Ontario Legislature.

The last seemon of the fourth Parlisment of this Province was brought to a close last Thursday. It is announced that the nomination of candidates for the Provincial Legislature will take place on the 20th inst. This is short notice, but has the advantage that the contest will be sooner over.

The Grain Crop.

- The Montreal Witness in an editorial bearing on the grain crop says last year's crop was probably the largest ever yielded by the earth. The Eurobean crop was more than an average une, while in no part of the world was there any conspicuous failure. The crop in America was almost unprecedented. The Agricultural Buteau places the wheat rield of the United States at five hundred and ten million bushels, or eighty million more than in 1878, sixty million bushels more ticku hi 1879, and afer million more than in 188 .. The crep of maize is placed at 1.035 williag Latertly which is eighty seven millions larger than the corpcadented, and was two hundred and seven millions under the crop of 1880 Canada's clop was also very large. is not much wonder that prices are very view of the good crops a have interfered more seriously with been reported, or something occurs to make the crop prespects for next season very low.

Another Wall.

A few weeks since we referred to the appeal of the Liscensed Victuallars, through their organ the Toronto Weekly Review, in which alarm was evideed lest and the cities of London and St. Thomas, and urging the suppoters of the liquor traffic to strenuous action. The principal movers among the whisker party are evidently very much alarmed at the Scott Act movement, and the issue of the Recier following the one above referred to contains the very carnest appeal given below :-

We again urgs upon the trade Elgin, Middlesex and Oxford and in the cities of London and St. Thomas where the Scott Act will shortly be submitted its introduction. Let the Trade commence now and not wait until the eve of the voting to bring all the force o argument and the weight of personal influence against the Act.

by probibitory measures. This bringing face to face with the temperance lecturer local gentiemen is dar preferable to cupinging a paid advocate to contest the question. The trade had better waken up to the fact that a strong check this attempt to force upon the honest Government. Upon the last people prohibition.

The above paragraph will no doubt be read with considerable amusement at the very great anxiety and concern evinced by the "Trade" who are so solicitous about "the result of endeavor ing to create soliriety by probibitory measures. The "Trade" is certainly an organization which would be alarmed at the result of prohibitory measures.
