reference to the question of Commercial Union with Canada. The Globe understands that it is the in tention of the Government to instruct the Boards of License Commissioners to in stitute suit against thosh County Councils which decline to pay their proportion of the expenses estimated for the enforcement

of the Scott Act.

A proclamation has been issued providing that the value of goods entered for duty on invoices made out in foreign currency shall be computed according to a schedule annexed to the proclamation, and that all in-Canadian currency at the rates assigned to the foreign currencies in the schedule.

Will farmers continue to make gambling polling division he resides in, or, if not and confirmed. and intemperance respectable, by lending qualified there, then where he first votes in their aid and patronage to fairs where the municipality. wheels of fortune, race courses, and drinking booths furnish the chief attraction? It is not too carly to begin to consider this in churches, theatres, halls or other places question, and it should take only two seconds to decide it .- Western Plouvian.

An official statement of the financial schools, colleges, or buildings of like nature; standing of the Dominion at the close of and the strength of walls, beams, joints, the financial year, on June 30th, shows the and other supports, are to be subject to gross amount of our public debt to be \$270,- regulation: and power is given to compel 200,374 and the net indebtedness, after de- production of plans of all such buildings ducting assets, to be \$225,026,762. It is for inspection. claimed that the net debt has been reduced by \$450,184 during the month of June,

The first expulsion that ever- took place from the Toronto Board of Trade was completed at a special meeting, at which forty-five members were present, Monday afternoon. Mr. D. R. Wilkie, second Vice-President, was in the chair. The expelled member is Mr. W. R. Keut, of the firm of Gilchrist & Kent, grain dealers, Orange-

Rev. Joseph Cook says' "I proclaim here as I proclaim there, that when a reformed drunkard sits down in a pew and finds his neighbouring church members moderate drinkers and the pastor holding up his Bible in one hand and the glass of moderate drinking in the other, the struggling converted inebriate has not come into a place of safety. The Church is not a fold securing him from the wolves; it is no place where he can repose."

In the Mexican state of Chihuahua they have but small respect for the voter who thinks that politics is a bad business and who is too lazy to cast his ballot, and a | pality. law has been passed fining every man three dollars who does not come to the polling booth when he is able to do so. Another curious feature of the election laws of the submit by-laws for the construction of State is that while a married man of eighteen has the franchise an unmarried man must be twenty-five before he can vote.

At a recent meeting of the Kentucky Distillers' Association at Louisville, it was resolved that all the distilleries in the State should stop work on the first day of July, and remain closed for one year. The reason given for this action was that it won't pay to manufacture whiskey now, nominal." The annual product of whiskey in Kentucky is from 18,000,000 to 20,000,-000 gallons a year.

The union of the Dominion and Industrial Exhibitions this year at Toronto will have the result of producing probably the place on statute, a law prohibiting the manufacfinest exhibition that has yet taken place in Canada. An unusually large number of entries is already assured, and although over \$30,000 has been expended in buildings every inch of space will be occupied with exhibits. The attendance promises to be immense. Railway rates have been secured at a lower figure than heretofore. A single fare for the double journey at any time during the exhibition will be obtainable. The special attractions are advertised as ahead of anything heretofore.

One of the minor incidents of Queen Victoria's jubilee celebration in Great Britain is a new coinage. As England, Ireland and Scotland are all represented by their arms on several British coins, the | says :people of Wales were in hopes that they might find their existence remembered, but there is nothing on the new coins to indicate that Wales is a part of the nation. For the past half century theeffigy of Queen Victoria on the coin of the realm has represented a maiden of about eighteen summers. Her Majesty, however, has had a new die prepared for all her coins; and in the effigy the Queen appears, crowned and veiled, wearing the ribbon and star of the Garter and of the Victoria and Albert

The Prohibitionists of Manitoba have result in serious losses." determined upon a vigorous fight for local option in every county in the Province. The campaign will be conducted under the Provincial License Act, which provides that on petition of twenty-five per cent, of the householders in any municipality a vote shall be taken as to whether or not licenses shall continue to be issued. In the case of a vote in the affirmative the penalty for selling without a license is for the first offence \$250, or five times as great as for girls of the town. Whatever goes beyond the offence under the Scott Act, and for this is not for the general benefit, but for the second offence \$500, again five times as | the benefit of the proportionately small great as the penalty under the Scott Act. | number who can continue their training Some years ago a general Scott Act cam. | during the years required for the superior paign in Manitoba was resolved upon, but studies. It is well that it should be given action was blocked by the discovery of the but it is not a logical necessity of a school fact that the counties marked out by the system for which everybody is taxed." WITNESSES IN SCOTT ACT CASES. It is admitted on all sides that the Scott Act should be as stringently enforced as possible while it remains the law of the county, and that it is being satisfactorily enforced is also admitted by all reasonable people. To accomplish this result certain. ly requires constant vigilance on the part of the officials, and while it is always desirable to secure a sufficient number of reli-

