Tight Squeeze

Bud Wynn of New Liskeard was the victim of a freak accident last week when his car was squeezed between a transport and hydro pole at the corner of Lake Shore Road and Whitewood.

The accident occurred when the transport swung wide to negotiate the sharp corner, and the driver failed to notice the Wynn car at his right.

The rear wheels of the carrier caught the front left fender of the car, and did about \$200 worth of damage. Mr. Wynn was startled but unhurt.

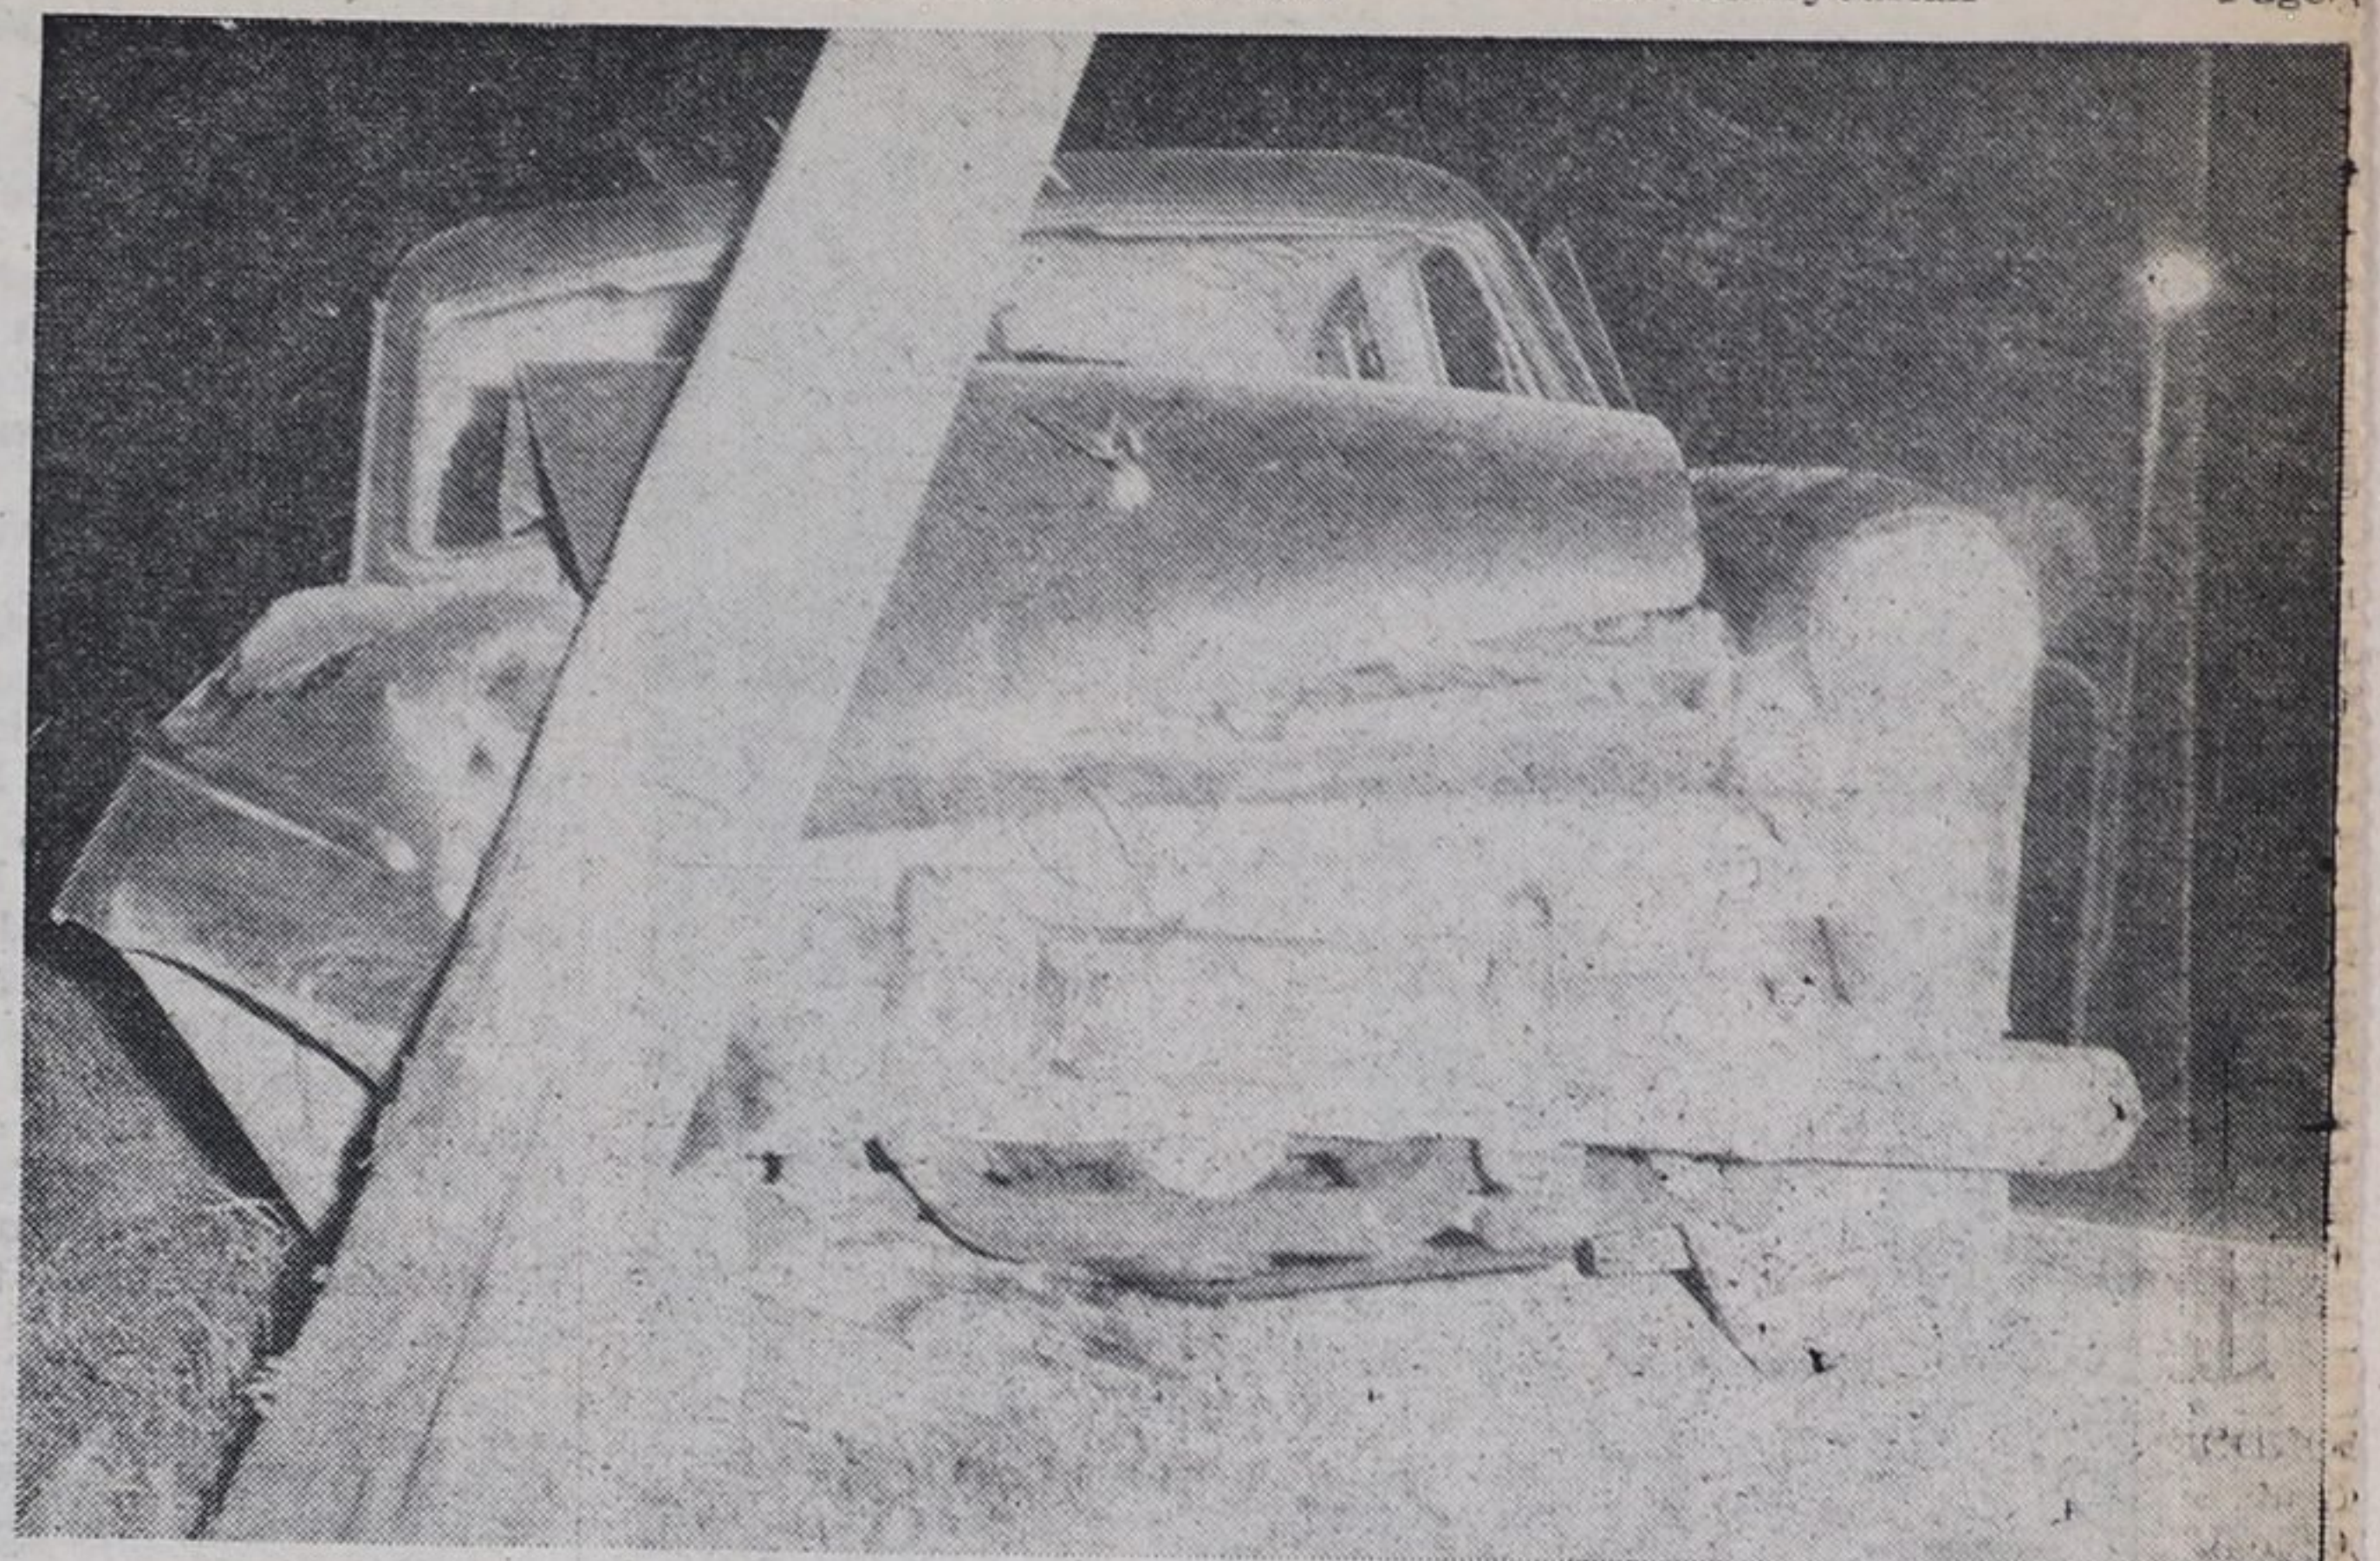

Postal Convention Changes Rates

Postmaster General William Hamilton reminded Canadian mailers that recently-announced convention governing the postal service between Canada and the United States came into effect on July 1, 1961. Under the new convention, there were changes in parcel post and newspaper rates from Canada to the United States, and an increase in registration indemnity for articles posted in Canada and destined for the United States.

Postmaster General Hamilton, in reminding the mailing public of the changes, pointed out that under the new agreement the weight limit on parcels mailed in Canada to the United States had been increased