HOME GLEANINGS

Which are Mostly of a Local Character and All Interesting.

The Public Health.

A meeting of the Local Board of Health was held last evening to arrange for the removal of the slaughter houses on Queen street. They are situated outside the corporation limits, but the Medical Health Officer has condemned them as injurious to the public health and demands their removal.

A Successful Picnic.

The annual picnic of Knox Church S. S. lost nothing in interest by its postponment from Wednesday to Thursday last week. The picnic was held in Wallace's grove, on the second line, and the attendance was very large. The teachers and parents did everything possible to secure the comfort and enjoyment of the children and they succeeded in every respect. The children of Dublin S. School participated in the event.

A New Manufactory for Guelph.

The Williams, Greene & Rome Company at Berlin have decided to locate their new branch manufactory at Guelph. The city gives them a building free of rent and taxes, put in shape suitable for the business, and free water for ten years. The Company promises to employ not less than 50 hands for the first year; 100 hands the second year; 200 hands the third year; and not less than 200 hands every year during the period of exemption.

Don't Mix Old And New Barley

A well-known grain buyer says: "You should caution the farmers against mixing their old barley with the new. Many farmers throughout the country have old barley on hand, and they may be thoughtless enough to mix it with the new product; but if they do they will make a serious mistake. The mixture will not find a market. American grain buyers detect the mixture at once and reject it, and the local buyers will be compelled to do the same.

A Hearty Little Farmer.

John Bennett, of Crowson's Corners was in Guelph the other day and a *Mercury* reporter took him in tow. As usual John did a little blowing and the reporter gets off the following:—"The old gentleman is 71 years of age, and is one of the most active men of his years that visits the Guelph market. As an evidence of this it may be mentioned that this week he tied 40 shocks of fall wheat in the forenoon, and stacked them in an hour in the afternoon. He is willing to stake his reputation against any man in the Dominion for $10."

Economy of Time and Trouble.

There are a great many people who send a copy of the FREE PRESS to friends and pay postage. They pay fifty-two cents in postage, and besides their trouble fifty-two times, the paper always goes several days after publication. By paying us $1 they are saved both postage and trouble and the paper leaves promptly at the hour of publication. The FREE PRESS is the best letter to send a friend. It gives all the local news and it never fails to go. People generally neglect to write letters and have more bother over correspondence than the cost of a paper.

The Reason Why.

Mary had a little lamb, it's fleece was white as snow; it strayed away one summer day, where lambs should never go. Then Mary sat her down and tears streamed from her eyes; she never found the lamb because she did not advertise. And Mary had a brother John, who kept a college store; he sat him down and smoked his pipe, and watched the open door. And as the people passed along and did not stop to buy, John still sat down and smoked his pipe and blinked his sleepy eye. And so the sheriff closed him out, but still he lingered near; and Mary came to drop with him a sympathizing tear. "How is it, sister, that those other merchants here sell all their goods and thrive from year to year?" Remembering her own bad luck, the little maid replies: "Those other fellows get there, John, because they advertise."—Springfield (Mo.) *Journal.*

Infancy, Manhood And Old Age.

During the past week the uncertainty of life and the fact that death is liable to claim its victim at any period in life have been clearly exemplified. Early on Saturday morning Mr. William Smith, manager of the Cordovan Tannery, who had been ill for some days, departed this life. He was a young man of promise, full of business tact and energy. His anxiety for success in business is thought however, to have superinduced his early demise. About noon on Saturday Mr. James Grant, Sr., died after an illness of five days. He had arrived at the allotted period of human life, three-score years and ten. For many years Mr. Grant resided in Acton and vicinity and although occupying a humble place in life was respected by all who knew him. On Sunday evening the baby boy of Mr. John Anderson succumbed to an infantile ailment after a few hours of intense suffering. The funerals were held on Sunday, Monday and Tuesday afternoons, and each was attended by numbers of sympathizing friends and neighbors of the bereaved ones.

A Mournful Home Coming.