able witnesses to establish the charge preferred, care is necessary and should always be observed to avoid the subprensing of persons for witnesses whose names may have been supplied merely for the purpose of revenge, or without the knowledge that they were implicated in the violation of the Act. To people generally there is no more struck him with the scientific precision of humiliating position than to be called as a a prize-fighter. The Constable finally witness in a Scott Act case. We contend that those who aid or induce another to violate the law are equally guilty with the the head and face. A little later the hotelperson who sells the liquor and deserve to keepers turned out in force and searched evebe placed in the humiliating circumstances ry public place in town for Hall. They finally they shirk from, but to call witnesses, on found him sitting in the American hotel, any pretext whatever, who are innocent of any knowledge in the case, and who are known to refrain from indulging, invariably weakens the case for the officers of the law and causes a loss of sympathy for the Act | the hotel came to his rescue. Some of the of the testing. The winter feeding provious. witness and those who are nominal supporters of the Act, but who do not feel it to be their duty to take an active interest therein. No meaner or more reprehensible expressed by the Chicago Tribune, the way of injuring the feelings and reputation leading Republican paper of the West, in a of any person could be devised than that above referred to. Several instances have lately came before us, but we sincerely hope there will be no recurrence. We refer to this matter in the interests of the Scott Act as well as in defence of injured citizens

of the county, and as the platform of the

MILK IN WINTER WITHOUT GRAIN.

By William Brown, C. E. Professor of Agriculture Maltreatment of a Constable who Under-Winter dairying is not yet a common thing in Ontario, even individually amongst farmers on any sort of system, and nowhere that I know of in the Province by ORENORVILLE, July 11 .- About half-past nine o'clock to-night William James Hall, any plan of co-operation. It requires no Constable, entered Paisley house, and callfore sight to tall of a near development of ing the proprietor saide, handed him a the interest throughout winter-subject, of summons commanding him to appear on course to the day of milk having to take. Thursday to answer to a charge of violating a second place to some other specialty in the Canada Temperance Act. The service the cycle of events. Meantime we think it had scarcely been effected, when Bennett to be the duty of this Experimental Station seized the unfortunate constable and plied to help the profession in those that should him vigorously with his hands and boots. stand as guides or warnings for the coming Hall roared pitcously, and ran through the years.

hotel, being followed up by Bennett, who With this view we have carried out two experiments during the past winter, that have, we think, proved several things, made his escape and ran up Broadway which, though not unknown in a general crying murder and blooding profusely from way, have possibly not received the same systematic attention that I shall now show. In January last we selected four well balanced seven-year old Short Horn grade cows from a lot of ton that we had held all on the Prince of Wales read. Immediately summer, and had cost us an average of \$42. They calved in March, and were again in mers of Halton and Georgetown, and the farwas ponneed upon by his pursuers and calf the following July-thus being from kicked and beaten until the occupants of six to seven months gone during the course hotelkeepers suspected that Hall was mak- to this special work consisted of 8 lbs. bran, ing for his farm in Mono and started hotly | 15 lbs. timothy hay, and 40 lbs. of turnips

in that direction. They caught up to him | daily per head, being equal to a nutritive near the outskirts of the town; but he beg. ratio of 1:5.9. ged for mercy so frantically that they de-The cows were divided into two groups, cided not to beat him further. Threats by our best judgment of form and markings, against the inspector were freely made to- as well as by knowledge of their provious night, and it was hard to keep some of the records. The groups were changed from hot-headed ones among the mob from one class of food to another, at equal terms rocceding to wreck his house. There was from the 28th January to the 7th April considerable excitement in town when the the experiment having thus extended over news of the rough handling of Hall became sixty-four days. Six days were allowed generally known, and it was a late hour between terms, in order to counteract previous food influence. Every meal of food and milk was weighed, temperature of stables taken, exercise allowed, and the water.drank noted. Feeding took place at 6 a.m., 11 a.m. and 5 p.m., milking at 7