from 15 pounds to 25 pounds and that the maximum indemnity for the loss of a registered article mailed in Canada to the United States has been raised from \$25.00 to \$100.00.

Under the new rate, Canadian parcels mailed to the United States will require postage ranging from 40 cents for a one-pound parcel to \$4.00 for a 25-pound package. Registration fees on mail for the United States will now be identical with domestic rates, ranging from \$.20 for a maximum indemnity of \$25.00 to \$.40 for a maximum indemnity of \$100.00.

Mr. Hamilton noted that the United States administration had recently announced increases in rates governing printed matter, samples, registration fees and parcel post on items mailed in the United States for Canada.

Blinded by the lights of an oncoming car, Oscar Arsenault, RR 2, New Liskeard, missed the sharp turn at the north end of New Liskeard and piled into a hydro pole. Mr. Arsenault suffered minor injuries, but the car was damaged to the extent of an estimated \$375.00. The accident was investigated by Constables W. Blackburn and D. Fowler of the New Liskeard OPP detachment.

Skin Diver at Twin Hooks Large Bass

The catching of fish is a challenge to any red-blooded northerner, and the methods and lures are as diverse as it is possible for the imagination of man to make them.

Pickeral are taken by casting, trolling and still fishing, and in the bad old days some used nets or a spot or two of dynamiting. There were even a few of the more wily ones who found liming profitable and efficient.

At one time spearing was a popular and legal method of obtaining a catch, and was used locally during sucker runs, and at coastal points for salmon.

But always there was the trouble of locating the fish, and many a person has spent hours of his time fishing diligently where the fish ain't.

John McKee is one of the summer residents at Twin Lakes who decided many years ago that the lake didn't have a worthwhile fish population, and proved it by leaving his rod and bait in the cottage

gathering dust.

Now he is wondering.

Last week he was telling a visitor about the dearth of fish in Twin, and advising him to get some fun swimming or skin diving.

The visitor took off to explore the watery bottom of the lake, and shortly returned and reported seeing a four pound bass sheltering under an undercut bank.

The same visitor went to the cottage and came back with about three feet of line, a hook and a large squirming worm, and slid quietly under the water in the direction of the bass.

He returned later with the bass, a big one, and reported that the fish had watched his approach without comment, and then snatched viciously at the worm as it dangled in front of his nose.

Mine-Mill Union At Rix-Athabaska

The Mine, Mill and Smelter Workers Union has been certified as the bargaining agent at the Rix Athabaska Mine near Cobalt, Peter Mongeon, local representative for the union, said he has received word from the Ontario Labor Relations Board of the union's certification.

A vote was held recently at the mine between Mine-Mill and the United Steel Workers' Union. Mine-Mill was reported to have won the vote but the steel workers protested the decision to the labor board.

"It is another victory for Mine-Mill and I am very happy about it," Mr. Mongeon said. Mine-Mill now is the bargaining agent at the Rix-Athabaska, Deer Horn and Temagami Mines. Rix-Athabaska is currently involved in an extensive exploration and development program. About 15 men are employed there.