About six weeks ago Messrs. Jno. Warren of Acton and A. C. McKinley, L. D. S. and R. D. Warren, of the *Herald*, Georgetown, left for a trip to the Old Country. They arrived there safely and enjoyed their visit very much. In due time they embarked for home via the well-known steamship *City of New York*. On the way across Mr. McKinley was attacked with inflammation, and although everything that medical treatment of the most skilled character could do was performed, and the kind and constant attention of friends was bestowed, they were all unavailing, and he died on Wednesday evening, 14th inst., when about 90 miles out from New York. The trial to the friends who accompanied him was great, but, the sorrow of the devoted wife and two little ones at the home coming can be better imagined than described. However the pain and grief are lessened when it is known that deceased was possessed of a living christian experience, and died triumphant and resting in full confidence in the arms of a sympathizing Saviour. Mr. McKinley was a prominent citizen and an active member of the village council, always foremost in every movement that was calculated to advance the interests of the municipality. He was very successful in his profession and was an active member of the Baptist church. The funeral on Saturday was one of the largest ever seen in Georgetown.

—C. McKinlay, L. D. S., of Brampton has now charge of the dental office, in Georgetown, of the late A. C. McKinlay. All branches of dentistry will be carried on in the most satisfactory manner, with all the latest and most approved appliances. He will also visit Acton twice a month as did his late predecessor. The liberal patronage enjoyed by the late A. C. McKinlay is respectfully solicited, for his successor.—C. McKINLAY L. D. S.

HARPER'S MAGAZINE.

M. Edmond de Pressene, French Senator for life, the eminent Protestant divine and pulpit orator, has prepared for the September number of *Harper's Magazine* a faithful outline of the religious movement in France at the present time. While "it would be absurd," he says, "to imagine that French Protestantism is on the point of again taking possession of France," he regards it as a salutary element for the present and an important one for the future. Of French Catholicism he says that it "remains a great force in spite of the noisy manifestations of contemporary atheism." He points out the attention paid to social questions by the Protestant as well as the Catholic church.

A SOUND RECIPE.

The following is recommended as a good recipe for those who are desirous of wrecking their town:

Order your dry goods from Toronto.

Buy of peddlars as often and as much as possible.

Go to some other place to get your printing done.

Contribute what information you have to any but your home paper.

Glory in the downfall of some man who has done much to build up the place.

If a stranger comes to town tell him everything is overdone and predict a general crash of the town in the near future.

Keep every cent you can get and don't do anything of a public nature unless you can get something out of it directly.

Some people who follow this line live not a hundred miles from Acton.

Best of All

Cough medicines, Ayer's Cherry Pectoral is in greater demand than ever. No preparation for Throat and Lung Troubles is so prompt in its effects, so agreeable to the taste, and so widely known, as this. It is the family medicine in thousands of households.

"I have suffered for years from a bronchial trouble that, whenever I take cold or am exposed to inclement weather, shows itself by a very annoying tickling sensation in the throat and by difficulty in breathing. I have tried a great many remedies, but none does so well as Ayer's Cherry Pectoral which always gives prompt relief in the worst of my old complaint."—Ernest A. Hepler, Inspector of Public Roads, Parish Terre Bonne, La.

"I consider Ayer's Cherry Pectoral a most important remedy.

For Home Use.

I have tested its curative power, in my family, many times during the past thirty years, and have never known it to fail. It will relieve the most serious affections of the throat and lungs, whether in children or adults."—Mrs. E. G. Edgerly, Council Bluffs, Iowa.

"Twenty years ago I was troubled with a disease of the lungs. Doctors afforded me no relief and considered my case hopeless. I then began to use Ayer's Cherry Pectoral, and, before I had finished one bottle, found relief. I continued to take this medicine until a cure was effected. I believe that Ayer's Cherry Pectoral saved my life."—Samuel Gridley, Waukegan, Ill.

