The SHEFFIELD B4007
High Fidelity Console Television
24" Diagonal Measure
332 Square Inches of Rectangular Picture Area

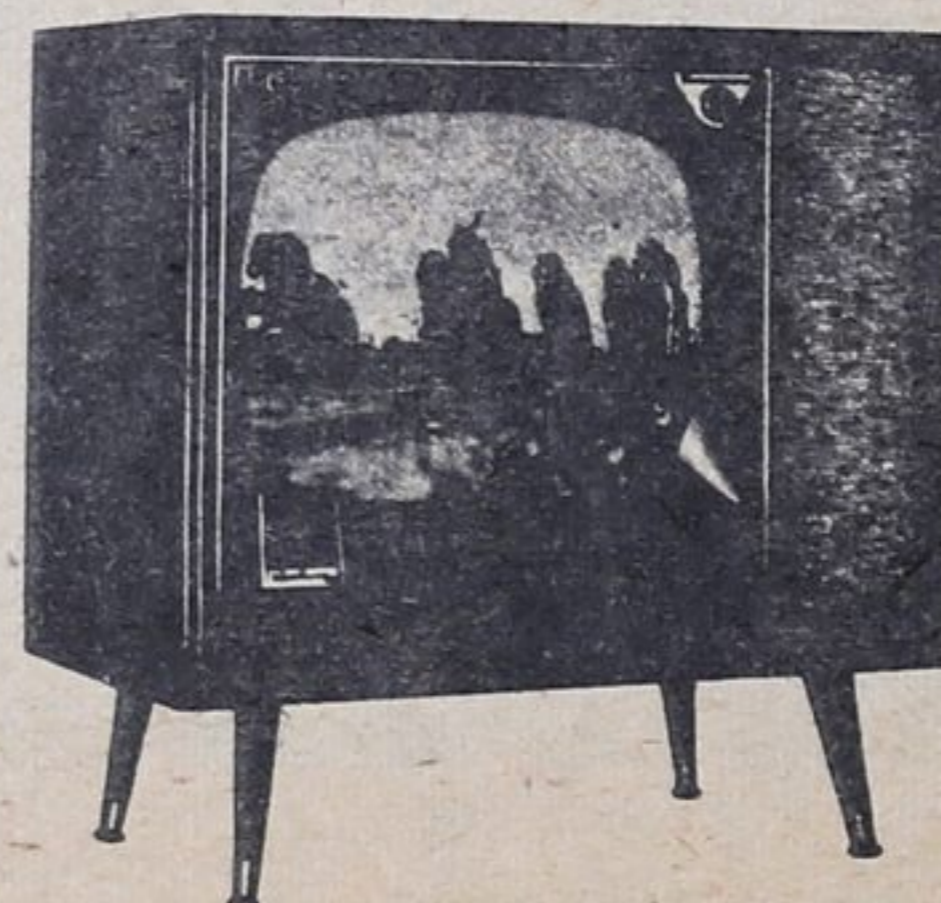

BATED BEST
of small transistor pocket radios tested by leading independent testing laboratory

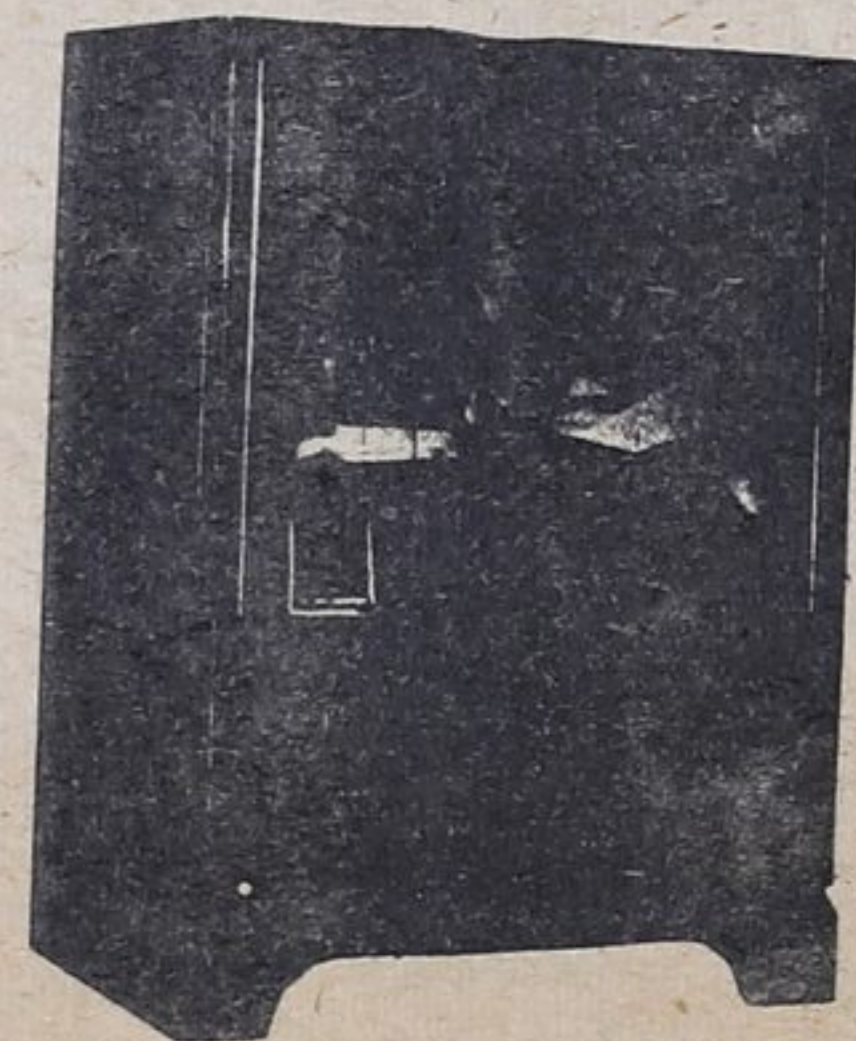

THERE'S NOTHING BETWEEN YOU AND THE SET BUT SPACE. NO WIRES, NO CORDS, NO BATTERIES.

Just touch a button on the Space Command Unit to tune TV from anywhere in the room! Erases the irritation of jumping up and down to change channels, adjust volume, or turn set on and off. Without leaving your easy chair, you can channelhop to your heart's content, choose any of three levels of sound, or turn off the sound while the picture stays on. Not an extra cost accessory... it's built right into the set. Once you try it, you'll agree—Space Command is the greatest relaxer in TV history!

The CLARIDGE B3006

9 TRANSISTORS—These tiny miracles of the electronic age eliminate the need for bulky tubes. The 9 transistors develop 500 milliwatts of *undistorted* power output to give the new Zenith all-transistor Trans-Oceanic portable 92% more undistorted output than any tube type short wave portable for the world's finest radio listening.

8 WAVE BANDS—This new Trans-Oceanic radio is powered to tune in countries of the world which broadcast International Short Wave. The 8 wave bands pick up International Short Wave Broadcasts, Marine and Weather Broadcasts, Amateur Broadcasts, Ship-to-Shore, Ship-to-Ship reception plus the fine programs on Standard Broadcast.
