

Driver Education in Ontario's high schools, which has been increasing steadily during the past four years, is expected to develop rapidly in future in view of the Government's additional encouragement for the program, announced in the last Speech from the Throne. Twenty one high school teachers, and two Department of Transport officers have just compiled a 2-week teacher preparation course in High School Driver Education, conducted by the Ontario Safety League, in Toronto. Picture shows Gerald Mino from Cobalt High School taking a skill test and being checked by fellow students (left to right: Edward Kohlman, Perth; Clinton Haist, Saltfleet; Roy Steckley, Preston; Mary Martin, Ontario Department of Transport, Safety Branch.

Bird Banded By Local Bird Watcher

Around the end of April, 1959, Mr. Sam Craig, Haileybury, picked up in his garden a dead Evening Grosbeak. These birds left the district about a week later for the north. They summer in spruce forests between Souix Lookout and Red Lake.

Mr. Craig noticing a band on the bird's leg had it sent to Washington for identification.

A reply from the Wild Life Service, Laurel, Maryland, U.S.A., dated June 30, 1959, was as follows:

Evening Grosbeak, banded at New Liskeard, Ontario, February 26, 1959, by Mr. T. J. Anderson, New Liskeard.

Mr. Anderson has kept his interest in birds for many years, and his garden is a town sanctuary for them.

Four Minor Teams In Ball Loop

Those wanting to see some good baseball attend the games on Monday and Thursday evenings at the Mining School, when the Pee Wees battle it out.

Games are at six-thirty.

There are four teams, called the Rotary, with John Valentine in

charge; Elks, under leadership of Bill Fleming; Legion, with Ernie St. Louie in charge, and Dodgers, with Lorne Umphrey as their captain. Jack Shouldice and Jack Walker are always on hand to lend assistance and help when needed.

The results of the games so far and standing of the teams are:
 Dodgers won 3 lost 2
 Legion won 0 lost 5
 Rotary won 4 lost 1
 Elks won 3 lost 2

See you at the ball games. Come

out and lend your support to the future big leaguers.

MOUNTAIN'S HEIGHT

Is it possible for a mountain to vary in height? Yes, it is. Mount Vesuvius' height is affected by the volcanic eruptions for which it is famous; the average is about 41,000 feet. Probably the best-known eruption was that of 79 A.D., when Pompeii and Herculaneum were buried under showers of pumice stone and volcanic ash.

The Weather

Week Ending July 14th, 1959

	Max.	Min.
Wednesday	88	62
Thursday	83	70
Friday	80	60
Saturday	79	59
Sunday	71	57
Monday	76	58
Tuesday	82	57

Average for July to date 68 degrees.

Exports from Japan to Canada of wearing apparel increased from \$1.2 million to \$12.1 million between 1953 and 1958.
