Select Family Reading.

A Three-H-Pencil. Edward Penning, our new corresponding clerk, had come to us in a somewhat unusual way. The firm watted a clerk who could write French, German and Italian, and shorthand as well. Au advertisement was put into the papers, and the only one who responded and was willing to take the salary offered-one hundred and fifty

pounds a year-was Edward Penning. The firm was Vincent, Bare & Stack. land, and the business carried on by them was that of wholesale jewellers, at Milford Lane, Holborn. It is one of the largest firms in London, bas a branch house at Birmingham, an agent at Cairo, and one at New York, and correspondents, bayers and sellers in twenty other large towns abroad. We buy rough or cut stones abroad, rend them to Birmiugham to be worked up, and then scatter them all over the kingdom,

and some, though not many-chiefly costly

lots-among our various foreign and colonial customers. We have always a considerable stock is Londou. Often as much as three hundred thousand pounds' worth of jexels lie at Milford Lane for a few days together. Upon an average we bold a bandred thousand pounds' worth there, besides the large quantities deposited on sale with our customers and carried about by our travellers. Although a timil man might be afraid to be even close to such highly valuable and very portable property, use, is second nature, and I, after a five years' contact with the trade, feel no more unersiness or responsibility when in charge of the whole place, than if each rung were a spool of cotton, and each broach a penny bottle of uk. But I have to add to my five years' experience the fact that I am the cepbew

of the senior partner, and that all my life

I have been accustomed to hear a great

deal of the articles we deal in. This circumstance, no doubt, has helped greatly to barden my sense of easy familiarity with Well, none of as liked Edward Penning His references were satisfactory, but his appearance and mainer were decidedly against him. He looked far too much value for the money. There was too much shirt frout, too much wristband, too much care taken of his hair, his necktie, and his boote. He was plump, thort, ball, and about forty years of age. So far as we knew he was a bachelor. I think the thing we disliked most in him was his universa gush. Every one of us-every one in the world, so far as any one of us or anyone else in the world ever came up for his re-

marks, was a too dear good fellow. The cierks were all dear good fellows, you know the partners were really painfully dear good Notwithstanding that we took a strong dislike to him because of this eternal perception of endearing goodness in everyone. it was not until he found reason for nothing but congratulation in the weather here that we lost all faith in him, and began to regard bim with mingled feelings of distrust and hatred. A fog was jolly; a thaw a blessing; rain most useful to the coun-

lightful, and snow no matter when, season-At the time of which I speak, now a year ago, we had on hand extensive orders for first-class rubies of large size. We could easily have disposed of five thousand pounds' worth, but just then euch stones were particularly scarce. At last a large consignment, about two thousand pounds' worth, reached us. They were all queut, and I remember how they were handed round for inspection, and how we all ad mired them, and congratulated ourselves on the rare luck of getting them; for we knew that other firms were buyers as well as we. It was arranged that I should take them to Birmingham the next morning Before leaving the office that evening I put the rubies into a new chamois leather bag had that day bought. There was some joking about my extravagance, and in reply told them that the bag, with its red-tape running string and all had cost only nine pence, and that anyone ambitious of owning one similar could get it for the same price at Matchlook's, round the corner. Perning was foremost in the banter and tool the bag out of my hand and felt it, and indolgod in high praise of its merits. When be returned it to me I placed it in a pocket inside my waistcoat, where I always narried valuables of convenient bulk, and then went away. It had been arranged earlier

Then he raised up the portfolio, set it on the table, and stepped back

with his head on one side, looking at the design. I stoopel a moment over the table and made up my mind to see about adopting his suggestion. When I straightened myself he handed me back the open bag, and as he did so, asked me could I let him see a railway guide book, as a friend of his was leaving Euston by the Irish mail that ovening, and he wanted to see this-

I dropped the stone into the bag, tied up the bag, squeezed it from mere habit to feel that all was right, and having placed it in my inside pocket, said :-

"Sit down a moment; the guide is in the other room." In a minute I was back and he was examing the guide book in what seemed to me a very unskillful way.

"Book for Kingstown,' I said "and not "Thank'you, I have it. I am so stupid Eight twenty-five; If I take a hansom shall be in time. Can you oblige me with an envelope and peu? I brought him an envelope, pen, thk blotting paper and stamps from the other room. As he had emphasized the word private, I turned my back upon him while he wrote. When I torned round, I found

him stooping before the fire drying the envelope. He looked up and said with a smile :- . "If the envelope is too quickly blotted the sorter often has a hard time of it.

He stood up and took my band :

"Thank you, my dear good fellow-five mintues past eight. I'll have to double the fellow's fare." And in less than a minute he was gone. My place was in C'arterhouse Square. I took up the portfolio and spent half an bour looking over it and examining the other designs.
