Guarantors THE TORONTO FINANCIAL CORPORATION

This is a development company organized for the purpose of buying, selling and developing mining properties in British Columbia, and is at present engaged in active work on six full-sized claims, viz. :- Ethel No. 1, Ada L., Iron King No. 4, Blue Bell No. 1 and Tenderfoot. All in one block and situated at the head of Murphy Creek, in close proximity to the Yellowstone Group and Heather Bell.

> The Ethel Group properties are well mineralized. Ore taken from a shaft 15 feet in the Ethel No. 1 and from another shaft 23 feet assays \$7.00 to \$12.90 per ton in Gold, which compares most favorably with the assays of ore from the richest mines in the Rossland District, at the same stage. Work-is now being pushed rapidly, contracts for another 100 feet have been recently let requiring their completion by the end of May, at which time more extensive work will follow. Development work can be carried on at a minimum of expense. The northern end of the property being nearly 1,000 feet higher than the southern end makes it suitable for operating by tunnel, saving the expense of hoisting and pumping plants. Its proximity to the Trail Smelter with agood roadway directly to it and the verynearadvent of a railway (the preliminary survey of which passes through the Ethel Group) will place it on a working basis

> excelled by none in the camp. The capitalization being only \$250,000.00 per claim and the rich indications of the ore, together with careful and practical management, should ensure the utmost confidence in the future earnings of this company. The operation of the mines will be under the supervision of C. W. Smith, an experienced Mining Engineer from Cripple Creek, Colorado, and the greatest possible results may be anticipated

> While the management feel assured that Pay Ore Will Be Reached within a few months, they do not overlook the fact that during the first few years of development the expense of procuring the most approved machinery and appliances, sinking shafts and incidenal work may prevent a company from paying dividends with regularity. The present shareholders have therefore made arrangements with The Toronto Financial Corportion (with whom securities have been deposited) whereby that corporation has guaranteed he payment of dividences or interest at the rate of ten per cent. per annum, payable half yearly, for the next five years on the allotted price of this special issue of stock, the script for which has this guarantee endorsed thereon. This issue of stock is offered to the public with the view of providing increased development which will be pushed forward asrapidly as possible (consistent with judicious and expert management) thus assuring to the purchasers of this stock that the savings of the mines will enable the management to continue paying permanent dividends.

> Tenders for these preferred shares are hereby called and will be received at the office of the said "Toronto Financial Corporation," No. 86 East King Street, Toronto, Canada, up to three o'clock p.m., on Tuesday, the 20th day of April, 1897, in lots of 25 shares and upwards. The minimum price being 75c. per share. A deposit of 25 per cent. to accompany each tender to assure bonafides. Prospectus, Maps and form of tender can be had at the offices of THE ETHEL GROUP GOLD MINING CO., (Limited.)
