Reporting Service For Ontario Roads

With the resumption of the Ontario Department of Highways Winter Road Reporting Service earlier this month, up-to-the-minute information on the condition of all King's Highways and Secondary Highways in Ontario has been made available from any of the Department's 18 district offices as well as from the Road Information Centre located at the Toronto headquarters.

This important public service is provided on a 24-hour, seven-day-a-week basis throughout the winter months. Road information is

received at the centre six times daily and reports are compiled and transmitted by an extensive teletype system to the department's 18 district offices throughout the province.

The Department's Winter Road Reporting Service is better equipped than ever before for this public service. Early in November the Department's own two-way radio system was extended to the

Huntsville District, thereby adding more than 8,400 square miles of coverage to the existing network.

Health Unit Releases Report

Officials of the Temiskaming Health Unit have released a report of Unit activities for the months of September and October.

Immunization Clinics were held in schools in Dobie, Ramore, Savard, Kerns, Cobalt, Haileybury, North Cobalt, Thornloe and New Liskeard. These were for diphtheria, whooping cough, tetanus and polio. Polio vaccine was also given to any adult wishing it.

Dr. E. R. Harris, Medical Officer of Health, Ron Birch, Senior Sanitary Inspector and Miss Sally Cameron, Supervisor of Public Health Nursing, attended the Ontario Public Health Convention on October 2, 3 and 4 in Toronto. Dr. Harris also attended the annual executive meeting of the Ontario Laennie Society.

Members of the Public Health Nursing Staff assisted at the Orthopedic Clinic held under the auspices of the Ontario Society for Crippled Children in Kirkland Lake on October 24th.

A tuberculin testing clinic was held in the Elk Lake area in September when 155 school children, three pre-schoolers and seven adults were tested. Of these, 42 school children and one adult had positive reaction. A portable X-ray machine was brought with its own generator from the Department of Health's office at North Bay, to the Women's Institute Hall on October 12, when the school children with positive reaction were X-rayed, as well as many adults. Although 212 persons took advantage of the opportunity and no new cases were found.

The sanitation report showed that one hotel improved its sewage disposal system by installing an adequate tile disposal bed and a private club is building a small lagoon to take care of their sewage problem.

Clean and Store Hunting Gear

With the duck and deer hunting seasons over for another year, it's time to put guns and ammunition and all attendant equipment away — safely! The Outboard Marine Boating Clinic offers these suggestions:

Children are insatiably curious; therefore valuable rifles and shotguns should be locked away carefully — from possible damage through careless handling, and to ensure that no harm can come to inexperienced handlers. Disassemble the guns and wash all parts in a good cleaning solvent and scrub out the barrels with a brush and bore cleaner. Reassemble after drying, oiling each part lightly. The barrels should be oiled by drawing an oil-soaked cloth through followed by a dry cloth to clean away excess oil. This last step is IMPORTANT because too much oil in the bolt could, in cold weather, inhibit the movement of the firing pin.

Store firearms in a dry, warm place, in a horizontal position to keep the oil from draining to the back of the action. Ensure free circulation of air and DO NOT plug the end of the barrel with a rag.

Ammunition too, should be stored in a dry place, but as cool as possible.

Try to keep this equipment locked away from small, prying hands, and make sure the keys are inaccessible to any youngster.

THANK YOU FOR YOUR VOTE

Charles Camsell

THANK YOU HAILEYBURIANS FOR YOUR VOTE OF CONFIDENCE

My congratulations to all of the other candidates, successful or otherwise, for their sincere efforts in making this a truly representative election.

I'll Work For You In '62

Merv Lavigne

I wish to thank the good citizens of Haileybury who supported me in the municipal election and I assure one and all, that I still will continue to work to the very best of my ability, as their representative on the council.

May I extend to one and all a very Merry Christmas and a Happy New Year.

Councillor James J. Whelan

SAVE YOURSELF THE INCONVENIENCE OF AN ACCIDENT

Make sure your snow tire treads are good. Carry tire chains in your trunk. Have brakes balanced and make sure the steering system's in shape for winter. Install anti-freeze. Check windshield wipers to make sure you'll see where you're going. Heaters and defrosters should work properly; so should headlights and tail lights. And do you recall any news stories about carbon monoxide poisoning? Check your exhaust system for leaks. Get your car in shape for winter now. You might save yourself the inconvenience of an accident.

WINTERIZE YOUR DRIVING

Driving conditions are worse in winter — winterize your driving as well as your car

Highway Safety Branch

ONTARIO DEPARTMENT OF TRANSPORT

Hon. H. L. Rowntree, Q. C., Minister

My Sincere Thanks

to the people of Haileybury for their

loyal support in re-electing me

as Councillor.

Dr. W. C. Arnold
