THAT LIBERAL GIFT.

THURSDAY MORNING; JULY 16, 1885.

The present of the remaining thirteen; acres of the Steele property to the minicipality, for cemetery purposes, by Dr. McGarvin, the owner of the property-as referred to in the Council minutes elsewhere, is a gift of a very magnanimous character. The conditions are comparatively trivial; the object for which it was presented is a most worthy and considerate one.

That the Council acted wisely in accepting this offer will, we venture to say disputed by few, if any, and that the gift will eventually prove a source of no mean revenue to the common exchequer of the municipality we confidently predict. Time will tell.

By the addition of this thirteen acres to the six already purchased by the corporation, the new cemetery will present much greater variety of surface and elevation for. the selection of plots; it will allow of more extensive and attractive design of survey, and more scope for becoming ornamentavery objectionable fenced right-of-way to good local paper. the otherwise private property in the rear of it, and the whole of the nineteen acres will be under the exclusive control and direction of the municipality

In order that the acquisition of the thirteen acres may not materially affect the revenue from the sale of lots, it is the inten tion of the Council to survey the six acres in front and offer them by public sale before the other is in any way opened for sale neat, clean and spicy. FAILURES DECREASING.

'The record of failures for the first six months of the current year, presents a strikingly favorable contrast to that of the two preceding years. The figures for Canada are:-

In the first quarter of the year the total number of failures was 393 with liabilities of \$2,827,782; in the second quarter 297 is a model of neat typography, and is failures and liabilities of \$2,338.382, the details by provinces being :-

First Quarter. 306 \$1,451,912 Second Quarter. Brunswick... 8

The only province in the Dominion in which the amount involved in failures in the first six months of 1885 is greater than the same period of 1884 is Manitoba. The figures are, 1884, \$460,560, against \$488,684 in 1885. The decrease in the liabilities of insolvents, is very marked, the amount for paper that it is, the F. P. has improved the last six months being less than one-half with every year of its existence. It is a that in the corresponding period of 1884, and more than three millions less than in

NOTES AND COMMENTS

The country at the present time presents lamentable spectacle from the number of Canada thistles to be seen both on highways and on farms. It is evident that mers and the public generally are dilly dallying with this thistle question too much A general and immediate warfare should mmediately be waged against the pest.

The Milton Sun is so completely biased its political leanings that it cannot come out and take a fair, square independent view of a public question. It should be able to see, as all fair minded people do, that all the truth is not with one party, and that he who thinks it is, is mislead.

CATABRH-A NEW TREATMENT. Perhaps the most extraordinary success hat has been achieved in modern medicine has been attained by the Dixon treatment for Catarrh. Out of 2,000 patients treated during the past six months, fully ninety per cent. have been cured of this stubborn malady. This is none the less startling when it is remembered that not five per cent. of patients presenting themselves to the regular practitioner are benefitted while the patent medicines and other advertised cures never record a cure Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissue. Mr. Dixon at once adapted his cure to their extermination-this accomplished, he claims the Catarrh is pratically cured, and the permanency is unquestoned, as cures effected by him, four years ago are cures still Catarrh in this manner, and no othe treatmay be expected to still further improve. cation of the remedy is simple, and can be At Howson's.—Any quantity of Seed Corn, Millet, Hungarian, Vetches and other varieties of field and garden seeds at How

KING'S EVIL

Was the name formerly given to Scrofula because of a superstition that it could be cured by a king's touch. The world is wiser now, and knows that

SCROFULA

can only be cured by a thorough purifica-tion of the blood. If this is neglected, the disease perpetuates its taint through generation after generation. Among its earlier symptomatic developments are Eczema, Cutaneous Eruptions, Tumors, Boils, Carbuncles, Erysipelas, Purulent Ulcers, Nervous and Physical Collapse, etc. If allowed to con-tinue, Rheumatism, Scrofulous Ca-tarrh, Kidney and Liver Diseases, Tubercular Consumption, and various other dangerous or fatal maladies, are produced by it.

Ayer's Sarsaparilla

Is the only powerful and always reliable blood-purifying medicine. It is so effectual an alterative that it eradicates from the system Hereditary Scrofula, and the kindred poisons of contagious diseases and mercury. At the same time it en-riches and vitalizes the blood, restoring healthful action to the vital organs and rejuvenating the entire system. This great
