NOTES AND COMMENTS.

The Manitoba Government has given notice that it will no longer maintain the gubernatorial residence in that Province after the term of its lease expires.

The liquor bill, the passage of which was expected, and which would have made North Carolina practically a prohibition State, has been defeated in the Senate. There was a bare majority of one against it.

A compilation of laws affecting children has been made by Mr. C. H. Bates of Toronto, from the various states of Ontario and Canada, and will be issued by the Ontario Government for free distribution to philanthropic workers. The collection will be a most useful one to those interested in child protection.

The farming interest is strong in the Ontario Legislature, there being 46 members of the same, and the members are closely connected with farming interests. Attorney General Sifton, in the Manitoba Legislature, made a very vigorous speech defending the position of his Government in the Manitoba question. The Pekin Gazette, said to be the oldest newspaper in the world, recently celebrated the sixtieth anniversary of its existence. The result of its long life is despatched to every corner of the globe. It has been the voice of the people in every country in which it has been published. There is no record of the kind of blunders which were thus punished.

There will be a new alignment of parties in the next Presidential campaign, said Representative Blane, of Missouri, last week. The free silver men intend to get another candidate who will not affect their sentiments. The silver question will be the question of prime importance before the country next year. He asserts that the silver men will nominate a candidate of their own.

Chief Justice Armour has just rendered a decision which will be of interest to fathers of families and those who have to do with insurance companies. It is that a man who has duly declared his life insurance policy to be for the benefit of his wife alone cannot by his will deprive the wife of this benefit and transfer it to his children. He can, however, during his life by an instrument in writing retained to or induced or identifying the policy by its number, transfer the benefits from the wife alone to the children, alone or vice versa, or vary the apportionment of the wife and children are to receive.

The English trades unions report that 30,000 of their members in London are unable to get employment and must remain idle until the weather shall moderate. The majority of these men are carpenters, plasterers and stonemasons. Liverpool, Manchester, Birmingham and several other manufacturing and trading centres, the unemployed are making street demonstrations. In all these cities the soup kitchens are crowded from morning till night, yet are unable to satisfy the extraordinary demands upon them. One large gow alone is feeding more than 40,000 persons.
