SCHOOL OPENING.

School Readers, Geographies, Arithmetics,
Fancy Books, Exercise Books, School
Lead and Paste, Pictures, Paint, Rubbers,
etc. Any thing in the School Books Line at
a low price.

GEO. HYND.

Lately there seems to have been a fatal
among watches belonging to friends at the
various lime kilns in the city. Only a
short time ago two men, attending different
kilns while throwing a rough piece of wood
in the furnace, had the chassis caught in a
snap, and away went the watches and chain
from the rest into the furnace, and the result in both cases was a little solid
lump of iron in metal found in the ash
heap. This morning Mr. Wells had a
similar experience at Christie & Henderson's
kilns, and is now minus a \$35 watch.
Fatalities of Watches in Lime Kilns.
