A report from Ottawa states that the work in connection with the revision of the voters' lists of last year is just about completed. That is to say the printed lists are almost ready. It takes a long time to perfact a revision. Judging by the experience of 1889, it is obvious that a revision in 1891 would not be ready for use in an election in the spring of 1892. We should therefore in such a contest be thrown back upon the 1889 lists. 'Is it not probable that the vision of 1889 was conducted with a view to a probable election in 1890 .- Mail.

Never in the history of transatlantic travel has there been such a rush in Europe to secure berths for the voyage to New York as at the present time. The tide of travel has just turned, and from all parts of Europe, Americans are flocking toward London for the voyage home. Those who neelected to secure a return passage early in the summer are in a sorry plight, and there are at least a thousand Americans in London to-day who would be on the way some if they were able to secure passage. Travellers returning from the continent report the same overflow of travel in all parts of Europe.

I shall be glad if you will make this known to all such as may feel an interest in the matter."

Things begin to look very much as if the Dominion elections might be on and over before the Canadian farmer will have ester his Christmas turkey. The reasons that point that way are many and various Main reasons for bringing them on this fa from a Conservative party point of view, that the Reformers do not desire them just now.
