NOTES AND COMMENTS.

The Governor of Amoy has issued a proclamation against the sale or use of American petroleum in his district, and this is regarded as the first step towards retaliatory measures against everything American in the event of the Geary Act being enforced.

Dr. Edward Playter, of Ottawa, has returned to his attack on Grosse Isle quarantine station. In reply to Minister Angers' statements, he says that the disinfecting apparatus may be the best, but it is the management of which he complains. He asks the Government to appoint a commission of enquiry.

The Montreal *Star* has given publicity to a rumour to the effect that great efforts are now being made by a number of American and Canadian capitalists to secure a controlling interest in the Grand Trunk Railway, and to manage it from the Canadian side of the Atlantic.

The Australian mails for England, via the Canadian route, arriving in Montreal last week were promptly forwarded to New York and placed on board the steamer Augusta Victoria, and are expected to reach Southampton on the 22nd inst., 15 days after they were shipped at Sydney, a saving of four days.

A London cable says: "It has long been a sore point with Canadian and other colonial legislators and such big bugs that their home titles of 'The Honorable' were not recognized in the Mother Country. It will be a cause of much rejoicing to day in Her Majesty's distant dominions that the Queen has been graciously pleased to approve of the use and recognition of the title 'Honorable.'"

The new criminal code passed by Parliament last year comes into force on the 1st of July. After that date any person found carrying concealed fire-arms without the written permission of a Justice of the Peace, will be imprisoned without the option of a fine. This will probably put a stop to the practice of carrying revolvers by persons who have no more use for a sure-shooter than a cat has for a sidepocket.

The Dominion government has decided that Saturday, the first day of July, shall be celebrated as Dominion Day. The matter was considered in council, a letter having been received from the Toronto city clerk making enquiry as to the government's power to postpone the celebration until Monday. The reply was given that except when Dominion Day falls upon Sunday the government has no power to change the day of its celebration.

A Virginian has invented a new postage stamp which ought to be popular. The patent device consists in the regular two-cent stamp being perforated through the middle much as a sheet of stamps is perforated. The figure "2" is to be printed over the perforated line and the necessity of buying two denominations obviated. Whenever a one-cent stamp is wanted the owner of the two-cent stamp just tears it in two, making two one-cent stamps.

Throughout the Western States the general feeling of financial insecurity that first showed itself in Chicago has caused the banks to experience some severe strains. In consequence of the claim among depositors fourteen institutions have announced that withdrawal will only be permitted after sixty days' notice. In Kansas, Ohio, Nebraska and Michigan the disturbance has been chiefly felt. The coinage of silver and low prices of wheat are said to be causing financial havoc.

Michigan is about to try a curious experiment. A new law provides that any one convicted of drunkenness may take his choice between a term of imprisonment and a course of treatment at some Keeley Institute. If the prisoner elects to be cured of the appetite for strong drink, the county shall spend at least $70 for that purpose. The scheme will be watched with interest. It is an acknowledgment that drunkenness is a curable disease, and admission that penal practices should take into account the welfare of offenders as well as the protection of society.

THE REFORM CONVENTION.

The great convention of Liberals from all parts of the Dominion in session at Ottawa Tuesday and Wednesday numbered between 3,000 and 4000. Sir Oliver Mowat occupied the chair. A brilliant address was made by Hon. Wilfred Laurier who was followed by Sir Richard Cartwright and Mr. Gilmour M. P. The proceedings throughout had much of interest to the delegates.

NASSAGAWEYA.

There was a heavy thunderstorm in the neighborhood of Campbellville and Nassagaweya on Saturday evening about six o'clock. The barn and stone stable of Mr. Hugh Campbell, a son of Arch. Campbell, Esq., Acton, were totally destroyed. The lightning struck the barn and entered the hay mow. In an instant the barn was in a blaze. The loss is reported at from $1,100 to $1,200, with a fair insurance. The spire of the Presbyterian church at Campbellville was also struck. It was slightly damaged.

Mr. P. Sayers, of Sayers' Mills, lost a fine five-year-old mare a few days ago, by a broken leg. She was a valuable beast and had to be shot.

Sir John Abbott has greatly improved in health since the warm weather set in.

George Williamson, bus driver, was drowned while bathing at Goderich Tuesday.

The majority for the Scott Act in the contest in Brome County on Friday was 140.

Arthur Schimdt, aged 9, was drowned in his father's mill pond at Thornhill on Sunday evening while bathing.

Hugh Cameron committed suicide at Fergus on Saturday by taking laudanum which he had procured for a sick horse.

CANADIAN PLUCK.

A SUCCESSFUL CANADIAN BUSINESS EXTENDED TO ENGLAND

Although but a Short Time in that Country the Press Proudces the Phenomenal.