"Six years ago I contracted a severe cold, which settled on my lungs and soon developed all the alarming symptoms of Consumption. I had a cough, night sweats, bleeding of the lungs, pains in chest and sides, and was so prostrated as to be confined to my bed most of the time. After trying various prescriptions, without benefit, my physician finally determined to give me Ayer's Cherry Pectoral. I took it, and the effect was magical. I seemed to rally from the first dose of this medicine, and, after using only the 6 bottles, am as well and sound as ever."—Rodney Johnson, Springfield, Ill.

DR. WASHINGTON,

Throat and Lung Surgeon of Toronto,

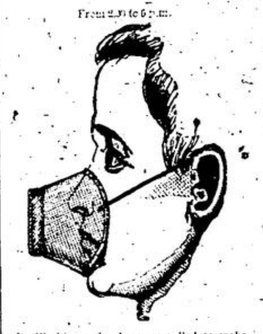
—Will be at the—

DOMINION HOTEL,

ACTON

FRIDAY, 30th AUGUST.

From 2.30 to 6 p.m.



Dr. Washington has been compelled to make monthly visits to fully supply the wishes of hundreds of patients who availed themselves of his successful treatment. His new method is based on the principle of conveying cold medicated vapor direct to the seat of disease, thus bringing the medication in direct contact with the diseased tissues. He does not claim to cure all patients who consult him, but he does claim to cure a much larger per centage than the general practitioners in general practice. It is not an unreasonable claim either, when it is considered that the doctor has devoted 7 years to the study of his specialty and improved on all the new systems which have been before the scientific world. His treatment has risen superior in its effects as it results to that adopted by the most eminent specialists even in New York, as he has had experience that city who have been given up by New York's most distinguished Throat and Lung surgeons and have been cured by his treatment. The names of some of them have been published, in this paper, on several occasions.

It must be remembered that Dr. Washington, who has been devoting years to the special study of Throat and Lung Diseases, has to-day been handsomely rewarded for his indomitable and industrious perseverance, and consequently there be a more tangible recognition than the testimonials published in this paper from time to time? The Dr. has built up an extensive practice throughout the Dominion, examining all patients personally, and while wholly responsible to all who have an occasion to visit him. And the fact—it is well for all to remember who may be troubled with any of the following symptoms of Catarrh, that in a very large majority of cases it is in the incipient stage of Consumption. In fact 70 per cent. of all the cases of Consumption have their origin in Catarrh of the head and throat. A few of the most prominent symptoms of Catarrh will be found below, and let those who have been Consumption in its first stages recall the terrible fact if the above is the correct, and why so many die of this terrible disease is that when hope and every chance of treatment to a successful issue is held out, the patient neglects till too late. To-day is the time to act positively. Take warning in time. Procrastination is the theft of time.

Symptoms of Catarrh.

Sneezing, difficult to catch cold in the head. A feeling of tightness across the bridge of the nose, with sometimes pain. Stuffing of the nasal passages. Accumulation of mucus which is thus changed by the bacteria, or drops back into the throat. A sense of pain or heaviness over the eyes, often in the back of the head and neck, sometimes in the top of the head. At times dizziness. Pain in the eyeballs. In severe cases a dull, drowsy, sleepy feeling in the head, swelling of the lids and eyes. Sometimes a profuse tearing and distorted appearance is given to the upper part of the face. A tendency to sneeze frequently. Sometimes the sensations are collected together in hard masses or chunks, which are with great difficulty removed. Sometimes the mucous membrane is broken, and scabs form which are cleared with sneezes.

In some cases the secretions are very copious, and are found in the back of the head and throat chiefly, and very little stuffing at the nasal passage, with a constant desire to clear the throat. Hawking or spitting or raking of tough phlegm, especially in the morning or after taking a warm drink. In other cases the amount of phlegm is very little, but it is extremely tough and almost impossible to remove.

A Few Facts to be Remembered.

1st. Dr. Washington is the only Throat and Lung Surgeon in the Dominion devoting his whole time to diseases of the passages.
