ESTABLISHED 1904

Vol. 57 — No. 28

Haileybury, Ontario, Thursday, September 14, 1961

5c COPY

Formal Opening

Monday, September 25th will be a gala day for Haileybury when Hon. Keillor MacKay, Lieutenant-Governor of Ontario will be present with other special guests to formally open the new Haileybury High School.

If the weather is fine the invited guests, general public and school children, will assemble at 10:45 a.m. at the new building for the opening ceremonies which include the arrival of the Lieutenant-Governor's party, the introduction of guests, an address by the Lieutenant-Governor, formal opening and inspection of the building, and the presentation of a new flag to the Board of Education by the Regent of the Haileybury Chapter of the IODE.

In case of rain, the preliminary ceremonies will be held in the Armouries before going to the school for the actual opening.

Counterfeit Bill In Haileybury

Constable Roy Feeley of Haileybury has announced that a ten dollar counterfeit bill with the serial number Y-D 0352227 with a front plate number 34, and a back plate number 32, has been passed in a local business establishment. It is one of a new series of counterfeits which appeared in Montreal on August 22 and is similar to the Can-005 series.

It is now in the hands of the Kirkland Lake detachment of the RCMP and citizens of the Tri-Town area are asked to be on the alert for any bills with similar numbers.

Guest Speaker

R. Miller, Principal of Cobalt High School announced this week that Commencement Exercises for the school will be held in the Community Hall on Friday, September 15.

Guest speaker for the occasion will be Elmer W. Sopha, M.P.P. for Sudbury, who, not so long ago was a student at the Silvertown's High School.

Modern Bowling Lanes To Open October 7th

Ernie Maddock, manager for the new eight-lane bowling alley taking shape a mile north of New Liskeard is bustling around these days lining up leagues from the Tri-town, Elk Lake, Englehart and Quebec areas.

Mr. Maddock said that when the building program is complete this district will have one of the most modern plants in the province.

The name of the new project is "Happy Lanes" and the equipment being installed is the most modern that money can buy. The building has been made large enough to accommodate an additional four lanes if the demand is sufficient.

The building is being erected by Hill-Clark-Francis Ltd., Sudbury, and there is hope that the equipment will be installed and ready for use by October 7.

There will be parking accommodation for about 80 cars in the grounds around the building, and inside accommodation includes a committee room, dressing and powder room, a nursery for the babies of bowling mothers.

Northern Ontario Natural Gas company performed a major operation on feed lines into Haileybury, rerouting the line and placing a protective casing around the main where it will pass under the Tri-town bypass. Division engineer Bob Snyder, in charge of the project, District Sales manager Bud Wynn and salesman Bob Hinds look over the giant stopper valve used in the operation.

Increased Activity in Cobalt Camp Sparked by Hike in Silver Prices

The modest boom which started in the Cobalt silver camp earlier this year is continuing, and encouraging reports are coming from all sides as old mines are re-opened and new ones near production.

Mentor Exploration and Development Co. started actual shaft sinking operations at its Sycee silver group in the Cobalt area last week.

Preparation work towards the shaft program was begun in late

July, President D. Denny told the recent annual meeting. Since then the opening has been collared up to 30 ft. and a concrete collar poured, a hoist house built and a hoist installed, a headframe erected and other surface plant provided.

Sinking to the 400-ft. horizon is expected to be completed by about mid-October. Cross cutting will then be carried out.

Agnico Mines is planning to start work shortly on its Brady Lake property, recently leased from Silver-Miller Mines. The Brady Lake group adjoins Agnico's main Christopher property.

Agnico has agreed to spend at least \$50,000 in development and exploration of the Brady Lake property by August 31, 1963.

Agnico is continuing work on both its Violet and Ibsen property. At the Ibsen, drilling of long holes to investigate a potential area is being continued. A total of two holes has been completed so far and though no ore values were encountered, geology and structure appears quite favourable, it is gathered from an official. Drilling of a third hole has been started.

Unwatering operations are being continued at the Violet property where an intensive exploration program is planned. In addition to freeing the Violet workings, which extend to the 690-ft. horizon, the unwatering will permit entry of the adjoining O'Brien workings on the deeper levels.

Langis Silver and Cobalt Mining Co. is getting rewarding results in underground development and exploration at its silver mine near New Liskeard.

"The ore picture is probably the best it has ever been," Mine Manager J. E. Jerome commented.

The No. 6 vein, opened in the No. 3 shaft area on the new 355-ft. level horizon, is shaping up particularly well. It has been opened

for a length of 120 ft. with the west face still in good ore. In fact, an intersection obtained previously at a point 40 ft. ahead of the west face gave an average of 198 ozs. of silver across 2.4 ft. The No. 6 vein has provided some spectacular high grade running as high as 3,000 ozs. to the ton at several points.

In addition to the No. 6 there are still a number of potential areas to investigate on the new level where drilling earlier this year indicated ore grade values.

In August, the mill handled its highest monthly tonnage yet when a total of 2,500 tons was run through. Tonnage is currently running at just below the 100-ton per day mark. It is hoped that 3,000 tons monthly can be pushed through shortly.

Silvermaque Mining has commenced unwatering the underground workings at its recently acquired Silver Contact silver property in the Gillies Limit, four

Man Injured In Highway Crash

A Cochrane man was rushed to hospital at North Bay Sunday night, after a highway crash 10 miles north of New Liskeard Sunday afternoon.

Thomas Lewis, 37, Cochrane, was taken to St. Joseph's Hospital in North Bay, where he is reported to be in serious condition with internal injuries.

Lewis was the driver of a small north bound car which was involved in a nearly head-on collision with a 1955 model car driven by Frederick Harvey White, 60, of Force of the impact tore the motor out of the White vehicle and threw it 32 feet from the vehicle.

Residents too Slow In Reporting Fires

At Bucke Township council meeting on Monday, Fire Chief Ollie Shaver chided local citizens for failing to co-operate with the fire department.

The fire chief said that since the department was formed there has been three major fire losses in the township.

"Two of these" he said, "could have been controlled if they had been reported to the fire hall."

The fire chief said that the fire which destroyed a summer cottage on Saturday was not reported un-

til 35 minutes after it had started.

"We are criticized for failing to put out these fires," said the Chief, "but I feel that those who fail to report them are responsible for these failures."

The chief pointed out that the Bucke Township brigade has to protect one of the largest townships in Northern Ontario. "We would rather investigate a few false alarms," he said, "than see property destroyed because people did not bother to call us."