We have much pleasure in reproducing the following article from the Montreal *Witness*, relative to the success in Great Britain of a well-known Canadian firm. We have done business with the firm in question for a number of years and can heartily endorse what the *Witness* says concerning their honorable business methods, and care exercised in the publication of the articles appearing in the press relative to their preparation. These cases are always written up by influential newspapers in the localities in which they occur after a full and thorough investigation that leaves no doubt of their impartiality, and truthful character. We are quite certain that the confidence reposed in the firm and their preparation is not misplaced:—

"The phrase 'British pluck' has become an adage, and not without good reason, for wherever, enterprise, courage or 'bull-dog tenacity' is required to sweep away or surmount opposing obstacles in order that the pinnacle of success may be reached, your true Briton never flinches, and facing all obstacles works until has been achieved. This same 'British pluck' is a characteristic of the native born Canadian, and there are very few walks in life in which it does not bring success as the reward. This much by way of prelude to what bears every indication of being a successful venture on the part of a well-known Canadian house. When it was announced a few months ago that the Dr. Williams' Medicine Co., of Brockville, intended establishing a branch of their business in the motherland, there were not a few who were inclined to be skeptical as to the success of the venture, while some boldly predicted failure. "There would be an objection," they urged, "to taking up a colonial remedy," "their business methods differed from those prevailing in Canada;" "the field was already crowded with proprietory remedies long established and well advertised." These and many other objections were urged as reasons why the venture was a doubtful one. But the Dr. Williams' Medicine Co. was not to be deterred by any objections that might be raised. They had unbounded confidence in the merit of Dr. Williams' Pink Pills for Pale People, and the pluck to back up their confidence with their cash. This latter is well known to Canadian newspaper men, who know that less than three years ago the company first put upon the market in the form of Pink Pills a prescription which had previously only been used in private practice, and with a skill and audacity that has not been surpassed in the annals of Canadian advertising, pushed it in the van of all competitors. Of course, the remedy had to have merit, or this could not have been done, and it was the company's sincere belief in the merit of their remedy that endowed them with the pluck to place their capital behind it. It was this same conviction that merit, skillfully advocated, will command success that induced them to venture into competition with the long established remedies of the motherland. And we are glad to know—indeed we believe that all Canadians will be glad to learn—that short as the time the Dr. Williams' Company has been in that field, their success has been rapid and ever increasing. As an instance of this success the 'Chemist and Druggist,' the leading drug journal of the and probably the most conservative—in a recent issue states that the success of Dr. Williams' Pink Pills in Great Britain has been unprecedented and phenomenal. While no doubt, it is the advertising that has brought this remedy into such rapid prominence in England, it is the merit of the preparation that keeps it there, and makes it popular with the people. There are few newspaper readers in Canada who have not read of the cures, that to say the least, border on the marvellous, brought about by the use of Dr. Williams' Pink Pills, and already we see, by the English papers that the same results are being achieved there. Is it any wonder then that Pink Pills are popular wherever introduced? We have done business with this firm for a number of years. We have found them honorable and reliable, and worthy of credence in all that they claim for their remedy.

We cannot close this article better than by giving in a condensed form the particulars of a striking cure in Nottingham, England, by the use of Dr. Williams' Pink Pills. The cure is vouched for by the Nottingham Daily *Express*, the leading journal of the Midland Counties.

"The picturesque suburb of Old Basford some three miles from the market-place of Nottingham, has just been the scene of an occurrence which has excited considerable attention among the local residents, and of which rumors have reached Nottingham itself. The circumstances affect Mr. Arthur Watson, of Old Basford, formerly an employee in the bleach yard at Messrs. H. Ashwell & Co's hosiery factory in New Basford, and afterwards employed at the Bestwood Coal and Iron Co's factory near Nottingham. In consequence of the gossip, which has been in circulation with regard to this case, a local reporter called upon Mr. Watson, at his bright little house situated at No. 19 Mountpleasant, Whitemoor road, Old Basford, and made inquiries as to the curious circumstances alleged. The visitor was met by Mrs. Watson, but Mr. Watson, himself immediately afterward entered the room, looking very little like the victim of sudden paralysis. He told the story of his life's health as follows: In boyhood he was prostrated by a severe attack of rheumatic fever, which after his slow recovery, left behind it a permanent weakness, and uncertainty of action in the heart and he had always been debilitated and more or less feeble. On giving up his work at Messrs. Ashwell's bleach factory, he sought change of employment and undertook the work of attending to furnaces at kilns at the Bestwood Coal and Iron Co's Works, being at the time an outpatient at the General Hospital, Nottingham, where he was treated for weakness of the heart. The circumstances of his work at the furnaces were somewhat peculiar. Exposed on one side to the extreme heat of the furnace, he was attacked on the other by the chilling winds which proved so distressing to many people last October, and one day in that month he was suddenly prostrated by a stroke which had all the appearance of permanent paralysis, and was pronounced such by the doctors who attended him. The course of the stroke appears to have been down the right side. His leg was entirely powerless and he was unable to stand. He could not lift his right arm from his side or from any position in which he was placed. His face was horribly distorted, and the organs of speech completely paralyzed, so that he was able neither to stand nor speak. His condition is described by those acquainted with him as being most pitiable. He lay in this condition for more than three suffering intermittently considerable pain, but more afflicted by his utter helplessness