> During January, previous to entry experiment, Group 1. weighed 2,322 1bs., and had given an average daily milking of 35 lbs.; and Group II., of 36 lbs., with weight of 2,325 lbs., when six chemical analysis of the milk gave :

Solids other . Total roup 11 NG. 106 . Here is evidence of a very even condition of everything, with a small difference favor of richness of milk from Group n. The daily rations per cow for experimentation were:

A...40 lbs. turnips, 15 lbs. hay from p. pas-ture, and 8 lbs. bran. \$59 26 B. . 40 lbs, turnips, 15 lbs. hay of timothy and clover, and 8 the bran. The hay from permanent pasture was

made up largely of meadow fescue, perenaial rye, and some red and alsike clovers, and the other hay of about equal quantities of timothy and red clover. Group L, on ration A, gave a daily milking of 36.6 lbs., and on ration B. of lbs., with the following analysis:

...... Ki.(13) The cows of Group t., therefore, slightly Phail, aged between 60 and 70 years, a well | increased in the quality of their milk from known settler of Erin Township for over 40 A to B ration, but yet nothing so marked

86,121 4,171 ome. He afterwards became sick and a twelve per cent., or say one-fourth of a JUDICIAL NOTICE their average nutritive ratio is about 1.5.3. We may, consequently, anticipate that A will be somewhat higher, but not much We have, therefore, been handling foods in kind and proportions of more than ordinary importance as usually estimated

2100 lbs., or 35 1-15 lbs. per group. Group 1. entered with an average con weight of 1,179 and closed at 1,222 lbs.; Group ii. began with 1,150 and closed with

The cost of production may be placed

Making the 1,135 pounds of milk per cov equal to 1 cent per lb., or nearly 21 cents

We are now in a position to sum up; and ask what may be carned from these facts. The prominent feature of this experimen is the uniformity in every respect of the milk from four cows during mid-winter upon food differing only to some extent in the quality of the hay allowed. Hence we While Charles Bothmer was jumping off may ask if dry folder has much to do with No. 1 fast express at Petersburg on Sunday any changes in cow economy when giving morning he was thrown under the wheels milk, while she also gets alarge proportion and had both legs taken off. He had been of such succulent and natritious things as

> Another indication of some importance is crops-turnips, hay and wheat bran, By mixture of 40, 15 and 8 lbs. of these respectively per head per day, cows were not only enabled to keep up the full flow and quality about one month of next calving.

While we did not necessarily work for an increase or even the maintenance of dairy products with cows so long after calving, is clearly a point of very considerable importance to note how easy, comparitively, without grain proper, it has been to get milk all winter. We cannot overrate the significance of this fact as against the many examples of special cow records with much and so many kinds of grain in these competitive times. If it shall be said that two gallons of milk per day will not have when it costs about 9 cents and retails at 24, we have yet to learn where the profit goes. It is no creditable argument to e y that this quantity of milk is equal to die summer average of all Ontario, but it dies indicate how much could be done in winter

even with the present class of cattle that are timed for summer use. Our farmers, then, need not think of winter dairying as a system demanding of pecessity much grain, and upon this really valuable question I shall have pleasure in submitting, at an early day, another experiment conducted at the same time as the

WEBSTER DIOTIONARY ITSELF +

the Latest Edition has 118,000 Words, and 3000 Engravings - 3000 more Words and near-ly 2000 more Engravings than found in any other american Dictionary. It also contains a Pilo-graphical Dictionary, giving brief facts don-cerning nearly 10,000 Hoted Persons. To these features we have JUST ADDED, (1885)

Gazetteer & World briefly describing the Countries, Cities, Towns, and Natural Features of every part of the Globo. WEBSTER IS THE STANDARD Authority with the U.S. Supreme Court and in the Gov't Printing Office, and is recommended by the State Sup'ts of Schools in 36 States and by the leading College Presidents of the United States and Canada.

The London Times says: It is the best Dio-The Quarterly Review, London, says: is the bes. practical Dictiopary extent The Calcutta Englishman says: It is the most perfect work of the kind. The Toronto Globe, Canada, says: Its place

The New York Tribune says: It is recognises as the most useful existing "word-book" of the English language all over the world It is an invaluable companion in every School, and at every Fireside. Specimen pages and testimonials sent prepaid on application G. & C. MERRIAM & CO., Publishers, Springfield, Mass., U. S. d.
