THURSDAY, MAY 21, 1804. NOTES AND COMMENTS.

The extent to which the broycle manie has apread throughout Ontario is shown by the fact that since January 1 there has been \$225,000 worth of biovoles and parts of bioyeles passed through the quetom house at Toronto. While that city is of course the great scuter for Ontario, and the greater part of the machines imported would come through the port, there must be quite a few entered at Hamilton, London, Montreal and other points to pass custom's for Ontario points.

There were more cases of arson reported during the past month than for many years. The Attorney-General's department was asked to investigate at least a dozen suspicious fires in Ontario, and the inspecors of the departments have been busily engaged on cases of this nature in various portions of the province. Seven acous persons are now awaiting trial on a charge of firing buildings for insurance, and officers are at work upon a number of other

coming election in this fashion : - In Halton Col. Kerns, the present Conservative member, is opposed by Mr. John Husband, 'a strong and popular supporter of the present | session Administration. Mr. Kerns is well esteem ed, but his legislative record consists simply of persistent opposition to every act and proposition of the Mowat Government. It is consequently absolutely barren of schievement, whether in relation to

Malton or the Province as a whole. -----The Toronto Star writing of the action | pondent It is in good preservation, of ex of the Toronto and Kingston Presbytery fo recommending all Presbyterians to vote for prohibition candidates, says: "It is not at all improbable that this advice will be accepted and acted upon. . In previous contests, when prohibition legislation was remote and opposition to traditional parties was dishonorable, the advice would have been rejected. But now, when prohibitive logislation is right us, and the political parties are becoming destroyed and men's views are it reflects the highest credit on Professor becoming wider, the temperance people, too, will see that members truly represent: and so successfully managed its manulative shall represent, and that temperance | facture. men shall control legislation."

The Patrons of Industry have forty-four candidates in the field for the local clostions in Outario. -Ol-the forty-four, twenty-eight are former Liberale, twelve, form. er Conservatives, and four had not been identified with either party. The reason why so large a proportion of the Patrone' candidates are former Liberals has never. so far as we have seen, been stated. On the other hand the Protestant Protective Association has twenty-seven candidates in Ontario constituencies running for the legislature. Of these, it is said, no fewer than seventeen are or have been Conserva. therefore, that white the Patrons of Industry are mostly Liberals or of Liberal sym. | was not likely to turn out in point of pathies, the Protestant Projective Association is mostly made up of Conservatives.

PROSPECT OF A BOOM IN NICKEL. Information has been received here from Washington that the Government of the Inited States has in contemplation the rection of extensive works for the smelting of nickel ares, which would give a great impotus to mining in the Sudbury district. The American Government have evidently awakened to the importance of our nickel deposits, which are known to be the most valuable and extensive in the world, and it is said will locate their works somewhere in New York, near the international bound ary It has been ascertained that in the extraction of nickel from the matte by existing methods, a very valuable constituent Is lost, and it was probably for this reason als among their candidates. It appears that some experiments made in the United States seem to indicate that picket plate strongth quite as successful as the original inventors anticipated. The American Government, however, sent an expert metallurgist to (ierman), where for atx months, he studied the processes there om ployed for the production of makel.
