditures are enthusiastically approved, because each of us seems to think it is some other person's tax money which is being spent so lavishly.

Canadians can help themselves, and the men and women they have elected to office, only if they remember that governments have no funds except the taxes they take from each of us.
