The Haileyburian Page 7

Deer Horn Mines Milling Operation

The Cobalt area's newest silver producer, Deer Horn Mines, had a satisfactory first month of mill tune-up operation. Operations are running smoothly.

In the period June 2-30, the mill handled a total of 2,489 tons (an average of 86 tons daily) and produced 74,511 ozs. of silver.

Along with this output the company shipped a ton of high grade containing about 7,000 ozs., bringing total output for the period to 81,511 ozs.

Mill heads averaged 30.7 ozs. per ton while recovery was particularly good at better than 97%.

Estimated net smelter return for the period is placed at \$61,000. Metal settlements receivable now total about \$100,000.

The mill rate in the first few days of July has been maintained at 85-90 tons per day. However, heads have been slightly higher than those for June.

In June, about 60% of mill feed was obtained from preliminary underground stoping operations while the balance was derived from surface stockpile. In July, a larger portion has been secured directly from underground.

Ore broken during June was slightly more than tonnage milled. Bulk of the underground feed is coming from the 270-ft. level, a sub-level 40 ft. below the 270-ft. horizon, and from the 525-ft. level.

CAR BUYERS

Before you buy your new or late model used car see us about our Low Cost Financing Service. Available for either Dealer or Private Sales.
