### demmander Charme's Project for Reaching that Mach Sought-fur Spet.

Commander Obeyne of the Royal Navy,

who was an officer in three Franklin search expeditions, began a series of three illustrated lectures to voyages in Northern sees in Chickering Hall last evening. He is a stordy Roulishman, with a square head, a resolute face, and decided manner in speak ing. He prefaced the lecture by modestly offering to America his services in any way in the search for the Jeannette because America came forward so nobly in the search for Sir John Franklin. He also explained one of his objects in coming to this country. He desires, in company with Lieut Schwat. ka who approves of the project, to do what has been deemed impossible-reach the North Pole by means of balloons. His meshort is to Hart out next spring with a ressel which will carry him to St. Patrick's Bay. There a house is to be put up noar a coal field and provisions are to be stowed in a three men, a sledge, Esquimaux dogs, pro-visions, and instruments. Preliminary ob-servations are to be made of three different man, and regularly ordained Episcopal deswind curve has been found the balloons are of the Episcopal denomination. trip to the pole by the audience, and was illustrated by limelight views of Arctic scenery and scenes of previous expeditions. Speaking of the Jeannette, he said that he believes she has not been lost. He believes that she is drifting with the pack ice in an easterly direction, and that she will in time be reached by way of Smith's Sound, thereby meeting her instead of following her.

#### Selling Otherster. London Saturday Letter.

A curious side light on the views wh are entertained abroad of the foreign policy of the present Government, and at the same time a prospect of much concenial occupation for the Prime Minister, is to be obtained from a paragraph which went the round of the papers at the beginning of this week, Spain, it seems, has so much money and the moment seems to favorable for such ! an operation that a subscription is to be set on foot for the purchase of Gibraltar from Sngland. Some Madrid bankers have offered 5,000,000f.—a handsome basis certainly, In the improbable event of England declining the bargain, the money is to be spent on rival fortresses dotted about the Strafts: but this is cridently "done as chapmen do, to quote" Troilus and Cressida." Call it a half a mil- the same time an empty stomach is to be drilled to receive acorns of different sizes, beads of which he framed his resaries, and

he observed wood pecker holes in a large spruce free, and he was informed that they also bore into the bark of certain oaks to a limited extent. The acorns were generally considered as laid up for a winter supply of food; but while in this climate no such proision was necessary, it was also very imobable that woodpeckers would feed on hard buts or seeds of any kind. The more the workmen taking each bead on inserted stem to stern, as she struck a monster about by men a "scretch" dinner party. Friends rational explanation is that they are preserved for the sake of the grubs they so fremently contain, which being very small when the acorn falls, grow until they eat out the whole interior, when they become a relcome delicacy for the bird.

Mr. Lightner, a member of the Academy had observed woodpeckers engaged in drill: ing holes in the bark, when a blue ny was seen to fly close up to one and inspect the size of the hole. Some active chippering then ensued, when the bluejay flew away, but soon returned with a green acorn, without the cap, in his beak. This he offered to the bodpecker, who took it with his beak, and set it into the hole, and drove it home with was continually repeated. Mr. Lightner desired to know what were the special benefits derived by this mutual service conducted between a seed-eating and an insect-eatng bird. Mr. Stearns said that great numbers of untouched acorns remained in the spring, which have developed no worms suitable as food for the woodpecker, but quirrels. Thus a community of interest was manifest, explaining their joint labors.
