THURSDAY, SEPTEMBER 22, 1892.

NOTES AND COMMENTS. It is etsted that Sir John Abbott wil continue to be l'remier, perhaps until Cornetmas, and that at the wish of hi colleagues he will visit England as the Premier of the Dominion, instead of as the retired head of the Administration.

The Minister of Customs has sent structions to the collectors of Customs throughout Canada to exercise the greatest possible vigilance in order to locate any suspicious article in which cholers infection might exist which may be imported from or. infected localities in the Unit& States.

The Trades and Labor Costact of Canada on Monday adopted a recol ulative purposes as highly as improved land. In other words it favors the single tax. Evidently the members of the Council believe that the Henry George plan of taxation has some degree of merit about it.

The case against John R. Arnolds at the Assizes at Ottawa was brought to a close Monday. Under direction of the court the jury acquitted Arnoldi of fraud or false pretences, and found him guility of malfeasance in office, with the understanding that a case would be reserved for argument before the Chancery Division as to whether the evidence justified the verdict.

Mr. George Johnson, Dominion statisti cian, has just prepared a new edition of the handbook of Canada for circulation in Europe during the winter. At the reques of Sir Joseph Hickson, chairman of the Prohibition Commission, be-has also it readiness for submission to the commission a memorandum on crime for the last ten years and its relation to the Scott Act.

Although the population of the United Kingdom is close spon 38,000,000, the register of voters barely exceeds 6,000,000. As the last census testifies to the existence of 8,000,000 families, each of which presumably centains at least one adult male. wiether father or elder brother, it is clear that the register falls short of manhood suffrage by about 2,000,000 votes ..

By some medical authorities, la grippe is regarded as a more serious malady than cholers, inasmuch as the person who re covers from the last mentioned disease is no worse off physically than, he was before of America. it attacked him; whereas the grippe undermines the constitution, weakens the bodily functions and leaves its victim an easyprey to other maladies. Morcover the cholera can be warded off by strict sanitary regulations and only attacks a small proportion of the population. But the insatiable grippe knows no rank, age or quality, and baffles the efforts of medical scientists to arrest its progress.

Acids are death to the cholera bacillus says Dr. Koch and several other experts There is sufficient acid in the secretions of a healthy stonfach to destroy the bacillus. Salphuric seid is one of the best preventives and disinfectants known. If the suid theory of rheomatism, is true-that it persons will be the ones least apt to get the cholers. Some of the best physicians of the day believe that diluted sulphuric acid taken in lemonade in the proportion of twenty drops to a tamblerful will surely prevent any person from getting cholera if precautions as to the absolute cleaniness and healthful food are observed.

A communication has been received from the administrator of the colony of New foundland inviting the Dominion Government to appoint delegates from the Minietry to confer with proper representatives of the Newfoundland Government on trade | and cent to Kingston for 10 years. and fishing matters. The Dominion Government has accepted the invitation after the 10th of October. The conference, it may be remembered, is the outcome of the negotiations of last winter and spring. In Jone last Canada withdrew the duties on Newfoundland fish, and the sister colony remived the duties on certain Canadian products, pending the holding of the con

DISASTROUS EXPLOSION. Seven Men Killed and Twenty Mon Badly Scalded.

Commer, Ont., 19 .- A boiler in Force Dickinson's stave mill at Staples, a small village on the Leamington and St. Clair Railway five miles from here, exploded, by which seven men were killed outright, one fatally injured and about 20 more or less sulded. The particulars were as follows: About 6.30 a.m. the night watchman gave way to the regular day engineer. At that time there were 26 popuds of steam in the boiler that exploded. The fire was increasel, and it is supposed that there was 60 pounds pressure on the boiler at the time of explosion. Fortunately there were a great number of the hands absent, owing to the carry hour, brit is likely the fatalities w.u.l have been greater. The scene was herrible in the extreme. Arms and limbs were literally total from the bodies of the victims, while their sculls were crushed and the brains scattered about.

Dre. Abbott and Anderson of Comber were summened and did all in their power to relieve the wounded. Those dead are John Ewing, Michael Dupuis, Joseph Papineau, Issieh Chauvin, Jeroque Chauvin (two brothers), W. Peter Caust, and Moise

Mr. Skinner continued to sit in Parliament, but when Premier Blair returned from England be gave Mr. Skinner a week to say whether he would resign his seat in Parliament or realgn from the Probate Court.

Honor upon Honor, and Success upon Success.

Advices have reached the Toronto office of Sunlight Soap that the, manufacturers, Lever Bros., Limited, of Port Sunlight, near Birkenhead, Eng., have been honored by the appointment, under Royal Warrant as soap makers to Her Majesty the Queen -an honce and a privilege enjoyed by no other laundry soap menufacturers in the world. (Sunlight Soap has been in use in Windsor Castle for over three years. It is also worthy of mention that such has been the unparalleled increase in the sales of Surlight Soap, that the firm has given instructions to their architect to exactly double the size of their works (already the largest of their kind in existence). When it is remembered that the present works were only entered upon in July, 1889, and that the main building covers four acres, some idea may be formed of what colossal premises the forthcomng colarged work, will be! It goes without saying that a soap which has met with such phenomenal success throughout the civilized globe must be more than an ordinary soap. "Sunlight" has the world's record for honors and extent of sale, and these laurels have been won principally by the acknowledged superiority and purity of the soap. In Canada the sales of "Sunlight" are increasing at a rate which must be gratifying to those concerned in its

success .- (Toronto Mail.) A Valuable Business Journal.

The Review of Reviews.

One of the most useful departments the Review of Reviews is its classified summary of new books, with brief, pointed notices. This classified list is usually preceded by a more extended review of one ortwo books entitled to be regarded as especially the books of the month. In the September number of Emile Zola's wonderful account of the downfall of France in the the Trade then call and war with Prussia is made the book of the mouth, and an extended review is accompanied by a good portrait of the French Robert Louis Stevenson's History of Samos, with a new portrait of that brilliant author.

Those who made sweeping charges of corruption against the Manitoba Government have not much laith in their essertions. Notwithstanding the statement that there was wholesale bribery in Mr. Greenway's constituency, the time has elapsed for tacked. Three petitions have been filed against supporters of the Government and five against members of the Opposition. The charges of bribery fall to the ground because no one thinks it worth while at stylish Cloths, Suitings, Trowsertempting to prove them .- Mail.

Dressmaking.

This Department of our business is now in full swing, and orders are coming in rapidly. We have spared peither trouble, thought, nor expense in equipping our Dressmaking Department with the most ample facilities for good workmanship; it is under the management of a thoroughly experienced and competent artist, one equally ready to carry out instructions or to suggest ideas.

Clever Dressmaking is of vital importance to every stylish woman but this fact is frequently lost sight of. Sometimes, when the dress material is of excellent quality and the trimmings handsome and expensive, a lady is short sighted enough to economize in the cost of making, has he dress made up by an incompetent dressmaker; and for the sake of 50c. or a dollar, the effect of the garment is spoiled. A dress of cheaper materials, stylishly made, would be truer economy, if economy is the object.

Our position is an advantageous one in these respects. We can estualy the most particular tastes without charging out-of-the way prices. Further, we guarantee the style and fit of the work done by as. Our Dressmaking Department has a reputation. for superior work which we intend to maintain.

If you have not as yet kiven our dressmakers a trial you will find it decidedly for
