HOW TO LIVE WELL

CANADA'S manufacturing industry began to grow significantly about 80 years ago when the people decided that more of their needs should be provided from Canadian factories.

Today manufacturing is the most important element in the Canadian economy. It provides nearly half of all employment; it pays high taxes; and it is the greatest contributor to our national production.

Manufacturing will continue to provide Canadians with the world's second highest standard of living if the people of Canada will buy Canadian.
