NOTES AND CONNENTS.

Joseph Shaw, of Winnipeg, has filed a bill of complaint against Honore Lamarche, a school teacher, for holding religious exercises in his school. The object is to test the constitutionality of the recent school legislation passed by the Manitoba Govern-

It is creditable to both parties in Lincoln that the newspapers of all shades of opinion oppose the candidature of Mr. Rykert, One Conservative organ has told him plainly that his usefulness is gone forever and that his return to parliament would disgrace the constituency without improveing his position. The Conservatives are called upon by the same paper to put a right candidate in the field and it is probable they will do so as a matter of justice to themselves and their party generally.

" A man of rock and fron with an army the pack to enforce peace" is the cription William of Germany gives of him self. Caprivi said the other day that he intended to civilize Africa with the Bible and rifes. What is the meaning of this sort of talk? It probably may be construed as meaning that in the estimation of Ger many the world wants a policeman and William thinks he is the man for the situation. John Bull has held the place for some time and we have not heard of his dismissal -Star.

An exchange mys :- If it is necessary and right to raise the tariff wall against Canada what is the sense of the United States spending four million dollars in the construction of a funnel under the Detroit river ! The Grand Trunk is now well advanced with its tannel at the same place and the American railways want one for themselves Government engineers have reported favorably, and the work will probably be begun at an early date. Interna tional politics and commercial necessaties do not seem to agree on the frontier.

Brazil does not seem to be enjoying perfect peace in its new republican harness. Riots are breaking out bet although so far appressed, they recall a prediction of ex-Minister Thomas A. Osborne, made when Dom Pedro was deposed. Mr. Osborne pointed out geographical, race and trade reasons for the belief that Brazil will eventnally be divided into three republics. One of these, he declared, would be formed the province of Rio Grande do Sal, where the most numerous and more recent out breaks against the provincial government have occurred.

According to published railway statistics twenty brakemen are killed every day the year on an average in the United States. It is therefore not astonishing that the class from whose ranks this awful tribute is taken by the Juggernaut of modern civilization should petition to have the railway companies compelled to adopt the most approved appliances for coupling care. is astonishing that men should take employment where they have only one chance in five of dying a natural death. The cost of putting perfectly safe self-acting couplers on cars would cost from \$25 to \$40 per car. To save this expense twenty men die sit agonizing death every day. Some com panies, to their credit, have adopted the are moving for legislation to compel all companies to do likewise. Justice and humanity are on their side and they should
