## DEATHS OF ENGLISH KING.

William the First got a bullet from the horse. A random shot from a noble's horse struck the king in the neck, and he died.

## THE TELEPHONE GIRL.

"Well," said Mr. Roland Wayne, when he came into his office, after several days' illness with neuritis, which afflicted him whenever the east wind blew, "you got some one for the telephone—did you, Burns?"

## SELECT FAMILY READING.

"I am not at the office—that is, not at my office, but at the Central station. Can you hear me?"

## A WONDERFUL CASE.

A British Columbia paper published at Victoria has the following:—A few days ago Dr. Cooper was called to attend upon Miss Kelly, a young lady of this city, who was supposed to have broken her thigh bone in a fall from a horse.

## TIGERS IN ANAM.

The French officials in Anam have met with considerable difficulty in dealing with tigers, which are doing much damage to the large sums paid for their extermination.

## MEMORY IN THE DOG.

Everyone knows that a dog has a good memory, but it would be hard to tell how far back the recollection of persons and things can go. Here is a touching story that throws some light on this point.

## SMALL INTEL.

Though sometimes small evils, like insidious insects, inflict pain, and a dog's hair may stop a rat's nose, the old secret of comfort lies not in allowing trifles to vex one, and in promptly extinguishing an undergrowth of small pleasures, since very few great ones (alas!) are let on long leases.

## AMONG THE VETERANS.

About 60 members of the Army and Navy Veterans' Society, under command of President John Nunn, were drawn up outside the Queen's Hotel, Toronto, for his visit and the Duke of Connaught and the Duchess of Devonshire.

## THE BRIGHTEST SPARKLES.

The largest perfect diamond in the world is now the Imperial, that was exhibited at the Paris Exposition last year, and which is valued at \$1,000,000.

## CURIOUS FACTS REGARDING MAX.

Every adult man has 1,400 square feet of lung surface; or, rather, the mucous membrane lining the air cells, which, if spread on a smooth surface, cover an extent equal to the area of a football field.

## ELECTRICITY AND RATS.

There is no accounting for it, the men say, but somehow the electric light stations swarm with rats. Big rats and little ones, together in the dynamo rooms and boiler rooms, and have great larks playing about the floors until the men get a little leisure for scientific experiments.
