THE STACE OF CONVALESCENCE Is at once interesting and critical The patient carefully accreded at this period and provided with the means ersential for health, may be enabled once more to enjoy the inestimable blessing of health. On the other hand, neglect of even minor needs, at this period as likely to impose upon him the life-long penalty of ill health, resulting in a wasted life. The assimilative processse are, at this time, sure to be impaired, to the assaults of discess; will both sadly need the impetes which Maltine with Coca

Wine alone can give. By the sotion of Maltine with Coos Wine upon the digestive processes, which rapidly strengthens, and its permanent and striking influence upon the nervous system. to which it gives vigor and tone, the restorative power of the body is immensely increased, and strength and vigor come to the trivalid so quickly as to seem almost impossible. Experience, however, has demonstrated its efficiency in convalencence as well as in the various forms by which debility, arising from faulty nutrition, manifests itself. Bold by all druggists.

We are told they got some 20 or 30 bushall of notatobs, twelve to twenty dozen of eggs, and barrels of

Another Fine Monument at Fairview. The number of fine monuments now to be seen in Fairview Cometery is remarkable, considering that it is comparatively a new cemetery. The inapprity of those have been creeted by Mr. J. II. Hamilton, Guelph, from whose yards a fine new one was placed last week over the graves of the late Mr. and Mrs. John Speight. It is a beautiful red Swede granite of new design; cylindrical in form, with draped urn, and octagon base, and stands about twelve feet high. . The workmanship is damage. perfect throughout. Very Utly Fall.

Last Friday evening as Fareman Hasson, of the 6.08 train going west, was about to convey a supply of water from the tank to his engine, he slipped and full off the tender to the platform below. He sustained a bad gash on the forehead, a number of serious bruises and was bally shaken up generally. He was taken to his home in Stratford and a fireman from a waiting freight train took his place on the engine. This accident is doubly unfortunate for he had been very badly injured in the collision near Weston on the 8th of February last, and it is only two months since he recovered sufficiently to be out.

The Fire Engine Tanks. Ground was broken last Priday first of the new fire engine comply tanks, at the town hall, and the others arranged for will be proceeded with in regular order. At a special meeting of the Fire Protection Committee last Wednesday evening it was decided to put in stone tanks, instead of pine as at first proposed. A very favorable contract has been made with Mr. be but a trifling amount in advance of the wooden tanks, while a permanence is secured which is most desirable. The feed pipes will be of sewer pipe, comented, and will be " or 9 inches in dismeter.

SUNDAY SCHOOL CONVENTION Opens With a Large Attendance. Enthusiastic Speeches.

The annual convention of the Province Sunday School Association was opened on Tuesday morning in Toronto. There were about 800 delegates present. The Association is hampered by a persistent treasury deficit which will compel it to abandon its mission work and abulish the office of Nor mal Secretary. In spite of this, however, the delegates are as onthusiastic as ever and this convention bids fair to even surpass previous ones in point of excellence. The morning of Tuesday was chiefly given up to conferences of departments. Papers were read on methods of Normal work in connection with Hunday Babool teaching and the necessity of paying more attention to the training of teachers was strongly

ead which indicated that the work throughout the province is in a healthy and progressive condition. A speech by Chanceller Burwash followed in which he emphesized the importance of Sunday School work as a preparation for citizenship. The election of officers closed the afternoon proceedings. Mr. John A. Patterson, of Torunto, was elected President and Rev. Mr. itae, of Acton, was elected to the com

The meeting in the evening was public and the church was densely crowded. Mayor Kennedy welcomed the delegates and was replied to in a happy speech by the retiring President, Mr. 11 P. Moore Rev R. G Boselle, followed with a speech on "Zeal and Knowledge, Two Essential Elements of Success in Christian Charactor." Mr. S. H. This is most aptly called the electrical age. Electricity is still almost a novelty and it is impossible to tell how far it wil yet be developed. On all sides we see it branching out in new enterprises. The latest form electrical enterprise has taken in Canada will be found in another column. A strong company has been furmed with the object of running an electric railway from Windsor to Montreal. The aim is not to carry through freight and passen gers but to eater to local traffic it will rue on the public highways and bids fair to revolutionise the carrying trade between these two places.

through the sustant complete out taily purchases of Mantles and Jackets, and a larger, more complete, more beautiful or cheaper stock of mantles it will puzzle you to find. You would have to go to a larger city that Guelph to do it, and then you wouldn't find many. Unlike some other antio dealers who profess to import fro manufacturers, but who pay to the commission house through whom they do their business, a percentage for the use of their name, our goods are bought direct without any commission or percentage to intemediary. In this we make a clear saving. Our name is good enough to unlock the door and give us entree to the best manufactures of the world. This, however, is not the real point of interest to you. The main thing to you is where can I buy my fall jacket to the best advantage? having regard to selection, style, quality and price. We invite you to inspect every competing mantle department and put ours in critical comparison. We were the first in Guelph to import fine German Jackets direct, to any extent, and we have held our piace for the nicest goods in the city. Come, inspect, compare and use your own judgment and we'll court the consequence.

FURS.

the state of our merchants have lately been telling cach giving you their reasons for being able to sell yea turs choaper than anybody else. The result was we felt a little blue,

until we remembered how we bought our furs. This is the story :-Last tall seventeen of the leading merchants of Canada, representing cities all the way from Montreal to Windsor, met in Toronto to discuss buying furs to the best advantage. Mr. Ryan was unani mously appointed to arrange for the best terms from the manufacturers. Accordingly last spring the seventeen merchants assembled at the Queen's Hotel, Toronto, where they were mot by representatives of the five leading fur houses of Canada, and placed their combined order, amounting in all from twenty-five to thirty thousand dollars. Our firm was one of the seventeen, and the result is that we bought our furs as cheap as if we personally bought \$80,000 worth for our own business. And while such attention was given to buying at close prices, quality was carefully considered, with the result that we can, this fall, distance any past record for real out and out values in furs.
