### HOME GLEANINGS.

What are Now of a Local Character and All Interesting.

Births, Deaths, Etc.

The registration of births and deaths in municipalities is much neglected, notwithstanding that those interested are often punished. The Register General has issued instructions to assessors for this to make enquiry regarding births or deaths in the family of the party being assessed, and if any infant been registered to record such of his birth.

Multitudinous Horrors and Privileges.

—Mr. Forest Representative.

The Bert Welch for Farmers.

We will call attention to the advertisement of the Wm. W. Sparling, teacher of Clinton, formerly connected with the Ontario Normal School. His services were excellent and very much enjoyed. The course of the evening was specially interesting and instructive and notwithstanding the inclemency of the evening he was listened to by a large audience.

The platform meeting on Monday evening was also largely attended, Rev. Dr. Phillips, the pastor, presided. The meeting was opened with singing and prayer by Rev. Dr. B. Cook, after which Mr. Phillips read from the annual report of the Missionary Society a synopsis of the amount raised for missionary work, and the work accomplished in the mission fields last Conference year. The Methodist Church in Canada, raised last year for missions \$201,674.71 of this sum Acton contributed \$12,341.

Rev. Mr. Hiraiwa, of Tokio, Japan, the Christian stranger, whose lips the large audience had especially desired to hear what Christianity had done for him and his country, was then introduced; he commenced by requesting the sympathy and patience of the audience with him in his imperfect pronunciation and accent of the English language. He said he had been studying English for years, but his first attempt to speak publicly in English was in the city of Montreal last October. His progress as a public speaker with a foreign tongue has been marvelous. He has acquired a good idea of English expression, and by listening to him attentive laymen can understand all he intends to convey. His greatest difficulty is in pronouncing the names of places. He was a stranger in original costume, was of medium stature, fair complexion, and the delicate complexion and distinctive features which characterize the Mongolian race. He said that Japan and China, though separated by a great part of the world, bring closest together. By the C. P. R. route, connected with steamers on the Pacific, Toronto can now be reached from Japan in twenty days; and when better steamers are put on the Pacific, as will be in a year or two, Tokyo will be reached then in 17 or 18 days. He came from Japan to Toronto, in company with Dr. McDonald, the president of the Methodist College at Tokyo last September in 22 days. The countries are also being drawn closer by Christianity. He said he is a brother in Christ. He often referred to the anti-slavery spirit of his country. Like the Chinese, they had banished all foreigners as barbarians. About 20 years ago, however, some fine steamers from America visited their country, and when they saw the magnificent vessels they thought barbarians could build any one equal to them. His wife started for Vancouver on Wednesday.

The congregation of the 16th Presbyterians have decided by 163 to 23 that that noisy "kite whistlers" elegant organ must be removed from the Sunday school room, "as they cannot considerably send their children there while it remains."
