In Our Climate Changing.

The past two seasons have been so peculiar that thousands are attacked by colds, hoarseness, influenza, asthma, bronchitis, etc. To these we recommend Higgyard's Vetoal Balans as the safest, surest and best remedy yet produced for all throat and lung trouble.

The grand old gentleman seems to grow younger as the years go by. When tired of the real secret he finally told it, (not expecting it would be published, but here it is). Mrs. G. never allows any other kind but Imperial Cream Taster Baking Powder used. It's the only reliable. Sold by all grocers.

Let quality, not quantity, be the test of a medicine.

Tauvel's Tonic. I rescued a very large toad a few years ago from a rat-trap in the garden, and let it loose on the rockery of the conservatory, after bathing its poor torn leg in water, and otherwise making much of it. The next day, after a very long search, I found my invalid seated on a large stone in a small artificial pool of the rockery, and I gave him a worm, which, after some hesitation, he finally told it, (not expecting it would be published, but here it is). Mrs. G. never allows any other kind but Imperial Cream Taster Baking Powder used. It's the only reliable. Sold by all grocers.

Trust an old friend.

Old friends are best. If ever you suffer from a friend, Higgyard's Yellow Oil can justly claim the distinction. Pain never stays long where it is used, for croop is a specific. Parents should keep it to the house as a safeguard against accidents, frost bites, clubbings, sprains, bruises, burns, etc.

Mr. John Macwood, Victoria Road, writes: "Northern & Lyman's Vegetable Discovery and Dyepicure is a splendid medicine. My astenome lay the never failing results of this medicine to me.

The British Wesleyan Conference refused to professional reporters at its late session. There was something wrong about the Conference—the reporter—not being present, we can't tell which. Such a thing would be impossible in this country, where the irreverent reporter has the *edge* everywhere, from a candy-pulling to a General Conference.

CATARH.

Cataract Diseases—*for free*. A new Home Treatment.

Sufferers are not generally aware that these diseases are contagious, or that they are due to the presence of living micro-organisms in the lining membranes and epithelial tissue.

Microscopic research, however, has proved this to be a fact, and the result of this discovery is that a simple remedy has been formulated whereby cataract, external deafness and like fevers are permanently cured in from one to three simple applications made at home by the patient once in two weeks. N. B.—This treatment is not a poultice or ointment; but has been discarded by reputable physicians as injurious. A pamphlet explaining this new treatment is sent on receipt of ten cents by A. H. Dixon & Son, 203 West King Street, Toronto, Canada—Toronto Club.

Sufferers from Cataract trouble should carefully read the above.

EXCUSES FOR NOT GOING TO CHURCH.

Over-slept myself; could not dress in time; too cold; too hot; too windy; too dusty; too wet; too damp; too sunny; too cloudy; don't feel disposed; no time to myself; put my papers to rights; means to take a walk; going to take a ride; intend to forgive six days in the week, no fresh air box on Sunday; can't breath in church; always so full; feel a little feverish; feel a little chilly; feel very lazy; expect company for dinner; eat a headache; intend staying in till to day; new bonnet does not come home; wasn't shaved in time; didn't like washing without music; makes me nervous—the spirit will be, but the flesh weak; dislike an extempore sermon; it is too frosty; can't bear a written sermon, too prosy; nobody to day but our minister; can't always listen to the same preacher; don't like strangers; can't sleep awake when at church—fall asleep fast time I was there; can't risk it again.

For want of tools and materials to work with, many boys grow up without the least knowledge of their use, and consequently consequently of the development of any mechanical ability that may naturally have been possessed of. Every farmer's boy should have a knowledge of practical machines, so far, at least, as they apply to agriculture. And he should have an opportunity of acquiring the skill needed in their application to the various departments of farm work. The workshop is a great practical educator, and should be a permanent institution on every farm.

A SOURCE OF ANNOYANCE.
A gentleman, coming home at evening, spoke hardly to his little three-year-old, who was playing very noisy.

The little lady dropped her playthings and retreated quickly to a corner.

"What's the matter?" asked papa.

"Well," said the child, "I've been a good girl all this day, and now you come home and make trouble first thing."
